SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q, or this Quarterly Report, contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. All statements contained in this Quarterly Report other than statements of historical fact, including statements regarding our future operating results and financial condition, our business strategy and plans, market growth, and our objectives for future operations, are forward-looking statements. The words “believe,” “may,” “will,” “potentially,” “estimate,” “continue,” “anticipate,” “intend,” “could,” “would,” “project,” “target,” “plan,” “expect,” and similar expressions are intended to identify forward-looking statements.

Forward-looking statements contained in this Quarterly Report include, but are not limited to, statements about:

- our future financial performance, including our expectations regarding our total revenue, cost of revenue, gross profit or gross margin, operating expenses, including changes in operating expenses and our ability to achieve and maintain future profitability;
- our business plan and our ability to effectively manage our growth;
- our total market opportunity;
- anticipated trends, growth rates, and challenges in our business and in the markets in which we operate;
- market acceptance of The DevSecOps Platform and our ability to increase adoption of The DevSecOps Platform;
- beliefs and objectives for future operations;
- our ability to further penetrate our existing customer base and attract, retain, and expand our customer base;
- our ability to timely and effectively scale and adapt The DevSecOps Platform;
- our ability to develop new features and bring them to market in a timely manner;
- our plans to incorporate artificial intelligence features into our products;
- our expectations to grow our partner network;
- our ability to maintain, protect, and enhance our intellectual property;
- our ability to continue to expand internationally;
- the effects of increased competition in our markets and our ability to compete effectively;
- future acquisitions or investments in complementary companies, products, services, or technologies;
- our ability to stay in compliance with laws and regulations that currently apply or become applicable to our business both in the United States and internationally;
- economic and industry trends, projected growth, or trend analysis;
- the impact of macroeconomic conditions and global events, including inflation, rising interest rates, increased volatility in the capital markets, instability in the global banking sector and regional and global conflict, including the armed conflict in Ukraine, on our operations, financial

results, and liquidity and capital resources, including on customers, sales, expenses, and team members;

- increased expenses associated with being a public company; and
- other statements regarding our future operations, financial condition, and prospects and business strategies.

These forward-looking statements are subject to a number of risks, uncertainties, and assumptions, including those described in the section titled “Risk Factors” and elsewhere in this Quarterly Report. Moreover, we operate in a very competitive and rapidly changing environment, and new risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties, and assumptions, the forward-looking events and circumstances discussed in this Quarterly Report may not occur, and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

You should not rely upon forward-looking statements as predictions of future events. The events and circumstances reflected in the forward-looking statements may not be achieved or occur. We undertake no obligation to update any of these forward-looking statements for any reason after the date of this Quarterly Report or to conform these statements to actual results or to changes in our expectations, except as required by law.

You should read this Quarterly Report and the documents that we reference in this Quarterly Report and have filed with the Securities and Exchange Commission, or the SEC, as exhibits to this Quarterly Report with the understanding that our actual future results, performance, and events and circumstances may be materially different from what we expect.

Summary Risk Factors

Our business is subject to numerous risks and uncertainties, including those risks more fully described below in the section titled “Risk Factors.” These risks include, among others, the following, which we consider our most material risks:

- Our business and operations have experienced rapid growth, and if we do not appropriately manage future growth, if any, or are unable to improve our systems, processes and controls, our business, financial condition, results of operations, and prospects will be adversely affected.
- Our recent growth may not be indicative of our future growth, and we may not be able to sustain our revenue growth rate in the future. Our growth also makes it difficult to evaluate our future prospects and may increase the risk that we will not be successful.
- We have a history of losses, anticipate increases in our operating expenses in the future, and may not achieve or sustain profitability on a consistent basis. If we cannot achieve and sustain profitability, our business, financial condition, and operating results may be adversely affected.
- We face intense competition and could lose market share to our competitors, which would adversely affect our business, operating results, and financial condition.
- The market for our services is new and unproven and may not grow, which would adversely affect our future results and the trading price of our Class A common stock.
- Our business depends on our customers purchasing and renewing subscriptions and purchasing additional subscriptions and services from us. Any decline in our customer renewals and expansions could harm our future operating results.

- Transparency is one of our core values. While we will continue to prioritize transparency, we must also promote “responsible” transparency as transparency can have unintended negative consequences.
- We have a publicly available company Handbook that may not be up to date or accurate which at times may result in negative third-party scrutiny or be used in ways that adversely affects our business.
- Security and privacy breaches may hurt our business.
- Customers may choose to stay on our free self-managed or SaaS product offerings instead of converting into a paying customer.
- Our operating results may fluctuate significantly, which could make our future results difficult to predict and could adversely affect the trading price of our Class A common stock.
- We have a limited operating history which makes it difficult to evaluate our current business and future prospects and may increase the risks associated with your investment.
- We have experienced rapid growth in recent periods. If we fail to manage our growth effectively, we may be unable to execute our business plan, maintain high levels of service or adequately address competitive challenges.
- We may not be able to respond to rapid technological changes with new solutions, which could have a material adverse effect on our operating results.
- We do not have an adequate history with our subscription or pricing models to accurately predict the long-term rate of customer subscription renewals or adoption, or the impact these renewals and adoption will have on our revenues or operating results.
- We rely on our management team and other key team members and will need additional personnel to grow our business, and the loss of one or more key team members or our inability to hire, integrate, train and retain qualified personnel, could harm our business.
- We contract with our team members in various ways, including hiring directly, through professional employer organizations, or PEOs, and as independent contractors. As a result of these methods of engagement, we face certain challenges and risks that can affect our business, operating results, and financial condition.

GitLab Inc.
Notes to Condensed Consolidated Financial Statements
(unaudited)

1. Organization and Description of Business

GitLab Inc. (the "Company") began as an open source project in 2011 and was incorporated in Delaware on September 12, 2014. While the Company is headquartered in San Francisco, California, it operates on an all-remote model. The Company is a technology company and its primary offering is "GitLab", a complete DevSecOps platform delivered as a single application. GitLab is used by a wide range of organizations. The Company also provides related training and professional services. GitLab is offered on both self-managed and software-as-a-service ("SaaS") models. The principal markets for GitLab are currently located in the United States, Europe, and Asia Pacific. The Company is focused on accelerating innovation and broadening the distribution of its platform to companies across the world to help them become better software-led businesses.

2. Basis of Presentation and Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") and applicable rules and regulations of the U.S. Securities and Exchange Commission (the "SEC") regarding interim financial reporting. Accordingly, they do not include all disclosures normally required in annual consolidated financial statements prepared in accordance with U.S. GAAP.

Fiscal Year

The Company's fiscal year ends on January 31. For example, references to fiscal 2024 and 2023 refer to the fiscal year ending January 31, 2024 and the fiscal year ended January 31, 2023, respectively.

Use of Estimates

The preparation of the condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Such estimates include, but are not limited to, allocation of revenue to the license element in the Company's self-managed subscriptions, estimating the amortization period for capitalized costs to obtain a contract, allowance for doubtful accounts, stock-based compensation expense, fair value of contingent consideration, fair valuation of retained interest in an investee on loss of control, valuation allowance for deferred income taxes, reserves for unrealized income tax benefits, valuation of intangibles assets and impairment of goodwill and equity method investments. The Company bases these estimates on historical and anticipated results, trends, and various other assumptions that it believes are reasonable under the circumstances, including assumptions as to future events. Actual results could differ from those estimates.

Principles of Consolidation

The condensed consolidated financial statements include 100% of the accounts of wholly owned and majority owned subsidiaries as well as a variable interest entity for which the Company is the primary beneficiary. The ownership interest of other investors is recorded as noncontrolling interest. All intercompany accounts and transactions have been eliminated in consolidation.

Summary of Significant Accounting Policies

There were no significant changes to the Company's significant accounting policies disclosed in "Note 2" of the Company's Annual Report on Form 10-K for the fiscal year ended January 31, 2023.

3. Revenues

Disaggregation of Revenue

The following table shows the components of revenues and their respective percentages of total revenue for the periods indicated (in thousands, except percentages):

	Three Months Ended July 31,				Six Months Ended July 31,			
	2023		2022		2023		2022	
Subscription—self-managed and SaaS	\$ 122,096	87 %	\$ 88,936	88 %	\$ 233,287	87 %	\$ 165,859	88 %
Subscription—self-managed	86,659	62	66,896	66	166,246	62	126,615	67
SaaS	35,437	25	22,040	22	67,041	25	39,244	21
License—self-managed and other	\$ 17,485	13 %	\$ 12,105	12 %	\$ 33,172	13 %	\$ 22,589	12 %
License—self-managed	14,624	11	10,009	10	27,979	11	18,786	10
Professional services and other	2,861	2	2,096	2	5,193	2	3,803	2
Total revenue	\$ 139,581	100 %	\$ 101,041	100 %	\$ 266,459	100 %	\$ 188,448	100 %

Total Revenue by Geographic Location

The following table summarizes the Company's total revenue by geographic location based on the region of the Company's contracting entity, which may be different than the region of the customer (in thousands):

	Three Months Ended July 31,		Six Months Ended July 31,	
	2023	2022	2023	2022
United States	\$ 114,054	\$ 84,123	\$ 217,016	\$ 156,397
Europe	22,245	14,750	43,202	27,738
Asia Pacific	3,282	2,168	6,241	4,313
Total revenue	\$ 139,581	\$ 101,041	\$ 266,459	\$ 188,448

During the three and six months ended July 31, 2023, the United States accounted for 82% and 81% of total revenue, respectively. During each of the three and six months ended July 31, 2022, the United States accounted for 83% of total revenue for each period presented. No other individual country exceeded 10% of total revenue for any of the periods presented.

The Company operates its business as a single reportable segment.

Deferred Revenue

During the three and six months ended July 31, 2023, \$101.6 million and \$157.5 million, respectively, of revenue was recognized, which was included in the corresponding deferred revenue balance at the beginning of the periods presented. During the three and six months ended July 31, 2022, \$67.0 million and \$105.8 million, respectively, of revenue was recognized, which was included in the corresponding deferred revenue balance at the beginning of the periods presented.

Remaining Performance Obligations

As of July 31, 2023 and January 31, 2023, the aggregate amount of the transaction price allocated to billed and unbilled remaining performance obligations for which revenue has not yet been recognized was approximately \$495.8 million and \$435.9 million, respectively. As of July 31, 2023, the Company expects to recognize approximately 68% of the transaction price as product or services revenue over the next 12 months and 88% over the next 24 months.

Concentration of Credit Risk and Significant Customers

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash, cash equivalents, short-term investments, and accounts receivable. At times, cash deposits may be in excess of insured limits. The Company believes that the financial institutions or corporations that hold its cash, cash equivalents, and short-term investments are financially sound and, accordingly, minimal credit risk exists with respect to these balances. The Company maintains allowances for potential credit losses on accounts receivable when deemed necessary.

The Company uses various distribution channels. As of July 31, 2023, one of these channel partners represented 16% of the accounts receivable balance, respectively, while as of January 31, 2023 one of these channel partners represented 12% of the accounts receivable balance. There were no individual customers whose balance represented more than 10% of accounts receivable as of July 31, 2023 and January 31, 2023.

There were no customers whose revenue represented more than 10% of total revenue during the three and six months ended July 31, 2023 and 2022.

4. Cash, Cash Equivalents and Short-Term Investments

The following table summarizes the Company's cash, cash equivalents and short-term investments by category (in thousands):

	As of July 31, 2023			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Cash and cash equivalents:				
Cash	\$ 126,196	\$ —	\$ —	\$ 126,196
Money market funds	117,628	—	—	117,628
U.S. Treasury securities	18,485	—	—	18,485
Commercial paper	10,919	—	(3)	10,916
Total cash and cash equivalents	\$ 273,228	\$ —	\$ (3)	\$ 273,225
Short-term investments:				
Commercial paper	83,957	—	(77)	83,880
Corporate debt securities	177,000	2	(1,148)	175,854
Foreign government bonds	2,235	—	(19)	2,216
U.S. Agency securities	67,567	—	(445)	67,122
U.S. Treasury securities	385,848	1	(1,863)	383,986
Total short-term investments	\$ 716,607	\$ 3	\$ (3,552)	\$ 713,058

	As of January 31, 2023			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Cash and cash equivalents:				
Cash	\$ 232,332	\$ —	\$ —	\$ 232,332
Money market funds	60,073	—	—	60,073
U.S. Agency securities	2,997	—	—	2,997
Total cash and cash equivalents	\$ 295,402	\$ —	\$ —	\$ 295,402
Short-term investments:				
Commercial paper	88,703	18	(112)	88,609
Corporate debt securities	95,805	33	(572)	95,266
Municipal bonds	1,989	—	(19)	1,970
Foreign government bonds	2,211	—	(41)	2,170
U.S. Agency securities	74,158	2	(435)	73,725
U.S. Treasury securities	383,238	—	(3,729)	379,509
Total short-term investments	\$ 646,104	\$ 53	\$ (4,908)	\$ 641,249

The Company uses the specific-identification method to determine any realized gains or losses from the sale of the Company's short-term investments classified as available-for-sale. For the three and six months ended July 31, 2023 and 2022, the Company did not have any material realized gains or losses as a result of maturities or sale of short-term investments.

During the three and six months ended July 31, 2023, the Company recorded \$9.1 million and \$16.4 million of interest income on cash equivalents and short-term investments, respectively, which includes \$4.9 million and \$8.5 million of net amortization of premiums or discounts on short-term investments during the three and six months ended July 31, 2023, respectively. During the three and six months ended July 31, 2022, the Company recorded \$3.1 million and \$3.6 million of interest income on cash equivalents and short-term investments, respectively, which included \$1.3 million of net amortization of premiums or discounts on short-term investments for each period presented during the three and six months ended July 31, 2022.

