Non-GAAP Financial Measures

GitLab believes non-GAAP measures are useful in evaluating its operating performance. GitLab uses this supplemental information to evaluate its ongoing operations and for internal planning and forecasting purposes. GitLab believes that non-GAAP financial information, when taken collectively with its GAAP financial information, may be helpful to investors because it provides consistency and comparability with past financial performance. However, non-GAAP financial information is presented for supplemental informational purposes only, has limitations as an analytical tool, and should not be considered in isolation or as a substitute for financial information presented in accordance with GAAP. Reconciliations of non-GAAP financial measures to the most directly comparable financial results as determined in accordance with GAAP are included at the end of this press release following the accompanying financial data. We define non-GAAP financial measures as GAAP measures, excluding stock-based compensation expense, amortization of acquired intangible assets, foreign exchange (gain) loss, (gain) loss from a deconsolidation of a subsidiary, and equity investment (gain) loss. A reconciliation of non-GAAP guidance measures to corresponding GAAP measures is not available on a forward-looking basis without unreasonable effort due to the uncertainty of expenses that may be incurred in the future. Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures and not rely on any single financial measure to evaluate our business.

Forward-Looking Statements

This press release and the accompanying earnings call contain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934. Although we believe that the expectations reflected in the forward-looking statements contained in this release and the accompanying earnings call are reasonable, they are subject to known and unknown risks, uncertainties, assumptions and other factors that may cause actual results or outcomes to be materially different from any future results or outcomes expressed or implied by the forward-looking statements. These risks, uncertainties, assumptions, and other factors include, but are not limited to the following:

- · customers staying on our open-source or free SaaS product offering;
- fluctuations in our operating results;

• general economic conditions (including changes in interest rates and inflation) and slow or negative growth of our markets.

Further information on these and additional risks, uncertainties, and other factors that could cause actual outcomes and results to differ materially from those included in or contemplated by the forward-looking statements contained in this release are included under the caption "Risk Factors" and elsewhere in the filings and reports we make with the Securities and Exchange Commission. We do not undertake any obligation to update or release any revisions to any forward-looking statement or to report any events or circumstances after the date of this press release or to reflect the occurrence of unanticipated events, except as required by law.

Operating Metrics

Annual Recurring Revenue ("ARR"): We define annual recurring revenue as the annual run-rate revenue of subscription agreements, including our self-managed and SaaS offerings but excluding professional services, from all customers as measured on the last day of a given month. We calculate ARR by taking the monthly recurring revenue ("MRR") and multiplying it by 12. MRR for each month is calculated by aggregating, for all customers during that month, monthly revenue from committed contractual amounts of subscriptions, including our self-managed license, self-managed subscription, and SaaS subscription offerings but excluding professional services.

Dollar-Based Net Retention Rate: We calculate Dollar-Based Net Retention Rate as of a period end by starting with our customers as of the 12 months prior to such period end ("Prior Period ARR"). We then calculate the ARR from these customers as of the current period end ("Current Period ARR"). The calculation of Current Period ARR includes any upsells, price adjustments, user growth within a customer, contraction, and attrition. We then divide the total Current Period ARR by the total Prior Period ARR to arrive at the Dollar-Based Net Retention Rate.