The following table summarizes unrealized losses on the Company's cash equivalents and short-term investments aggregated by category and the length of time such aggregated investments have been in a continuous unrealized loss position as of the periods presented (in thousands):

	Less Than 12 Months		More Than 12 Months or Greater		Total	
	Carrying Value	Gross Unrealized Losses	Carrying Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
July 31, 2023						
U.S. Agency securities	\$ 63,223	\$ (444)	\$ 3,899	\$ (1)	\$ 67,122	\$ (445)
Commercial paper	86,797	(80)	—	—	86,797	(80)
Corporate debt securities	153,562	(969)	18,869	(179)	172,431	(1,148)
Foreign government bonds	—	—	2,216	(19)	2,216	(19)

U.S. Treasury securities	263,148	(906)	92,567	(957)	355,715	(1,863)
Total cash equivalents and short-term investments	\$ 566,730	\$ (2,399)	\$ 117,551	\$ (1,156)	\$ 684,281	\$ (3,555)

	Less Than 12 Months		More Than 12 Months or Greater		Total	
	Carrying Value	Gross Unrealized Losses	Carrying Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
January 31, 2023						
U.S. Agency securities	\$ 73,724	\$ (435)	\$ —	\$ —	\$ 73,724	\$ (435)
Commercial paper	45,015	(112)	—	—	45,015	(112)
Corporate debt securities	75,203	(572)	—	—	75,203	(572)
Municipal bonds	1,970	(19)	—	—	1,970	(19)
Foreign government bonds	2,170	(41)	—	—	2,170	(41)
U.S. Treasury securities	379,509	(3,729)	—	—	379,509	(3,729)
Total cash equivalents and short-term investments	\$ 577,591	\$ (4,908)	\$ —	\$ —	\$ 577,591	\$ (4,908)

The following table classifies the Company's short-term investments by contractual maturities (in thousands):

	July 31, 2023		January 31, 2023	
	Amortized cost	Fair Value	Amortized cost	Fair Value
Due within 1 year	\$ 587,035	\$ 584,491	\$ 480,943	\$ 477,520
Due between 1 year to 2 years	129,572	128,567	165,161	163,729
Total	\$ 716,607	\$ 713,058	\$ 646,104	\$ 641,249

All available-for-sale securities have been classified as current, based on management's ability to use the funds in current operations.

5. Fair Value Measurements

The Company determines fair value based on the fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value assumes that the transaction to sell the asset or transfer the liability occurs in the principal or most advantageous market for the asset or liability and establishes that the fair value of an asset or liability shall be determined based on the assumptions that market participants would use in pricing the asset or liability. The classification of a financial asset or liability within the hierarchy is based upon the lowest level input that is significant to the fair value measurement. The fair value hierarchy prioritizes the inputs into three levels that may be used to measure fair value:

Level 1: Inputs are unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3: Inputs are unobservable based on the Company's own assumptions used to measure assets and liabilities at fair value. The inputs require significant management judgment or estimation.

The fair value of the Company's Level 1 financial instruments, such as money market funds which are traded in active markets, is based on quoted market prices for identical instruments. The fair value of the Company's Level 2 financial instruments such as commercial paper, corporate debt and U.S. government securities are obtained from an independent pricing service, which may use inputs other than quoted prices that are directly or indirectly observable in the market, including readily available pricing sources for the identical underlying security that may not be actively traded. The Company's marketable securities are held by custodians who obtain investment prices from a third-party pricing provider that incorporates standard inputs in various asset price models.

Financial assets measured at fair value on a recurring basis are summarized below (in thousands):

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Fair Value</u>
July 31, 2023 ⁽¹⁾

⁽¹⁾ Refer to "Note 12. Joint Venture and Equity Method Investment".

7. Business Combination

On December 3, 2021, the Company completed the acquisition of Opstrace, Inc., a technology company based in San Francisco, California.

The transaction was accounted for as a business combination. The acquisition date fair value of the consideration transferred was \$13.5 million, which included contingent cash consideration.

As of January 31, 2023, the Company held \$2.5 million in an escrow as partial security for post-closing indemnification claims made within 18 months of the closing date. The Company fully paid this acquisition-related holdback during the three months ended July 31, 2023.

In September 2022, one of the operational milestones was achieved and the Company paid \$4.2 million of contingent cash consideration. The remaining contingent cash consideration is determined based upon the satisfaction of certain defined operational milestones and remeasured at fair value at each reporting period through earnings. During the three and six months ended July 31, 2023 and 2022, the Company did not record any changes to the fair value of the contingent cash consideration. As the fair value is based on unobservable inputs, the liability is included in Level 3 of the fair value measurement hierarchy. As of July 31, 2023 and January 31, 2023, the Company had recorded \$3.5 million of remaining contingent cash consideration which is included in other long term liabilities on the respective condensed consolidated balance sheets.

Accretion expense was immaterial and \$0.1 million for the three and six months ended July 31, 2023, respectively, and \$0.1 million and \$0.2 million for the three and six months ended July 31, 2022, respectively.

8. Goodwill and Intangible Assets, Net

Goodwill

The carrying amount of goodwill was as follows (in thousands):

	Carrying Amount
Balance as of July 31, 2023 and January 31, 2023	\$ 8,145

There was no goodwill impairment for any periods presented.

Intangible Assets

Intangible assets, net consisted of the following (in thousands):

July 31, 2023	Gross Carrying Amount	Accumulated Amortization	Net Book Value	Weighted average remaining amortization period (years)
Developed technology from business combination	\$ 6,200	\$ (3,426)	\$ 2,774	1.3
Developed technology from asset acquisitions ^{(1) (2)}	932	(932)	—	0.0
Total	<u>\$ 7,132</u>	<u>\$ (4,358)</u>	<u>\$ 2,774</u>	

January 31, 2023	Gross Carrying Amount	Accumulated Amortization	Net Book Value	Weighted average remaining amortization period (years)
Developed technology from business combination	\$ 6,200	\$ (2,401)	\$ 3,799	1.8
Developed technology from asset acquisitions ⁽¹⁾	1,359	(1,257)	102	0.3
Total	<u>\$ 7,559</u>	<u>\$ (3,658)</u>	<u>\$ 3,901</u>	

⁽¹⁾ The amounts in the tables above include cumulative foreign currency translation adjustments, reflecting movement in the currencies of the underlying intangibles.

⁽²⁾ During the three months ended July 31, 2023, the Company wrote off \$0.5 million of fully amortized intangible assets as the technology had become obsolete.

Amortization expense was \$0.5 million and \$1.1 million for the three and six months ended July 31, 2023, respectively, and \$0.6 million and \$1.2 million for the three and six months ended July 31, 2022, respectively.

As of July 31, 2023, future amortization expense related to the intangibles assets is expected to be as follows (in thousands):

Fiscal Years

2024	\$ 1,039
2025	1,735
Total future amortization	<u>\$ 2,774</u>

9. Team Member Benefit Plans

The Company contributes to defined contribution plans in a number of countries including a 401(k) savings plan for U.S. based team members and defined contribution arrangements in the United Kingdom, Australia, New Zealand and select other countries based on the legislative and tax requirements of the respective countries. Total contributions to these plans were \$1.0 million and

\$2.7 million for the three and six months ended July 31, 2023, respectively, and \$0.8 million and \$2.0 million for the three and six months ended July 31, 2022, respectively.

10. Equity

In connection with the Company's initial public offering (the "IPO"), on October 18, 2021, the Company filed a restated certificate of incorporation that authorized the issuance of 1,500,000,000 shares of Class A common stock, 250,000,000 shares of Class B common stock, and 50,000,000 shares of preferred stock at \$0.0000025 par value for each class of shares. Common stockholders are entitled to dividends when and if declared by the board of directors. No dividends have been declared to date. The holder of each share of Class A common stock is entitled to one vote and the holder of each share of Class B common stock is entitled to ten votes.

Common Stock

The Company had shares of common stock reserved for future issuance as follows (in thousands):

	<u>July 31, 2023</u>	<u>January 31, 2023</u>
Class A and Class B common stock		
Options issued and outstanding	9,933	12,686
Shares available for issuance under Equity Incentive Plans	25,669	21,483
RSUs and PSUs issued and outstanding	11,376	8,336
Shares reserved for issuance to charitable organizations	1,502	1,636
ESPP	5,567	4,303
Total	<u>54,047</u>	<u>48,444</u>

Early Exercised Options (subject to a repurchase right)

Certain stock option holders have the right to exercise unvested options, subject to a repurchase right held by the Company at the original exercise price, in the event of voluntary or involuntary termination of employment of the holder. As of July 31, 2023 and January 31, 2023, there were 62,712 and 194,304 shares, respectively, of unvested options that had been early exercised and were subject to repurchase for a total liability of \$0.8 million and \$1.8 million, respectively. The liability associated with early exercised options is included in other non-current liabilities in the condensed consolidated balance sheets.

For accounting purposes, issuance of shares will be recognized only on vesting. However, shares issued for the early exercise of options are included in issued and outstanding shares as they are legally issued and outstanding.

Equity Incentive Plans

In 2015, the Company adopted the 2015 Equity Incentive Plan (the "2015 Plan"), in which shares of common stock of the Company are reserved for issuance of stock options to team members, directors, or consultants. The options generally vest 25% upon completion of one year and then ratably over 36 months. Options generally expire ten years from the date of grant. All these options qualify as equity settled awards and contain no performance conditions.

In September 2021, in connection with the IPO, the board of directors and stockholders approved the 2021 Equity Incentive Plan (the "2021 Plan") as a successor to the Company's 2015 Plan (together the "Plans"). The 2021 Plan authorizes the award of both stock options, which are intended to qualify for tax treatment under Section 422 of the Internal Revenue Code, and nonqualified stock options, as well for the award of restricted stock awards ("RSAs"), stock appreciation rights ("SARs"), restricted stock units ("RSUs"), performance stock units ("PSUs") and stock bonus awards. Pursuant to the 2021 Plan, incentive stock options may be granted only to the Company's team members. The Company may grant

all other types of awards to its team members, directors, and consultants. The Company initially reserved 13,032,289 shares of its Class A common stock, plus any reserved shares of Class B common stock not issued or subject to outstanding grants under the 2015 Plan on the effective date of the 2021 Plan, for issuance as Class A common stock pursuant to awards granted under the 2021 Plan. The number of shares reserved for issuance under the 2021 Plan increases automatically on February 1 of each of the years from 2022 through 2031.

The awards available for grant under the above Plans for the periods presented were as follows (in thousands):

	July 31, 2023	January 31, 2023
Available at beginning of period	21,483	18,248
Awards authorized	7,557	7,673
RSUs and PSUs granted	(4,843)	(6,651)
RSUs and PSUs canceled and forfeited	766	657
Options canceled and forfeited	691	1,496
Options repurchased	15	60
Available at end of period	25,669	21,483

In the event that shares previously issued under the above Plans are reacquired by the Company, such shares shall be added to the number of shares then available for issuance under the 2021 Plan. In the event that an outstanding stock option for any reason expires or is canceled, the shares allocable to the unexercised portion of such stock option will be added to the number of shares then available for issuance under the 2021 Plan.

Both Plans allow the grantees to early exercise stock options.

Stock Options, RSUs and PSUs

The following table summarizes options activity under the Plans, and related information:

	Number of Stock Options Outstanding (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Years	Aggregate Intrinsic value (in millions)
Balances at January 31, 2023	12,686	\$ 12.30	7.00	\$ 470.8
Options granted	—	—		
Options exercised	(2,062)	8.74		
Options canceled	(198)	9.76		
Options forfeited	(493)	16.96		
Balances at July 31, 2023	9,933	\$ 12.80	6.56	\$ 372.3
Options vested at July 31, 2023	6,528	\$ 10.66	6.17	\$ 254.4
Options vested and expected to vest at July 31, 2023	9,933	\$ 12.80	6.56	\$ 372.3

No options were granted during each of the three months ended July 31, 2023 and 2022. The aggregate intrinsic value of options exercised during the three months ended July 31, 2023 and 2022 was \$33.3 million and \$25.8 million, respectively. The aggregate intrinsic value represents the difference between the exercise price and the fair value of the underlying common stock on the date of exercise.

No options were granted during each of the six months ended July 31, 2023 and 2022. The aggregate intrinsic value of options exercised during the six months ended July 31, 2023 and 2022 was \$65.9 million and \$59.8 million, respectively. The aggregate intrinsic value represents the difference between the exercise price and the fair value of the underlying common stock on the date of exercise.

As of July 31, 2023 and January 31, 2023, approximately \$32.0 million and \$46.2 million, respectively, of total unrecognized compensation cost was related to stock options granted, that is expected to be recognized over a weighted-average period of 1.8 and 2.1 years, respectively. The expected stock compensation expense remaining to be recognized reflects only outstanding stock awards as of the periods presented, and assumes no forfeitures.

The following table summarizes the Company's RSU activity (in thousands):

	Number of Shares ⁽¹⁾	Weighted- Average grant date fair value
Balances at January 31, 2023	5,018	\$ 53.33
Granted	4,843	39.91
Vested	(1,037)	49.97
Canceled/forfeited	(677)	52.08
Balances at July 31, 2023	8,147	\$ 45.90

⁽¹⁾ The table above does not include 3 million RSUs issued to the Company's founder and the Chief Executive Officer ("CEO") described below.

These RSUs are grants of shares of the Company's common stock, the vesting of which is based on the requisite service requirement. Generally, the Company's RSUs are subject to forfeiture and are expected to vest over two to four years ratably on a combination of bi-annual and quarterly basis.

As of July 31, 2023 and January 31, 2023, approximately \$362.0 million and \$254.8 million, respectively, of total unrecognized compensation cost was related to RSUs granted to team members other than the CEO, that is expected to be recognized over a weighted-average period of 3.3 and 3.2 years, respectively. The expected stock compensation expense remaining to be recognized reflects only outstanding stock awards as of the periods presented, and assumes no forfeitures.

In June 2022, the Company granted 0.4 million PSUs to senior members of its management team subject to revenue performance condition and service conditions. The number of awards granted represents 100% of the target goal; under the terms of the awards, the recipient may earn between 0% and 200% of the original grant. The performance condition is set to be achieved in fiscal 2025 and the service condition in the calendar year 2025. As a result of forfeitures triggered by the departure of a key executive during the three and six months ended July 31, 2023, the Company reversed stock-based compensation previously recorded for that key executive. The Company recorded a \$0.1 million gain and \$0.3 million of stock-based compensation expense related to PSUs during the three and six months ended July 31, 2023, respectively. As of July 31, 2023, unrecognized stock-based compensation expense related to these PSUs was \$6.3 million to be recognized over a period of 2.4 years.

CEO Performance Award

In May 2021, the Company granted 3 million RSUs tied to its Class B common stock to Sytse Sijbrandij, the Company's co-founder and CEO, with an estimated aggregate grant date fair value of \$8.8 million. During the three and six months ended July 31, 2023, the Company recorded \$0.4 million and \$0.8 million of stock-based compensation expense related to the CEO RSUs, respectively. During the three and six months ended July 31, 2022, the Company recorded \$0.4 million and \$0.8 million of stock-based compensation expense related to the CEO RSUs, respectively.

As measured from the grant date, the derived service period of the respective tranches ranges from 2 to 7 years. As of July 31, 2023, unrecognized stock-based compensation expense related to these RSUs was \$5.1 million which will be recognized over 5.3 years.

2021 Employee Stock Purchase Plan (“ESPP”)

In September 2021, the Company's board of directors and its stockholders approved the ESPP and participation of eligible team members.

During the quarter ended July 31, 2023, the Company's stock price on the purchase date, May 31, 2023, was lower than the Company's stock price on the previously applicable offering date. As a result, the offering in effect was reset with the lower stock price becoming the new offering price and rolled over to a new 24-month offering period. The reset was treated as a modification resulting in incremental expense totaling \$9.4 million, which is being recognized over the remaining requisite service period as of the date of reset.

During the quarter ended July 31, 2022, the Company's stock price on the purchase date, May 31, 2022, was lower than the Company's stock price on the previously applicable offering date. As a result, the offering in effect was reset with the lower stock price becoming the new offering price and rolled over to a new 24-month offering period. The reset was treated as a modification resulting in incremental expense totaling \$9.9 million, which is being recognized over the remaining requisite service period as of the date of reset.

The following table summarizes assumptions used in estimating the fair value of the ESPP for the offering period in effect using the Black-Scholes option-pricing model:

	Six Months Ended July 31,	
	2023	2022
Risk-free interest rate	4.22% - 5.30%	1.62% - 2.63%
Volatility	40.95% - 51.00%	44.95% - 52.76%
Expected term (in years)	0.50 - 2.00	0.50 - 2.00
Dividend yield	—%	—%

The Company recorded \$6.7 million and \$11.2 million of stock-based compensation expense related to the ESPP during the three and six months ended July 31, 2023, respectively. The Company recorded \$9.7 million and \$14.1 million of stock-based compensation expense related to the ESPP during the three and six months ended July 31, 2022, respectively. As of July 31, 2023, approximately \$19.8 million of total unrecognized compensation cost was related to the ESPP that is expected to be recognized over 1.8 years.

Stock-Based Compensation Expense

The Company recognized stock-based compensation expense as follows (in thousands):

	Three Months Ended July 31,		Six Months Ended July 31,	
	2023	2022	2023	2022
Cost of revenue	\$ 1,698	\$ 1,585	\$ 3,112	\$ 2,375
Research and development	12,477	11,339	24,179	16,375
Sales and marketing	21,295	14,851	35,059	21,902
General and administrative	10,898	9,972	16,348	14,566
Total stock-based compensation expense ⁽¹⁾	\$ 46,368	\$ 37,747	\$ 78,698	\$ 55,218

⁽¹⁾ The table above includes stock-based compensation of JiHu. Refer to “Note 12. Joint Venture and Equity Method Investment” for further discussion.

The corporate income tax benefit recognized in the condensed consolidated statements of operations for stock-based compensation expense was \$3.6 million and \$6.4 million for the three and six months ended July 31, 2023, respectively. The corporate income tax benefit recognized in the condensed consolidated statements of operations for stock-based compensation expense was \$2.2 million and \$3.1 million for the three and six months ended July 31, 2022, respectively.

Charitable Donation of Common Stock

In September 2021, the Company’s board of directors approved the reservation of up to 1,635,545 shares of Class A common stock for issuance to charitable organizations. In March 2023, the Company’s board of directors approved the donation of \$10.7 million aggregate principal amount of shares of Class A common stock to GitLab Foundation (the “Foundation”), a California nonprofit public benefit corporation. The Foundation is also a related party as certain of the Company’s officers serve as directors of the Foundation. This donation shall occur in equal quarterly distributions throughout fiscal 2024.

During the three and six months ended July 31, 2023, the Company donated 52,647 shares and 133,389 shares of Class A common stock at fair value to the Foundation, respectively. The fair value of the common stock was determined based on the quoted market price on the grant date. The donation expense of \$2.7 million and \$5.3 million was recorded in general and administrative expense in the condensed consolidated statements of operations for the three and six months ended July 31, 2023, respectively.

11. Restructuring and Other Related Charges

During the three months ended April 30, 2023, the Company reduced its total global headcount by approximately 7%.

As a result, the Company recognized total restructuring charges of approximately \$9.1 million in the six months ended July 31, 2023, which consisted primarily of one-time severance and other termination benefit costs of \$7.8 million, as well as accelerated stock-based compensation of \$1.3 million.

The Company recognized one-time severance and other termination benefit costs as follows (in thousands):

	Three Months Ended July 31, 2023	Six Months Ended July 31, 2023
Cost of revenue	\$ 46	\$ 463
Research and development	(12)	2,047
Sales and marketing	118	3,677
General and administrative	20	1,638
Total ⁽¹⁾	<u>\$ 172</u>	<u>\$ 7,825</u>

⁽¹⁾ Excludes stock-based compensation of \$1.3 million.

The changes in liabilities resulting from the restructuring charges and related accruals were as follows (in thousands):

Balance as of January 31, 2023	\$ —
Charges ⁽¹⁾	7,825
Cash payments	(7,670)
Balance as of July 31, 2023 ⁽²⁾	<u>\$ 155</u>

⁽¹⁾ Excludes stock-based compensation of \$1.3 million.

⁽²⁾ \$0.2 million is included in accrued compensation and benefits on the condensed consolidated balance sheet as of July 31, 2023.

12. Joint Venture and Equity Method Investment

Joint Venture

In February 2021, the Company along with Sequoia CBC Junyuan (Hubei) Equity Investment Partnership (Limited Partnership) and Suzhou Gaocheng Xinjian Equity Investment Fund Partnership (Limited Partnership) executed an investment agreement (the "Investment Agreement") to establish GitLab Information Technology (Hubei) Co., LTD ("JiHu"), a legal entity in the People's Republic of China. The Company accounted for JiHu as a variable interest entity and consolidated the entity in accordance with ASC Topic 810, *Consolidation*.

During fiscal year 2023, JiHu closed its Series A-1 through A-3 rounds of common stock financings where investors contributed a total of \$54.6 million, net of issuance costs. In March 2022, one of the potential investors who could not participate in the Series A-1 financing round provided a \$2.9 million loan to JiHu as an advance pending a capital contribution. The loan was repayable within ten business days of receipt of capital contribution from the investor. JiHu received an equity contribution from this investor during the Series A-2 round and repaid the loan in full in July 2022.

Subsequent to the closing of the financing rounds during fiscal year 2023, the Company retained control over JiHu with its equity stake reduced from 72% to 55%. As of July 31, 2023, the Company still retains control over JiHu with its equity stake at approximately 55%.

In April 2022, the board of directors of JiHu approved an employee stock option plan ("JiHu ESOP") for its employees. As a result of forfeitures triggered by the departure of certain executives during the three and six months ended July 31, 2023, the Company reversed stock-based compensation previously recorded for such executives. The Company recorded a \$0.2 million and \$2.7 million gain for the three

and six months ended July 31, 2023, respectively. For the three and six months ended July 31, 2022, the Company recorded \$2.8 million and \$3.0 million of stock-based compensation expense, respectively.

As of July 31, 2023, approximately \$4.3 million of total unrecognized compensation cost was related to the JiHu ESOP that is expected to be recognized over 2.7 years. The Company considers the RSAs and stock option awards granted pursuant to the JiHu ESOP as potentially dilutive equity instruments that will result in dilution of the Company's stake in JiHu upon vesting of such award (or, in the case of option awards granted pursuant to the JiHu ESOP, upon vesting and subsequent exercise into shares of JiHu common stock). Any such dilution will be accounted for as an equity transaction. Until such awards granted pursuant to the JiHu ESOP are vested (or, in the case of option awards, vested and ultimately exercised into shares of JiHu common stock), the Company will continue to record the recognized stock-compensation expense of JiHu as part of the noncontrolling interest.

Operating Leases

The Company recognized \$0.1 million and \$0.3 million of operating lease expense during the three and six months ended July 31, 2023, respectively, and \$0.2 million and \$0.3 million of operating lease expense during the three and six months ended July 31, 2022, respectively. JiHu has non-cancelable operating leases maturing over the next two years with total lease payments of \$0.7 million and total present value of lease liabilities of \$0.7 million. Lease expense for the one short-term lease was immaterial during each of the three and six months ended July 31, 2023 and 2022.

The table below presents supplemental information related to operating leases for the six months ended July 31, 2023 (in thousands, except weighted-average information):

Weighted-average remaining lease term (in years)		1.06
Weighted-average discount rate		3.7 %
Cash paid for amounts included in the measurement of lease liabilities	\$	316

Selected Financial Information

Selected financial information of JiHu, post intercompany eliminations, is as follows (in thousands):

	Three Months Ended July 31,		Six Months Ended July 31,	
	2023	2022	2023	2022

Total assets	\$ 52,465	\$ 62,827
Total liabilities	\$ 7,277	\$ 8,871

Equity Method Investment

In April 2021, the Company reorganized Meltano Inc. ("Meltano"), which started as an internal project within the Company in July 2018, into a separate legal entity. The entity was funded by the Company's contribution of intellectual property with the fair value of approximately \$0.4 million and a preferred stock financing from third parties of \$4.2 million, representing 12% ownership on a fully diluted basis.

On April 4, 2022, Meltano closed its Series Seed-2 round of preferred stock financing and raised \$7.2 million. Pursuant to this transaction, the board composition of Meltano changed and the Company no longer has the power to appoint the majority of the board of directors of Meltano. Consequently, despite having majority voting rights at the stockholder level, the Company no longer has control over Meltano.

The loss of control of a majority owned subsidiary resulted in the deconsolidation of net assets of \$9.4 million and non-controlling interest of Meltano of \$11.3 million, recognition of retained interest at fair

value of \$15.9 million, and a gain of \$17.8 million recorded in other income (expense), net in April 2022. The fair value of retained interest was determined using the Option Pricing Model (“OPM”) Backsolve approach based on the most recent funding round of preferred stock. As of the date of the loss of control, the basis difference between the fair value of investment in Meltano and the Company’s share in the net assets of Meltano was attributed to equity method goodwill.

Effective April 4, 2022, the Company accounts for this investment under the equity method and has recorded \$10.6 million in “equity method investment” on its condensed consolidated balance sheet as of July 31, 2023. During the three and six months ended July 31, 2023, the Company recognized a loss from equity method investment of \$0.9 million and \$1.7 million, net of tax on the condensed consolidated statements of operations, respectively. During the three and six months ended July 31, 2022, the Company recognized a loss from equity method investment of \$0.8 million and \$1.0 million, net of tax on the condensed consolidated statements of operations, respectively.

As of July 31, 2023, the Company owns 93% of the common stock in Meltano. As of July 31, 2023, Meltano has 3.3 million employee stock options and 3.1 million shares of preferred stock outstanding that are potentially dilutive equity instruments and will result in dilution to 46% in the Company’s stake in Meltano once all these instruments get converted into common stock of Meltano.

13. Income Taxes

For the three and six months ended July 31, 2023, the Company recorded income tax expense of \$4.0 million and \$5.5 million on pretax loss of \$46.3 million and \$96.9 million, respectively. The income tax expense for the three and six months ended July 31, 2023 was primarily related to an increase in tax expense for unrecognized tax benefits and the Company’s foreign and domestic operations as compared to the same periods last year.

For the three and six months ended July 31, 2022, the Company recorded income tax benefit of \$0.1 million and income tax expense of \$2.5 million on pretax loss of \$60.7 million and \$84.6 million, respectively. The income tax benefit for the three months ended July 31, 2022 was primarily related to an increase in domestic losses from operations as compared to the same period last year. The income tax expense for the six months ended July 31, 2022 related primarily to the Company’s foreign and domestic operations and the establishment of a deferred tax liability relating to the deconsolidation of a majority-owned entity, Meltano, and simultaneous establishment of the Company’s equity method investment.

The Company’s provision for income taxes is based on its worldwide estimated annualized effective tax rate, except for jurisdictions for which a loss is expected for the year and no benefit can be realized for those losses, jurisdictions for which forecasted pre-tax income or loss cannot be estimated, and the tax effect of discrete items occurring during the period. The tax provision for jurisdictions for which a forecast cannot be estimated is based on actual taxes and tax reserves for the quarter.

Under the provisions of ASC 740, *Income Taxes*, the determination of the Company’s ability to recognize its deferred tax asset requires an assessment of both negative and positive evidence when determining the Company’s ability to recognize its deferred tax assets. The Company determined that it was not more likely than not that the Company could recognize certain deferred tax assets. The evidence evaluated by the Company included operating results during the most recent three-year period and future projections, with more weight given to historical results than expectations of future profitability, which are inherently uncertain. Certain entities’ net losses in recent periods represented sufficient negative evidence to require a valuation allowance against its net deferred tax assets. This valuation allowance will be evaluated periodically and could be reversed partially or totally if business results have sufficiently improved to support realization of deferred tax assets.

As of July 31, 2023, unrecognized tax benefits approximated \$8.1 million, of which \$2.6 million would affect the Company’s effective tax rate if recognized. As of January 31, 2023, unrecognized tax benefits approximated \$7.5 million, of which \$0.5 million would affect the Company’s effective tax rate if

recognized. The Company anticipates an immaterial amount of unrecognized tax benefits to reverse in the next 12 months.

It is the Company's policy to classify accrued interest and penalties related to unrecognized tax benefits in the provision for income taxes. Accrued interest and penalties were \$0.2 million as of July 31, 2023 and \$0.2 million as of January 31, 2023, respectively.

At July 31, 2023, the Company's U.S. federal 2019 through 2022 tax years were open and subject to potential examination in one or more jurisdictions. In addition, in the United States, any net operating losses or credits that were generated in prior years but not yet fully utilized in a year that is closed under the statute of limitations may also be subject to examination. The Company is currently under examination in the Netherlands for tax years 2015 and 2016. The Company is currently unable to estimate the financial outcome of this examination due to its preliminary status. The Company regularly assesses the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of its provision for income taxes. The Company continues to monitor the progress of ongoing discussions with tax authorities and the effect, if any, of the expected expiration of the statute of limitations in various taxing jurisdictions.

14. Net Loss per Share

The following table sets forth basic and diluted loss per share for each of the periods presented (in thousands, except per share data):

	Three Months Ended July 31,		Six Months Ended July 31,	
	2023	2022	2023	2022
Numerator:				
Net loss attributable to GitLab	\$ (50,080)	\$ (59,024)	\$ (102,549)	\$ (85,123)
Denominator:				
Weighted-average shares used to compute net loss per share attributable to GitLab Class A and Class B common stockholders, basic and diluted	153,644	147,797	152,683	147,248
Net loss per share attributable to GitLab Class A and Class B common stockholders, basic and diluted	<u>\$ (0.33)</u>	<u>\$ (0.40)</u>	<u>\$ (0.67)</u>	<u>\$ (0.58)</u>

Since the Company was in a loss position for all periods presented, basic net loss per share is the same as diluted net loss per share for all periods as the inclusion of all potential common shares

outstanding would have been anti-dilutive. Potentially dilutive securities that were not included in the diluted per share calculations because they would be anti-dilutive were as follows (in thousands):

	As of	
	July 31, 2023	January 31, 2023
Shares subject to outstanding common stock options	9,933	12,686
Unvested restricted stock in connection with business combination	3	8
Unvested early exercised stock options	63	194
Unvested RSUs and PSUs	11,465	8,336
Shares subject to the ESPP	71	81
Total	21,535	21,305

15. Commitments and Contingencies

Contractual Obligations and Commitments

The Company's purchase obligations of \$169.4 million as of July 31, 2023, represent third-party non-cancelable hosting infrastructure agreements, subscription arrangements and other commitments used in the ordinary course of business to meet operational requirements.

Loss Contingencies

In accordance with ASC 450, *Loss Contingencies*, the Company accrues for contingencies when losses become probable and reasonably estimable. Accordingly, the Company has recorded an estimated liability related to certain labor matters regarding its use of contractors in certain foreign countries. As of July 31, 2023 and January 31, 2023, the estimated liability relating to these matters was \$2.6 million and \$2.5 million recorded in other non-current liabilities on the condensed consolidated balance sheets, respectively.

Warranties and Indemnifications

The Company enters into service level agreements with customers which warrant defined levels of uptime and support response times and permit those customers to receive credits for prepaid amounts in the event that those performance and response levels are not met. To date, the Company has not experienced any significant failures to meet defined levels of performance and response. In connection with the service level agreements, the Company has not incurred any significant costs and has not accrued any liabilities in the condensed consolidated financial statements.

In the ordinary course of business, the Company enters into contractual arrangements under which the Company agrees to provide indemnification of varying scope and terms to business partners and other parties with respect to certain matters, including, but not limited to, losses arising out of the breach of such agreements, intellectual property infringement claims made by third parties, and other liabilities relating to or arising from the Company's platform or the Company's acts or omissions. In these circumstances, payment may be conditional on the other party making a claim pursuant to the procedures specified in the particular contract. Further, the Company's obligations under these agreements may be limited in terms of time and/or amount, and in some instances, the Company may have recourse against third parties for certain payments.

In addition, the Company has agreed to indemnify its directors and executive officers for costs associated with any fees, expenses, judgments, fines, and settlement amounts incurred by any of these persons in any action or proceeding to which any of those persons is, or is threatened to be, made a party by reason of the person's service as a director or officer, including any action by the Company, arising out

of that person's services as the Company's director or officer or that person's services provided to any other company or enterprise at the Company's request. The Company maintains director and officer insurance coverage that may enable the Company to recover a portion of any future amounts paid.

Legal Proceedings

The Company is, and from time to time, may become involved in legal proceedings or be subject to claims arising in the ordinary course of its business. The Company is not presently a party to any legal proceedings that in the opinion of management, if determined adversely to the Company, would individually or taken together have a material adverse effect on its business, financial condition or operating results.

Defending such proceedings is costly and can impose a significant burden on management and team members. The results of any current or future litigation cannot be predicted with certainty, and regardless of the outcome, litigation can have an adverse impact on the Company because of defense and settlement costs, diversion of management resources and other factors.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our unaudited condensed consolidated financial statements and the related notes included elsewhere in this Quarterly Report on Form 10-Q. You should review the section titled "Special Note Regarding Forward-Looking Statements" above in this Quarterly Report on Form 10-Q for a discussion of forward-looking statements and important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained in the following discussion and analysis. Factors that could cause or contribute to such differences include, but are not limited to, those identified below, and those discussed in the section titled "Risk Factors" in this Quarterly Report on Form 10-Q. Our historical results are not necessarily indicative of the results that may be expected for any period in the future.

Overview

In today's world, software defines the speed of innovation. Every industry, business, and function within a company is dependent on software. To remain competitive and survive, nearly all companies must digitally transform and become experts at building, delivering, and securing software.

To meet these market needs, GitLab pioneered The DevSecOps Platform, a fundamentally new approach to software development and delivery. Our platform is uniquely built as a single application and interface with a unified data model, enabling all stakeholders in the software delivery lifecycle – from development teams to operations teams to security teams – to work together in a single tool with a single workflow. With GitLab, they can build better, more secure software faster.

GitLab is the solution to significant business transformation needs. Across every industry – and across companies of every size – technology leaders want to make developers more productive so they can deliver better products faster; they want to measure productivity, so they can increase operational efficiency; they want to secure the software supply chain, so they can reduce security and compliance risk; and, they want to accelerate cloud migration, so they can unlock digital transformation results. These technology leaders need a platform that enables a value stream-driven mindset – a mindset that shortens the time from idea to customer value – and establishes a powerful flywheel for data collection and aggregation. And they are looking for a platform approach that unifies the entire development experience, so that customers can be faster than their competition in moving from idea to customer value.

GitLab is designed to consolidate point solutions to cut costs and boost efficiency, and provides end-to-end visibility across the entire software development lifecycle, from planning to production to security.

We believe GitLab is the shortest path to unlocking business and technology transformation results. Our DevSecOps Platform accelerates our customers' ability to create business value and innovate by reducing their software development cycle times from weeks to minutes. It removes the need for point tools and delivers enhanced operational efficiency by eliminating manual work, increasing productivity, and creating a culture of innovation and velocity. The DevSecOps Platform also embeds security earlier into the development process, improving our customers' software security, quality, and overall compliance.

GitLab is available to any team, regardless of the size, scope, and complexity of their deployment. As a result, we have more than 30 million registered users and more than 50% of the Fortune 100 companies are GitLab customers. For purposes of determining the number of our active customers, we look at our customers with more than \$5,000 of Annual Recurring Revenue, or ARR, in a given period, who we refer to as our Base Customers. For purposes of determining our Base Customers, a single organization with separate subsidiaries, segments, or divisions that use The DevSecOps Platform is considered a single customer for determining each organization's ARR.

GitLab is the only DevSecOps platform built on an open-core business model. We enable any customer and contributor to add functionality to our platform. In calendar 2022, nearly 800 people contributed more than 3,000 merge requests back to the core product, extending GitLab's in-house R&D efforts and empowering our most passionate users to make improvements to the DevOps tool they use every day. Our open-core approach has enabled us to build trust with our customers, and to maintain our high velocity of innovation so that we can rapidly create the most comprehensive DevSecOps platform.

GitLab exists today in large part thanks to the vast and growing community of open source contributors around the world. We actively work to grow open source community engagement by operating with transparency. We make our strategy, direction, and product roadmap available to the wider community, where we encourage and solicit their feedback. By making non-sensitive information public, we create a deeper level of trust with our customers and we make it easier to solicit contributions and collaboration from our users and customers. See the section entitled "Key Business Metrics—Dollar-Based Net Retention Rate and ARR" below for additional information about how we define ARR.

We make our plans available through our self-managed and software-as-a-service, or SaaS offering. For our self-managed offering, the customer installs GitLab in their own on-premise or hybrid cloud environment. For our SaaS offering, the platform is managed by GitLab and hosted either in our public cloud or in our private cloud based on the customer's preference.

Factors Affecting Our Performance

Sustaining innovation and technology leadership

We believe we have built a highly differentiated platform that gives us an advantage over our competitors by empowering business, development, security, operations, and IT teams to collaborate in a single application across the entire DevSecOps lifecycle. Our technology leadership is an outcome of various factors, including our strong community, network of contributors, and continued enhancement of The DevSecOps Platform by developing new features and expanding the functionality of existing features with speed and consistency. We have had a history of releasing enhancements to The DevSecOps Platform on the 22nd of every month and, as of July 31, 2023, had done so for the last 142 months. We intend to continue releasing new software at a monthly cadence.

We also intend to continue investing in research and development to further enhance The DevSecOps Platform and sustain our innovation and technology leadership. We have a history of investing in our open source community and intend to continue to leverage our open core software to accelerate innovation. We also intend to continue to add headcount to our research and development team and support functions to extend the functionality and range of The DevSecOps Platform by bringing new and improved products and services to our customers.

We expect our research and development expenses to increase on an absolute basis in future periods. We foresee that such investment in research and development will contribute to our long-term growth, but will also negatively impact our short-term profitability. As engaged members of the GitLab open-source community, our contributors often serve as subject matter experts at market-leading developer events and The DevSecOps Platform is presented on the cutting edge of innovation. We intend to continue to invest in building out this community to foster more contributions and collaboration in the space. Our open source community, in turn, accelerates our ability to innovate and provide a better platform to our customers. We intend to expend additional resources in the future to continue enhancing The DevSecOps Platform and introducing new products, features and functionality.

Acquiring New Customers

Our future growth depends in large part on our ability to acquire new customers. This, in turn, relies on our ability to reach teams and organizations through our marketing and sales efforts. To this end, we are making significant investments in our sales and marketing efforts to expand our reach and differentiate The DevSecOps Platform from competitive products and services. We believe that eventually

the vast majority of organizations will switch to a DevSecOps platform and embrace a single application approach, creating a substantial opportunity to continue to grow our customer base. As a result, our Base Customers increased to 7,815 as of July 31, 2023 from 5,864 as of July 31, 2022, an increase of 33%, our \$100,000 ARR customers increased to 810 as of July 31, 2023 from 593 as of July 31, 2022, an increase of 37%. See the section entitled “—Key Business Metrics—Dollar-Based Net Retention Rate and ARR” below for information about how we define ARR.

Our operating results and growth prospects will depend in part on our ability to attract new customers. While we believe we have a significant market opportunity that The DevSecOps Platform addresses, we will need to continue to invest in sales and marketing, research and development, and customer support to further grow our customer base, both in the United States and internationally. We believe that our estimated 30 million registered users, which includes users of our free tier offering, provides a base of potential new customers. We intend to continue to add headcount to our global sales and marketing team to acquire new customers and to increase sales to existing customers. While we cannot predict customer adoption rates and demand, the future growth rate and size of the market for DevOps platforms, or the introduction of competitive products and services, our business and operating results will be significantly affected by the degree and speed with which organizations adopt The DevSecOps Platform.

Retaining and Expanding Our Existing Customers

We employ a “land and expand” business strategy that focuses on efficiently acquiring new customers and growing our relationships with existing customers over time. We believe that as our customers realize the benefits of a single application approach, they will increase the use of The DevSecOps Platform, enhancing our ability to expand revenue generation within our existing customers over time. As a result of our approach, as of July 31, 2023 and 2022, our Dollar-Based Net Retention Rate was 124% and over 130%, respectively. See the section entitled “—Key Business Metrics—Dollar-Based Net Retention Rate and ARR” below for information about how we define Dollar-Based Net Retention Rate.

We plan to continue investing in sales and marketing, with a focus on expanding usage of our platform with our existing customers. We believe that this expansion will provide us with substantial operating leverage because the costs to expand sales within existing customers are significantly less than the costs to acquire new customers. Our future revenue growth and our ability to achieve and maintain profitability is dependent upon our ability to continue landing new customers, expanding the adoption of The DevSecOps Platform by additional users within their organizations, and upgrading customers to higher-priced tiers. Ultimately, our ability to increase sales to existing customers will depend on several factors, including our customers’ satisfaction with The DevSecOps Platform, our pricing, competition, and overall changes in our customers’ spending levels.

Partnerships, Alliances, Channels, and Integrations

We believe that our further growth depends in part on our ability to build and maintain successful partnerships, alliances, channels and integrations. We are continuously investing in developing a strong ecosystem and partner network, comprised of cloud and technology partners, resellers, and system integrators, as a way to expand our go-to-market strategy. We plan to continue investing in and developing these relationships to broaden our distribution footprint and drive greater awareness of our brand and The DevSecOps Platform. We believe that these partnerships will extend our sales reach and provide product and technology integrations that will accelerate implementation of The DevSecOps Platform in the United States and internationally, although investing in these relationships can be time consuming and costly. While expending resources in developing these partnerships and alliances may adversely impact our short-term profitability, we believe these investments will lead to longer term growth for the business as a whole.

Continuing to Scale our Business

We plan to continue investing in our business so that we can capitalize on our market opportunity. We believe that these investments will contribute to our long-term growth, although they may adversely affect our operating results in the near term. Furthermore, we expect our general and administrative expenses to increase in absolute amount for the foreseeable future given the additional expenses for accounting, compliance, and investor relations as a public company. While we expect these investments will contribute to our long-term growth, they may adversely affect our profitability in the near term, until such time as we are able to sufficiently grow our number of customers and increase the value of ARR with existing customers. We plan to balance these investments in future growth with a continued focus on managing our operating results.

Key Business Metrics

We monitor the following key metrics to help us evaluate our business, identify trends affecting our business, formulate business plans, and make strategic decisions.

Dollar-Based Net Retention Rate and ARR

We believe that our ability to retain and expand our revenue generated from our existing customers is an indicator of the long-term value of our customer relationships and our potential future business opportunities. Dollar-Based Net Retention Rate measures the percentage change in our ARR derived from our customer base at a point in time. Our calculation of ARR and by extension Dollar-Based Net Retention Rate, includes both self-managed and SaaS subscription revenue. We report Dollar-Based Net Retention Rate on a threshold basis of 130% each quarter or the actual number if below 130%.

We calculate ARR by taking the monthly recurring revenue, or MRR, and multiplying it by 12. MRR for each month is calculated by aggregating, for all customers during that month, monthly revenue from committed contractual amounts of subscriptions, including our self-managed and SaaS offerings but excluding professional services. We calculate Dollar-Based Net Retention Rate as of a period end by starting with our customers as of the 12 months prior to such period end, or the Prior Period ARR. We then calculate the ARR from these customers as of the current period end, or the Current Period ARR. The calculation of Current Period ARR includes any upsells, price adjustments, user growth within a customer, contraction, and attrition. We then divide the total Current Period ARR by the total Prior Period ARR to arrive at the Dollar-Based Net Retention Rate.

	As of July 31,	
	2023	2022
Dollar-Based Net Retention Rate	124 %	>130%

Customers with ARR of \$100,000 or More

We believe that our ability to increase the number of \$100,000 ARR customers is an indicator of our market penetration and strategic demand for The DevSecOps Platform. A single organization with separate subsidiaries, segments, or divisions that use The DevSecOps Platform is considered a single customer for determining each organization's ARR. We do not count our reseller or distributor channel partners as customers. In cases where customers subscribe to The DevSecOps Platform through our channel partners, each end customer is counted separately.

	As of July 31,	
	2023	2022
\$100,000 ARR customers	810	593

Components of Our Results of Operations

Revenue

Subscription - self-managed and SaaS

Subscription - self-managed

Our self-managed subscriptions include support, maintenance, upgrades, and updates on a when-and-if-available basis. Revenue for self-managed subscriptions is recognized ratably over the contract period based on the stand-ready nature of subscription elements.

SaaS

Our SaaS subscriptions provide access to our latest managed version of our product hosted in a public or private cloud based on the customer's preference. Revenue from our SaaS offerings is recognized ratably over the contract period when the performance obligation is satisfied.

The typical term of a subscription contract for self-managed or SaaS offering is one to three years.

License - self-managed and other

The license component of our self-managed subscriptions reflects the revenue recognized by providing customers with access to proprietary software features. License revenue is recognized up-front when the software license is made available to our customer.

Other revenue consists of professional services revenue which is derived from fixed fee and time and materials offerings, subject to customer acceptance. Given the Company's limited history of providing professional services, uncertainty exists about customer acceptance and therefore, control is presumed to transfer upon confirmation from the customer, as defined in each professional services contract. Accordingly, revenue is recognized upon satisfaction of all requirements per the applicable contract. Revenue from professional services provided on a time and material basis is recognized over the periods services are delivered. Revenue from professional services accounted for 2% of our total revenue for each of the three and six months ended July 31, 2023. Revenue from professional services accounted for 2% of our total revenue for each of the three and six months ended July 31, 2022.

Cost of Revenue

Subscription - self-managed and SaaS

Cost of revenue for self-managed and SaaS subscriptions consists primarily of allocated cloud-hosting costs paid to third-party service providers, personnel-related costs associated with our customer support personnel, including contractors, and allocated overhead. Personnel-related expenses consist of salaries, benefits, bonuses, and stock-based compensation. We expect our cost of revenue for self-managed and SaaS subscriptions to increase in absolute dollars as our self-managed and SaaS subscription revenue increases. As our SaaS offering makes up an increasing percentage of our total revenue, we expect to see increased associated cloud-related costs, such as hosting and managing costs, which may adversely impact our gross margins.

License - self-managed and other

Cost of self-managed license and other revenue consists primarily of contractor and personnel-related costs, including stock-based compensation expenses, associated with the professional services team and customer support team, and allocated overhead. We expect our cost of revenue for self-managed license and other to increase in absolute dollars as our self-managed and other revenue increases.

Operating Expenses

Our operating expenses consist of sales and marketing, research and development, and general and administrative expenses. Personnel-related expenses are the most significant component of operating expenses and consist of salaries, benefits, bonuses, stock-based compensation, and sales commissions. Operating expenses also include IT overhead costs.

Sales and Marketing

Sales and marketing expenses consist primarily of personnel-related expenses associated with our sales and marketing personnel, advertising, travel and entertainment related expenses, branding and marketing events, promotions, software subscriptions, and our allocated hosting expenses for our free tier. Sales and marketing expenses also include sales commissions paid to our sales force. Such costs incurred on acquisition of an initial contract are capitalized and amortized over an estimated period of benefit of three years, and any such expenses paid for the renewal of a subscription are capitalized and amortized over the contractual term of the renewal. However, prorated costs for commissions that are incremental to obtain a self-managed license contract are expensed immediately.

We expect sales and marketing expenses to increase in absolute dollars as we continue to make strategic investments in our sales and marketing organization to drive additional revenue, further penetrate the market, and expand our global customer base, but to decrease as a percentage of our total revenue over time, although our sales and marketing expenses may fluctuate as a percentage of our total revenue from period-to-period depending on the timing of these expenses.

Research and Development

Research and development expenses consist primarily of personnel-related expenses, including contractors, as well as third-party cloud infrastructure expenses to support our internal development efforts, allocated overhead associated with developing new features or enhancing existing features, and software and subscription services. Costs related to research and development are expensed as incurred.

We expect research and development expenses to increase in absolute dollars as we continue to increase investments in our existing products and services. However, we anticipate research and development expenses to decrease as a percentage of our total revenue over time, although our research and development expenses may fluctuate as a percentage of our total revenue from period-to-period depending on the timing of these expenses.

General and Administrative

General and administrative expenses consist primarily of personnel-related expenses for our executives, finance, legal, and human resources. General and administrative expenses also include external legal, accounting, and director and officer insurance, as well as other consulting and professional services fees, software and subscription services, other corporate expenses, and any contract termination fees.

We have incurred and expect to incur additional expenses as a result of operating as a public company, including costs to comply with the rules and regulations applicable to companies listed on a national securities exchange, costs related to compliance and reporting obligations, costs related to Sarbanes-Oxley compliance, costs related to Environmental, Social, and Governance (ESG) compliance and increased expenses for insurance, investor relations, and related professional services. We expect that our general and administrative expenses will increase in absolute dollars as our business grows but will decrease as a percentage of our total revenue over time, although our general and administrative expenses may fluctuate as a percentage of our total revenue from period-to-period depending on the timing of these expenses.

Interest Income, and Other Income (Expense), Net

Interest income consists primarily of interest earned on our cash equivalents and short-term investments.

Other income, net consists primarily of the gain from the deconsolidation of Meltano Inc., as well as foreign currency transaction gains and losses.

Loss from Equity Method Investment, Net of Tax

Loss from equity method investment, net of tax, consists of our share of losses from the results of operations of Meltano Inc., following its deconsolidation, net of tax.

Provision for (Benefit From) Income Taxes

Provision for (benefit from) income taxes consists primarily of income taxes in the foreign and state jurisdictions in which we conduct business. We maintain a full valuation allowance against our deferred tax assets in certain jurisdictions because we have concluded that it is not more likely than not that the deferred tax assets will be realized.

Results of Operations

The following table sets forth our results of operations for the periods presented (in thousands):

	Three Months Ended July 31,		Six Months Ended July 31,	
	2023	2022	2023	2022
Revenue:				
Subscription—self-managed and SaaS	\$ 122,096	\$ 88,936	\$ 233,287	\$ 165,859
License—self-managed and other	17,485	12,105	33,172	22,589
Total revenue	139,581	101,041	266,459	188,448
Cost of revenue: ⁽¹⁾				
Subscription—self-managed and SaaS	10,871	10,671	21,762	18,604
License—self-managed and other	3,825	2,359	6,873	4,274
Total cost of revenue	14,696	13,030	28,635	22,878
Gross profit	124,885	88,011	237,824	165,570
Operating expenses:				
Sales and marketing ⁽¹⁾	92,116	80,689	178,653	147,399
Research and development ⁽¹⁾	49,007	39,520	99,394	71,350
General and administrative ⁽¹⁾	37,819	33,104	72,067	54,996
Total operating expenses	178,942	153,313	350,114	273,745
Loss from operations	(54,057)	(65,302)	(112,290)	(108,175)
Interest income	9,112	3,064	16,427	3,590
Other income (expense), net ⁽²⁾	(1,330)	1,500	(1,077)	19,948
Loss before income taxes and loss from equity method investment	(46,275)	(60,738)	(96,940)	(84,637)
Loss from equity method investment, net of tax	(917)	(816)	(1,665)	(1,019)
Provision for (benefit from) income taxes	4,016	(57)	5,502	2,454
Net loss	\$ (51,208)	\$ (61,497)	\$ (104,107)	\$ (88,110)
Net loss attributable to noncontrolling interest ⁽³⁾	(1,128)	(2,473)	(1,558)	(2,987)
Net loss attributable to GitLab	\$ (50,080)	\$ (59,024)	\$ (102,549)	\$ (85,123)

(1) Includes stock-based compensation expense as follows:

	Three Months Ended July 31,		Six Months Ended July 31,	
	2023	2022	2023	2022
	(in thousands)			
Cost of revenue	\$ 1,698	\$ 1,585	\$ 3,112	\$ 2,375
Research and development	12,477	11,339	24,179	16,375
Sales and marketing	21,295	14,851	35,059	21,902
General and administrative	10,898	9,972	16,348	14,566
Total stock-based compensation expense	\$ 46,368	\$ 37,747	\$ 78,698	\$ 55,218

(2) Includes \$17.8 million gain for the six months ended July 31, 2022 from the deconsolidation of Meltano Inc. in April 2022. See “Note 12. Joint Venture and Equity Method Investment” to our condensed consolidated financial statements for additional details.

(3) Our results of operations include our variable interest entity, JiHu. The ownership interest of other investors is recorded as a noncontrolling interest. See “Note 12. Joint Venture and Equity Method Investment” to our condensed consolidated financial statements for additional details.

The following table sets forth the components of our condensed consolidated statements of operations as a percentage of total revenue for each of the periods presented:

	Three Months Ended July 31,		Six Months Ended July 31,	
	2023	2022	2023	2022
	(as a percentage of total revenue)			
Revenue	100 %	100 %	100 %	100 %
Cost of revenue	11	13	11	12
Gross profit	89	87	89	88
Operating expenses:				
Sales and marketing	66	80	67	78
Research and development	35	39	37	38
General and administrative	27	33	27	29
Total operating expenses	128	152	131	145
Loss from operations	(39)	(65)	(42)	(57)
Interest income	7	3	6	2
Other income (expense), net	(1)	1	—	11
Loss before income taxes and loss from equity method investment	(33)	(60)	(36)	(45)
Loss from equity method investment, net of tax	(1)	(1)	(1)	(1)
Provision for (benefit from) income taxes	3	—	2	(1)

Net loss attributable to GitLab	(36)%	(58)%	(38)%	(45)%

Comparison of the Three and Six Months Ended July 31, 2023 and 2022
Revenue

	Three Months Ended July 31,		Change		Six Months Ended July 31,		Change	
	2023	2022	\$	%	2023	2022	\$	%
	(in thousands, except percentages)				(in thousands, except percentages)			
Subscription—self-managed and SaaS	\$ 122,096	\$ 88,936	\$ 33,160	37 %	\$ 233,287	\$ 165,859	\$ 67,428	41 %
License—self-managed and other	17,485	12,105	5,380	44	33,172	22,589	10,583	47
Total revenue	<u>\$ 139,581</u>	<u>\$ 101,041</u>	<u>\$ 38,540</u>	<u>38 %</u>	<u>\$ 266,459</u>	<u>\$ 188,448</u>	<u>\$ 78,011</u>	<u>41 %</u>

Revenue increased \$38.5 million, or 38%, to \$139.6 million for the three months ended July 31, 2023 from \$101.0 million for the three months ended July 31, 2022. Revenue increased \$78.0 million, or 41%, to \$266.5 million for the six months ended July 31, 2023 from \$188.4 million for the six months ended July 31, 2022. The increase in both the three and six months ended July 31, 2023 was primarily due to the ongoing demand for The DevSecOps Platform, including adding new customers, the expansion within our existing paid customers, and an increase in our number of customers with \$100,000 or greater in ARR. As of July 31, 2023 and 2022, our expansion is reflected by our Dollar-Based Net Retention Rate being 124% and above 130%, respectively. We had 810 customers with ARR over \$100,000 as of July 31, 2023, increasing from 593 customers with ARR over \$100,000 as of July 31, 2022.

Revenue attributed to our variable interest entity, JiHu, was \$1.6 million and \$1.0 million for the three months ended July 31, 2023 and 2022, respectively, and \$3.1 million and \$2.1 million for the six months ended July 31, 2023 and 2022, respectively. See “Note 12. Joint Venture and Equity Method Investment” to our condensed consolidated financial statements for additional details.

Cost of Revenue, Gross Profit, and Gross Margin

	Three Months Ended July 31,		Change		Six Months Ended July 31,		Change	
	2023	2022	\$	%	2023	2022	\$	%
	(in thousands, except percentages)				(in thousands, except percentages)			
Cost of revenue	\$ 14,696	\$ 13,030	\$ 1,666	13 %	\$ 28,635	\$ 22,878	\$ 5,757	25 %
Gross profit	124,885	88,011	36,874	42	237,824	165,570	72,254	44
Gross margin	89 %	87 %			89 %	88 %		

Cost of revenue increased by \$1.7 million, to \$14.7 million for the three months ended July 31, 2023 from \$13.0 million for the three months ended July 31, 2022, primarily due to an increase of \$0.8 million in personnel-related expenses, driven by an increase in our average customer support and professional services headcount and an increase of \$0.1 million in stock-based compensation expenses (as discussed in the section titled “*Stock-Based Compensation Expense*” below). The remaining change was primarily attributable to an increase of \$0.4 million in software and consulting expenses. Gross margin improved by 2% to 89% for the three months ended July 31, 2023 from 87% for the three months ended July 31, 2022.

Cost of revenue increased by \$5.8 million, to \$28.6 million for the six months ended July 31, 2023 from \$22.9 million for the six months ended July 31, 2022, primarily due to an increase of \$2.3 million in

personnel-related expenses, driven by an increase in our average customer support and professional services headcount and an increase of \$0.7 million in stock-based compensation expenses (as discussed in the section titled “*Stock-Based Compensation Expense*” below). The remaining change was primarily attributable to an increase of \$1.3 million in third-party hosting costs for increased usage, and an increase of \$0.5 million in software and consulting expenses. Gross margin improved by 1% to 89% for the six months ended July 31, 2023 from 88% for the six months ended July 31, 2022.

Cost of revenue attributed to our variable interest entity, JiHu, was \$0.6 million and \$0.4 million for the three months ended July 31, 2023 and 2022, respectively, and \$1.1 million and \$0.7 million for the six months ended July 31, 2023 and 2022, respectively. See “Note 12. Joint Venture and Equity Method Investment” to our condensed consolidated financial statements for additional details.

Sales and Marketing

	Three Months Ended July 31,		Change		Six Months Ended July 31,		Change	
	2023	2022	\$	%	2023	2022	\$	%
	(in thousands, except percentages)				(in thousands, except percentages)			
Sales and marketing expenses	\$ 92,116	\$ 80,689	\$ 11,427	14 %	\$ 178,653	\$ 147,399	\$ 31,254	21 %

Sales and marketing expenses increased by \$11.4 million, to \$92.1 million for the three months ended July 31, 2023 from \$80.7 million for the three months ended July 31, 2022, primarily due to an increase of \$11.2 million in personnel-related expenses, driven by an increase in our average sales and marketing headcount, and an increase of \$6.4 million in stock-based compensation expenses (as discussed in the section titled “*Stock-Based Compensation Expense*” below). The remaining change was mainly due to an increase of \$1.2 million in marketing and brand-related expenses and a decrease of \$0.9 million in hosting expenses.

Sales and marketing expenses increased by \$31.3 million, to \$178.7 million for the six months ended July 31, 2023 from \$147.4 million for the six months ended July 31, 2022, primarily due to an increase of \$26.3 million in personnel-related expenses, driven by an increase in our average sales and marketing headcount, and an increase of \$13.2 million in stock-based compensation expenses (as discussed in the section titled “*Stock-Based Compensation Expense*” below). The remaining change was mainly due to an increase of \$1.4 million in marketing and brand-related expenses, a decrease of \$2.1 million in hosting expenses, and \$3.7 million in one-time restructuring expenses.

Sales and marketing expenses attributed to our variable interest entity, JiHu, were \$2.0 million and \$1.9 million for the three months ended July 31, 2023 and 2022, respectively, and \$4.0 million and \$3.3 million for the six months ended July 31, 2023 and 2022, respectively. See “Note 12. Joint Venture and Equity Method Investment” to our condensed consolidated financial statements for additional details.

Research and Development

	Three Months Ended July 31,		Change		Six Months Ended July 31,		Change	
	2023	2022	\$	%	2023	2022	\$	%
	(in thousands, except percentages)				(in thousands, except percentages)			
Research and development expenses	\$ 49,007	\$ 39,520	\$ 9,487	24 %	\$ 99,394	\$ 71,350	\$ 28,044	39 %

Research and development expenses increased by \$9.5 million, to \$49.0 million for the three months ended July 31, 2023 from \$39.5 million for the three months ended July 31, 2022, primarily due to an increase of \$6.7 million in personnel-related expenses, driven by an increase in our average research and development headcount and an increase of \$1.1 million in stock-based compensation expenses (as discussed in the section titled “*Stock-Based Compensation Expense*” below). The remaining change was mainly due to \$1.5 million in hosting costs for internal usage and \$0.4 million in software and consulting expenses.

Research and development expenses increased by \$28.0 million, to \$99.4 million for the six months ended July 31, 2023 from \$71.4 million for the six months ended July 31, 2022, primarily due to an increase of \$19.7 million in personnel-related expenses, driven by an increase in our average research and development headcount and an increase of \$7.8 million in stock-based compensation expenses (as discussed in the section titled “*Stock-Based Compensation Expense*” below). The remaining change was mainly due to \$3.0 million in hosting costs for internal usage, \$1.0 million in software and consulting expenses, and \$2.0 million in one-time restructuring costs.

Research and development expenses attributed to our variable interest entity, JiHu, were \$0.7 million and \$1.9 million for the three months ended July 31, 2023 and 2022, respectively, and \$2.7 million and \$2.8 million for the six months ended July 31, 2023 and 2022, respectively. See “Note 12. Joint Venture and Equity Method Investment” to our condensed consolidated financial statements for additional details.

General and Administrative

	Three Months Ended July 31,		Change		Six Months Ended July 31,		Change	
	2023	2022	\$	%	2023	2022	\$	%
	(in thousands, except percentages)				(in thousands, except percentages)			
General and administrative expenses	\$ 37,819	\$ 33,104	\$ 4,715	14 %	\$ 72,067	\$ 54,996	\$ 17,071	31 %

General and administrative expenses increased by \$4.7 million, to \$37.8 million for the three months ended July 31, 2023 from \$33.1 million for the three months ended July 31, 2022, primarily due to an increase of \$4.1 million in personnel-related expenses, mainly attributable to an increase in our average general and administrative headcount and an increase of \$0.9 million in stock-based compensation expenses (as discussed in the section titled “*Stock-Based Compensation Expense*” below). The remaining change was primarily driven by an increase of \$2.7 million in charitable donation of common stock offset by a decrease of \$2.3 million from a one-time GitLab Contribute team member event cancellation fee in the three months ended July 31, 2022.

General and administrative expenses increased by \$17.1 million, to \$72.1 million for the six months ended July 31, 2023 from \$55.0 million for the six months ended July 31, 2022, primarily due to an increase of \$9.7 million in personnel-related expenses, mainly attributable to an increase in our average general and administrative headcount and an increase of \$1.8 million in stock-based compensation expenses (as discussed in the section titled “*Stock-Based Compensation Expense*” below). The remaining change was primarily driven by an increase of \$5.3 million in charitable donation of common stock, an increase of \$2.4 million in consulting and legal expenses to support our growth, and \$1.6 million in one-time restructuring costs, offset by a decrease of \$2.3 million from a one-time GitLab Contribute team member event cancellation fee in the six months ended July 31, 2022.

General and administrative expenses attributed to our variable interest entity, JiHu, was \$1.4 million and \$3.5 million for the three months ended July 31, 2023 and 2022, respectively, and \$0.0 million and \$4.3 million for the six months ended July 31, 2023 and 2022, respectively. See “Note 12. Joint Venture and Equity Method Investment” to our condensed consolidated financial statements for additional details.

Stock-Based Compensation Expense

	Three Months Ended July 31,		Change		Six Months Ended July 31,		Change	
	2023	2022	\$	%	2023	2022	\$	%
	(in thousands, except percentages)				(in thousands, except percentages)			
Cost of revenue	\$ 1,698	\$ 1,585	\$ 113	7 %	\$ 3,112	\$ 2,375	\$ 737	31 %
Research and development	12,477	11,339	1,138	10	24,179	16,375	7,804	48
Sales and marketing	21,295	14,851	6,444	43	35,059	21,902	13,157	60
General and administrative	10,898	9,972	926	9	16,348	14,566	1,782	12
Total stock-based compensation expense	\$ 46,368	\$ 37,747	\$ 8,621	23 %	\$ 78,698	\$ 55,218	\$ 23,480	43 %

Stock-based compensation expense increased by \$8.6 million, to \$46.4 million for the three months ended July 31, 2023 from \$37.7 million for the three months ended July 31, 2022, primarily due to an increase of \$12.7 million of expense from restricted stock units, or RSUs, that we started granting in December 2021, offset by a decrease of \$3.0 million of stock-based compensation expense related to our variable interest entity.

Stock-based compensation expense increased by \$23.5 million, to \$78.7 million for the six months ended July 31, 2023 from \$55.2 million for the six months ended July 31, 2022, primarily due to an increase of \$28.9 million of expense from RSUs, that we started granting in December 2021, offset by a decrease of \$5.6 million of stock-based compensation expense related to our variable interest entity.

Stock-based compensation expense attributed to our variable interest entity, JiHu, was a \$0.2 million gain and \$2.8 million of expense for the three months ended July 31, 2023 and 2022, respectively, and a \$2.7 million gain and \$3.0 million of expense for the six months ended July 31, 2023 and 2022, respectively. See “Note 12. Joint Venture and Equity Method Investment” to our condensed consolidated financial statements for additional details.

Interest Income and Other Income (expense), Net

	Three Months Ended July 31,		Change		Six Months Ended July 31,		Change	
	2023	2022	\$	%	2023	2022	\$	%
	(in thousands, except percentages)				(in thousands, except percentages)			
Interest income	\$ 9,112	\$ 3,064	\$ 6,048	197 %	\$ 16,427	\$ 3,590	\$ 12,837	358 %
Gain from deconsolidation of Meltano Inc.	\$ —	\$ —	\$ —	— %	\$ —	\$ 17,798	\$ (17,798)	100 %
Foreign exchange gains (losses), net	(1,268)	1,646	(2,914)	(177)	(994)	2,506	(3,500)	(140)
Other expenses, net	(62)	(146)	84	(58)	(83)	(356)	273	(77)
Total other income (expense), net	\$ (1,330)	\$ 1,500	\$ (2,830)	(189)%	\$ (1,077)	\$ 19,948	\$ (21,025)	(105)%

For the three and six months ended July 31, 2023 compared to the three and six months ended July 31, 2022, interest income increased primarily due to income earned from our cash equivalents and short-term investments as a result of investing the proceeds from our initial public offering, or IPO, into marketable securities as well as higher interest rates during the three and six months ended July 31, 2023 compared to the three and six months ended July 31, 2022.

The change in other income (expense), net is primarily due to the recognized gain of \$17.8 million on the deconsolidation of Meltano Inc., our formerly controlled subsidiary, during the six months ended July 31, 2022. The remaining change in other income (expense), net is mainly due to currency exchange gains and losses.

Loss from Equity Method Investment, Net of Tax

	Three Months Ended July 31,		Change		Six Months Ended July 31,		Change	
	2023	2022	\$	%	2023	2022	\$	%
	(in thousands, except percentages)				(in thousands, except percentages)			
Loss from equity method investment, net of tax	\$ (917)	\$ (816)	\$ (101)	12 %	\$ (1,665)	\$ (1,019)	\$ (646)	63 %

Loss from equity method investment, net of tax consists of our share of losses from the results of operations of Meltano Inc., net of tax. Effective April 4, 2022, due to a loss of control over Meltano Inc., we account for Meltano investment under the equity method.

Provision for (Benefit from) Income Taxes

	Three Months Ended July 31,		Change		Six Months Ended July 31,		Change	
	2023	2022	\$	%	2023	2022	\$	%
	(in thousands, except percentages)				(in thousands, except percentages)			
Provision for (benefit from) income taxes	\$ 4,016	\$ (57)	\$ 4,073	(7146)%	\$ 5,502	\$ 2,454	\$ 3,048	124 %
Effective tax rate	(8.7)%	0.1%	(8.8)%		(5.7)%	(2.9)%	(2.8)%	

Our tax expense increased by approximately \$4.0 million for the three months ended July 31, 2023 as compared to the three months ended July 31, 2022. The higher tax expense was primarily due to an increase in unrecognized tax benefits and an increase in our foreign and domestic tax expense.

Our tax expense increased by approximately \$3.0 million for the six months ended July 31, 2023 as compared to the six months ended July 31, 2022. The higher tax expense was primarily due to an increase in unrecognized tax benefits and an increase in our foreign and domestic tax expense.

Our effective tax rate for the three and six months ended July 31, 2023 was lower than the U.S. federal statutory tax rate of 21%, primarily due to an increase in valuation allowance associated with the net operating losses generated during the year, unrecognized tax benefits, and non-deductible expenses offset by research credits.

Under the provisions of Accounting Standard Codification ("ASC") 740, *Income Taxes*, the determination of our ability to recognize our deferred tax assets requires an assessment of both negative and positive evidence when determining our ability to recognize deferred tax assets. We determined that it was not more likely than not that we could recognize certain deferred tax assets. The evidence we evaluated included operating results during the most recent three-year period and future projections, with more weight given to historical results than expectations of future profitability, which are inherently uncertain. Certain entities' net losses in recent periods represented sufficient negative evidence to require a valuation allowance against its net deferred tax assets. This valuation allowance will be evaluated periodically and could be reversed partially or totally if business results have sufficiently improved to support realization of deferred tax assets.

We have not recorded a provision for deferred U.S. tax expense that could result from the remittance of foreign undistributed earnings since we intend to reinvest the earnings of the foreign subsidiaries indefinitely. Our share of the undistributed earnings of foreign corporations not included in our consolidated federal income tax returns that could be subject to additional U.S. income tax if remitted is immaterial. As of July 31, 2023, the amount of unrecognized U.S. federal deferred income tax liability for undistributed earnings is immaterial.

As of July 31, 2023, the statutes for our U.S. federal 2019 through 2022 tax years were open and the results from such tax years remained subject to potential examination in one or more jurisdictions. In addition, in the United States, any net operating losses or credits that were generated in prior years but not yet fully utilized in a year that is closed under the statute of limitations may also be subject to examination. We are currently under examination in the Netherlands for the 2015 and 2016 tax years. We are currently unable to estimate the financial outcome of this examination due to its preliminary status. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. We continue to monitor the progress of ongoing discussions with tax authorities and the effect, if any, of the expected expiration of the statute of limitations in various taxing jurisdictions.

As of July 31, 2023, unrecognized tax benefits were \$8.1 million, of which \$2.6 million would affect the effective tax rate if recognized. We anticipate an immaterial amount of unrecognized tax benefits to reverse in the next 12 months. We are unable to reasonably estimate the timing of the long-term payments or the amount by which the liability will increase or decrease.

It is our policy to classify accrued interest and penalties related to unrecognized tax benefits in the provision for income taxes. Accrued interest and penalties were \$0.2 million as of each of July 31, 2023 and January 31, 2023.

Liquidity and Capital Resources

Since inception, we have financed operations primarily through proceeds received from issuances of equity securities, preferred stock and payments received from our customers.

As of July 31, 2023 and January 31, 2023, our principal source of liquidity was cash, cash equivalents, and short-term investments aggregating to \$986.3 million and \$936.7 million, respectively, which were held for working capital and strategic investment purposes. As of July 31, 2023, cash and cash equivalents consist of cash in banks, money markets funds, agency securities, treasuries, and corporate debt securities, while short-term investments mainly consist of treasuries, corporate debt securities, and commercial paper.

We believe that our existing cash, cash equivalents, and short-term investments will be sufficient to support working capital and capital expenditure requirements for at least the next 12 months. Our future capital requirements will depend on many factors, including our revenue growth rate, the timing and the amount of cash received from customers, the expansion of sales and marketing activities, the timing and extent of spending to support research and development efforts, the price at which we are able to procure third-party cloud infrastructure, expenses associated with our international expansion, the introduction of platform enhancements, and the continuing market adoption of The DevSecOps Platform. In the future, we may enter into arrangements to acquire or invest in complementary businesses, products, and technologies. We may be required to seek additional equity or debt financing. In the event that we require additional financing, we may not be able to raise such financing on terms acceptable to us or at all. If we are unable to raise additional capital or generate cash flows necessary to expand our operations and invest in continued innovation, we may not be able to compete successfully, which would harm our business, operating results, and financial condition.

The following table shows a summary of our cash flows for the periods presented:

	Six Months Ended July 31,	
	2023	2022
	(in thousands)	
Net cash provided by (used in) operating activities	\$ 16,148	\$ (64,491)
Net cash used in investing activities	\$ (65,045)	\$ (483,487)
Net cash provided by financing activities	\$ 25,528	\$ 78,538

Operating Activities

Our largest source of operating cash is payments received from our customers. Our primary use of cash from operating activities are for personnel-related expenses, sales and marketing expenses, third-party cloud infrastructure expenses, and overhead expenses. We have generated positive cash flows from operating activities during the six months ended July 31, 2023 and have supplemented working capital through net proceeds from the issuance of equity securities.

Cash provided by operating activities during the six months ended July 31, 2023 was \$16.1 million, primarily consisting of our net loss of \$104.1 million, adjusted for non-cash items of \$102.3 million (mainly attributable to stock-based compensation expense of \$78.7 million), and net cash inflows of \$17.9 million provided by changes in our operating assets and liabilities. The main drivers of the changes in operating assets and liabilities were the decrease in accounts receivable of \$25.3 million, the increase in accrued compensation and related expenses of \$2.6 million, and the increase in deferred revenue of \$11.2 million, partially offset by the increase in deferred contract acquisition costs of \$18.1 million.

Cash used in operating activities during the six months ended July 31, 2022 was \$64.5 million, primarily consisting of our net loss of \$88.1 million, adjusted for non-cash items of \$60.4 million (mainly attributable to stock-based compensation expense of \$55.2 million), and net cash outflows of \$36.8 million used by changes in our operating assets and liabilities. The main drivers of the changes in operating assets and liabilities were the decrease in accrued compensation and related expenses of \$16.7 million, the increase in deferred contract acquisition costs of \$21.2 million, and the increase in accounts receivable of \$13.6 million, partially offset by the increase in deferred revenue of \$17.5 million.

Investing Activities

Cash used in investing activities during the six months ended July 31, 2023 was \$65.0 million, primarily consisting of \$62.0 million in purchases of short-term investments, net of proceeds from maturities, \$2.5 million outflow as a result of an escrow payment related to a prior business combination, and \$0.5 million in purchases of property and equipment.

Cash used in investing activities during the six months ended July 31, 2022 was \$483.5 million, primarily consisting of \$470.6 million in purchases of short-term investments, net of proceeds from maturities, \$9.6 million cash outflow as a result of a deconsolidation of a subsidiary, and \$3.2 million in purchases of property and equipment.

Financing Activities

Cash provided by financing activities during the six months ended July 31, 2023 was \$25.5 million, attributable to \$17.8 million of proceeds from the issuance of common stock upon stock options exercises, and \$7.8 million of proceeds from the issuance of common stock under the employee stock purchase plan.

Cash provided by financing activities during the six months ended July 31, 2022 was \$78.5 million, primarily attributable to \$57.7 million of contributions received from noncontrolling interests, \$11.3 million of proceeds from issuance of common stock upon stock options exercises, and \$9.6 million of proceeds from the issuance of common stock under the employee stock purchase plan.

Contractual Obligations and Commitments

For more information regarding our contractual obligations, refer to “Note 15. Commitments and Contingencies” to our condensed consolidated financial statements.

Critical Accounting Policies and Estimates

Our condensed consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles, or GAAP. The preparation of the condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements, and the reported amounts of revenue and expenses during the reporting period. We base these estimates on historical and anticipated results, trends, and various other assumptions that it believes are reasonable under the circumstances, including assumptions as to future events. Actual results could differ from those estimates. To the extent

that there are differences between our estimates and actual results, our future financial statement presentation, financial condition, operating results, and cash flows will be affected.

For additional information about our critical accounting policies and estimates, see the disclosure included in our Annual Report on Form 10-K for the fiscal year ended January 31, 2023, which was filed with the SEC on March 30, 2023.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

We have operations both within the United States and internationally. We are exposed to market risk in the ordinary course of our business. Market risk represents the risk of loss that may impact our financial condition due to adverse changes in financial market prices and rates. Our market risk exposure is primarily the result of fluctuations in interest rates and foreign currency exchange rates.

Interest Rate Risk

As of July 31, 2023 and January 31, 2023, we had \$986.3 million and \$936.7 million of cash, cash equivalents, and short-term investments, respectively. Our cash equivalents and short-term investments of \$860.1 million as of July 31, 2023, mainly consist of money market funds, treasuries, corporate debt securities and commercial paper. Our cash equivalents and short-term investments of \$704.3 million as of January 31, 2023, mainly consist of money market funds, treasuries, corporate debt securities and commercial paper. Our cash, cash equivalents, and short-term investments are held for working capital and strategic investment purposes. We do not enter into investments for trading or speculative purposes. Our fixed-income portfolio is subject to fluctuations in interest rates, which could affect our results of operations. Based on our investment portfolio balance as of July 31, 2023, a hypothetical increase or decrease in interest rates of 1% (100 basis points) would result in a decrease or an increase in the fair value of our portfolio of approximately \$3.8 million. Such losses would only be realized if we sell the investments prior to maturity. The weighted-average life of our investment portfolio was approximately 6 months as of July 31, 2023.

Foreign Currency Exchange Risk

To date, all of our sales contracts have been denominated in U.S. dollars, except for our variable interest entity, JiHu, which sells in local currency in its designated area. Our revenue is not subject to a material foreign currency risk. Operating expenses within the United States are primarily denominated in U.S. dollars, while operating expenses incurred outside the United States are primarily denominated in each country's respective local currency. Our condensed consolidated results of operations and cash flows are, therefore, subject to fluctuations due to changes in foreign currency exchange rates and may be adversely affected in the future due to changes in foreign exchange rates.

Our reporting currency is the U.S. dollar, and the functional currency of our foreign subsidiaries is each country's respective local currency. Assets and liabilities of the foreign subsidiaries are translated into U.S. dollars at the exchange rates in effect at the reporting date, and income and expenses are translated at average exchange rates during the period, with the resulting translation adjustments directly recorded as a component of accumulated other comprehensive income (loss). Foreign currency transaction gains and losses are recorded in other income (expense), net in the condensed consolidated statements of operations. The volatility of exchange rates depends on many factors that we cannot forecast with reliable accuracy. In the event our foreign currency denominated assets, liabilities, or expenses increase, our operating results may be more greatly affected by fluctuations in the exchange rates of the currencies in which we do business. Moreover, as of July 31, 2023, we have \$66.4 million of cash and cash equivalents denominated in currencies other than the U.S. dollar, a slight majority of which is in Chinese yuan for our variable interest entity, JiHu. The value of these cash balances may materially change along with the weakness or strength of the U.S. dollar. As of July 31, 2023, a hypothetical 10% change in foreign currency exchange rates would have a material impact on our condensed consolidated financial statements.

We have not engaged in the hedging of foreign currency transactions to date, although we may choose to do so in the future.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

In connection with the preparation of this Quarterly Report on Form 10-Q, as of July 31, 2023, an evaluation was performed under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that, as of July 31, 2023, our disclosure controls and procedures were, in design and operation, not effective at a reasonable assurance level as a result of the material weaknesses described below.

Material Weaknesses

As disclosed in our Annual Report on the Form 10-K for the fiscal year ended January 31, 2023, we previously identified material weaknesses in our internal control over financial reporting. Our management determined that material weaknesses exist due to a lack of policies and procedures related to the operation of control activities and inadequate communication of information to control owners and operators related to the objectives and responsibilities for internal control in a manner which supports the internal control environment at the Company.

As a result, the following material weaknesses exist:

- We did not design and maintain effective controls over certain information technology (“IT”) general controls for information systems that are relevant to the preparation of our consolidated financial statements. In particular, we did not design and maintain effective (i) program change management controls to ensure that IT programs, data changes and migrations affecting financial IT applications and underlying records are identified, tested, authorized and implemented appropriately and (ii) user access controls to ensure appropriate segregation of duties, restricted user and privileged access to our financial applications, data and programs to the appropriate personnel. The ineffective design and operation of IT general controls resulted in the ineffective operation of automated controls and manual controls using reports and information from the impacted information systems used in financial reporting processes,
- We did not retain sufficient contemporaneous documentation to demonstrate the operation of controls over manual journal entries,
- We did not retain sufficient contemporaneous documentation to demonstrate the operation of review controls over stock-based compensation at a sufficient level of precision and such controls relied on reports and information adversely impacted by the IT general control deficiencies, and
- As previously reported, we did not design and maintain effective and timely review procedures over the accounting for and disclosure of non-routine transactions. This material weakness has not been remediated, as the new controls designed rely on reports and information adversely impacted by the IT general control deficiencies.

Notwithstanding such material weaknesses in internal control over financial reporting, our Chief Executive Officer and Chief Financial Officer have concluded that our unaudited condensed consolidated financial statements included in this Quarterly Report on Form 10-Q present fairly, in all material respects, our financial position, results of operations and cash flows for the periods presented in conformity with U.S. GAAP. The aforementioned material weaknesses also did not result in a material misstatement in any previously issued consolidated financial statements.

Remediation Efforts and Status

As disclosed in our Annual Report on Form 10-K for the fiscal year ended January 31, 2023, we are currently in the process of remediating our material weaknesses and are taking the steps that we believe will address the underlying causes of the material weaknesses, including:

- Strengthening IT governance and designing IT general controls including program change management, restricting user access to our internal systems used for financial reporting and enhancing the retention of contemporaneous documentation of reviews over IT general controls,
- Enhancing the review of manual journal entries, including outlining policies and procedures to strengthen retention of contemporaneous documentation and supervisory reviews by management,
- Enhancing the precision of controls around the review of equity transactions, including the review of underlying source data and outlining policies and procedures to strengthen the retention of contemporaneous documentation of control reviews,
- Enhancing the review process around non-standard contracts and expanding our internal disclosure review processes to provide greater representation across various functions to ensure timely identification and review of non-routine transactions, and
- Developing and deploying training programs regarding the operation and importance of internal controls.

We believe the actions described above, which we began implementing in the first quarter of fiscal year 2024, once fully implemented and tested, will be sufficient to remediate the identified material weaknesses and strengthen our internal controls. However, our efforts to remediate these material weaknesses may not be effective or prevent any future material weakness or significant deficiency in our internal control over financial reporting. These material weaknesses will not be considered remediated until the applicable remedial controls operate for a sufficient period of time and management has concluded, through testing, that these controls are operating effectively.

Changes in Internal Control over Financial Reporting

Other than the material weaknesses and remediation efforts described above, there were no changes to our internal control over financial reporting identified in connection with the evaluation required by rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the quarter ended July 31, 2023 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Effectiveness of Controls and Procedures

Our disclosure controls and procedures and internal controls over financial reporting are designed to provide reasonable assurance of achieving their desired objectives. Management does not expect, however, that our disclosure controls and procedures or our internal controls over financial reporting will prevent or detect all errors and fraud. Any control system, no matter how well designed and operated, is based upon certain assumptions and can provide only reasonable, not absolute, assurance that its objectives will be met. Further, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the company have been detected.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are, and from time to time we may become, involved in legal proceedings or be subject to claims arising in the ordinary course of our business. Defending such proceedings is costly and can impose a significant burden on management and team members. We are not presently a party to any legal proceedings that in the opinion of our management, if determined adversely to us, would individually or taken together have a material adverse effect on our business, financial condition or operating results.

The results of any current or future litigation cannot be predicted with certainty, and regardless of the outcome, litigation can have an adverse impact on us because of defense and settlement costs, diversion of management resources and other factors.

ITEM 1A. RISK FACTORS

Investing in our Class A common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below, together with all of the other information in this Quarterly Report on Form 10-Q, including the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations," and our condensed consolidated financial statements and the accompanying notes included elsewhere in this Quarterly Report on Form 10-Q before making a decision to invest in our Class A common stock. Our business, financial condition, operating results, or prospects could also be adversely affected by risks and uncertainties that are not presently known to us or that we currently believe are not material. If any of the risks occur, our business, financial condition, operating results, and prospects could be adversely affected. In that event, the market price of our Class A common stock could decline, and you could lose all or part of your investment.

Risks Related to Our Business and Financial Position

Our business and operations have experienced rapid growth, and if we do not appropriately manage future growth, if any, or are unable to improve our systems, processes and controls, our business, financial condition, results of operations, and prospects will be adversely affected.

We have experienced rapid growth, both in terms of employee headcount and customer growth, as well as increased demand for our products. Our total number of Base Customers has grown to 7,815 as of July 31, 2023 from 5,864 as of July 31, 2022. The growth and expansion of our business places a continuous significant strain on our management and operational and financial resources. In addition, as customers adopt our products for an increasing number of use cases, we have had to support more complex commercial relationships. To effectively manage and capitalize on our growth periods, we need to manage headcount capital and processes efficiently, while continuing to make investments to improve and expand our information technology and financial infrastructure, our security and compliance requirements, our operating and administrative systems, our relationships with various partners and other third parties.

We may not be able to sustain the pace of improvements to our products successfully or implement systems, processes, and controls in an efficient or timely manner or in a manner that does not negatively affect our results of operations. Our failure to improve our systems, processes, and controls, or their failure to operate in the intended manner, may result in our inability to manage the growth of our business and to forecast our revenue, expenses, and earnings accurately, or to prevent losses.

Our recent growth may not be indicative of our future growth, and we may not be able to sustain our revenue growth rate in the future. Our growth also makes it difficult to evaluate our future prospects and may increase the risk that we will not be successful.

Our total revenue for the six months ended July 31, 2023 and 2022 was \$266.5 million and \$188.4 million, respectively, representing a growth rate of 41%. You should not rely on the revenue growth of any prior quarter or annual period as an indication of our future performance. As a result of our limited operating history, our ability to accurately forecast our future results of operations is limited and subject to a number of uncertainties, including our ability to plan for and model future growth. Our historical revenue growth should not be considered indicative of our future performance.

Further, in future periods, our revenue could decline or our revenue growth rate could slow. Many factors may contribute to this decline, including changes to technology, increased competition, slowing demand for The DevSecOps Platform, the maturation of our business, a failure by us to continue capitalizing on growth opportunities, our failure, for any reason, to continue to take advantage of growth opportunities and a global economic downturn, among others. If our growth rate declines, investors' perceptions of our business and the market price of our Class A common stock could be adversely affected.

In addition, we expect to continue to responsibly expend financial and other resources to align with our:

- expansion and enablement of our sales, services, and marketing organization to increase brand awareness and drive adoption of The DevSecOps Platform;
- product development, including investments in our product development team and the development of new features and functionality for The DevSecOps Platform;
- technology and sales channel partnerships;
- international expansion;
- acquisitions or strategic investments; and
- general administration, including increased legal and accounting expenses associated with being a public company.

These investments may not result in increased revenue in our business. If we are unable to maintain or increase our revenue at a rate sufficient to offset the expected increase in our costs, our business, financial position and results of operations will be harmed, and we may not be able to achieve or maintain profitability.

Our ability to forecast our future results of operations is subject to a number of uncertainties, including our ability to effectively plan for and model future growth. We have encountered in the past, and may encounter in the future, risks and uncertainties frequently experienced by growing companies in rapidly changing industries. If we fail to achieve the necessary level of efficiency in our organization as it grows, or if we are not able to accurately forecast future growth, our business would be harmed. Moreover, if the assumptions that we use to plan our business are incorrect or change in reaction to changes in our market, or we are unable to maintain consistent revenue or revenue growth, our share price could be volatile, and it may be difficult to achieve and maintain profitability.

We have a history of losses, anticipate increases in our operating expenses in the future, and may not achieve or sustain profitability on a consistent basis. If we cannot achieve and sustain profitability, our business, financial condition, and operating results may be adversely affected.

We have incurred losses in each year since our inception, including net losses of approximately \$155.1 million, \$172.3 million and \$102.5 million in fiscal 2022, fiscal 2023 and the six months ended July 31, 2023, respectively. As of July 31, 2023, we had an accumulated deficit of approximately \$828.2 million. While we have experienced significant growth in revenue in recent periods, we cannot assure you that we will achieve profitability in future periods or that, if at any time we are profitable, we will sustain profitability. We also expect our operating and other expenses to increase in the foreseeable future as we continue to invest in our future growth, including expanding our research and development function to drive further development of The DevSecOps Platform, expanding our sales and marketing activities, developing the functionality to expand into adjacent markets, and reaching customers in new geographic locations, which will negatively affect our operating results if our total revenue does not increase. While we consistently evaluate opportunities to reduce our operating costs and optimize efficiencies, including, for example, through our workforce reduction in February 2023, we cannot guarantee that these efforts will be successful or that we will not re-accelerate operating expenditures in the future in order to capitalize on growth opportunities. In addition to the anticipated costs to grow our business, we also expect to continue to incur significant legal, accounting, and other expenses as a public company. These efforts and expenses may be more costly than we expect, and we cannot guarantee that we will be able to increase our revenue to offset our operating expenses. Our revenue growth may slow or our revenue may decline for a number of reasons, including reduced demand for The DevSecOps Platform, increased competition, an increased use of our free product offerings, a decrease in the growth or reduction in size of our overall market, or any inability on our part to capitalize on growth opportunities. Further, as our

SaaS offering makes up an increasing percentage of our total revenue, we expect to see increased associated cloud-related costs, such as hosting and managing costs, which may adversely impact our gross margins. Any failure to increase our revenue or to manage our costs as we continue to grow and invest in our business would prevent us from achieving or maintaining profitability or achieving or maintaining positive operating cash flow at all or on a consistent basis, which would cause our business, financial condition, and results of operations to suffer.

As we continue to invest in infrastructure, develop our services and features, responsibly manage our headcount and expand our sales and marketing activity, we may continue to have losses in future periods and these may increase significantly. As a result, our losses in future periods may be significantly greater than the losses we would incur if we developed our business more slowly. In addition, we may find that these efforts require greater investment of time and human and capital resources than we currently anticipate and/or that they may not result in increases in our revenues or billings. Any failure by us to achieve and sustain profitability on a consistent basis could cause the value of our Class A common stock to decline.

We face intense competition and could lose market share to our competitors, which would adversely affect our business, operating results, and financial condition.

The markets for our services are highly competitive, with limited barriers to entry. Competition presents an ongoing threat to the success of our business. We expect competition in the software business generally, and in all of the stages of the software development lifecycle that our product covers, in particular, to continue to increase. We expect to continue to face intense competition from current competitors, as well as from new entrants into the market or from adjacent markets. If we are unable to anticipate or react to these challenges, our competitive position would weaken, and we would experience a decline in revenue or reduced revenue growth, and loss of market share that would adversely affect our business, financial condition, and operating results.

We face competition in several areas due to the nature of our product. Our product offering is broad across all stages of the software development lifecycle which has us competing with many providers with offerings across all stages. We compete with well-established providers such as Atlassian and Microsoft as well as other companies with offerings in fewer stages including with respect to both code hosting and code collaboration services, as well as file storage and distribution services and artificial intelligence, or AI. Many of our competitors are significantly larger than we are and have more capital to invest in their businesses.

We believe that our ability to compete depends upon many factors both within and beyond our control, including the following:

- the ability of our products or of those of our competitors to deliver the positive business outcomes prioritized and valued by our customers and prospects;
- our ability to price our products competitively, including our ability to transition users of our free product offering to a paid version of The DevSecOps Platform;
- the amount and quality of communications, postings, and sharing by our users on public forums, which can promote improvements on The DevSecOps Platform but may also lead to disclosure of commercially sensitive details;
- the timing and market acceptance of services, including the developments and enhancements to those services offered by us or our competitors, including incorporation of AI into such services;
- our ability to monetize activity on our services;
- customer service and support efforts;
- sales and marketing efforts;

- ease of use, performance and reliability of solutions developed either by us or our competitors;
- our ability to manage our operations in a cost effective manner;
- insolvency or credit difficulties confronting our customers, affecting their ability to purchase or pay for our product offering;
- our reputation and brand strength relative to our competitors;
- introduction of new technologies or standards that compete with or are unable to be adopted in our products;
- ability to attract new team members or retain existing team members which could affect our ability to attract new customers, service existing customers, enhance our product or handle our business needs;
- our ability to maintain and grow our community of users; and
- the length and complexity of our sales cycles.

Many of our current and potential competitors have greater financial, technical, marketing and other resources and larger customer bases than we do. Furthermore, our current or potential competitors may be acquired by third parties with greater available resources and the ability to initiate or withstand substantial price competition. In addition, many of our competitors have established sales and marketing relationships and have access to larger customer bases. Our competitors may also establish cooperative relationships among themselves or with third parties that may further enhance their product offerings or resources. These factors may allow our competitors to respond more quickly than we can to new or emerging technologies and changes in customer preferences. These competitors may engage in more extensive research and development efforts, undertake more far-reaching marketing campaigns and adopt more aggressive pricing policies which may undercut our pricing policies and allow them to build a larger user base or to monetize that user base more effectively than us. If our competitors' products, platforms, services or technologies maintain or achieve greater market acceptance than ours, if they are successful in bringing their products or services to market earlier than ours, or if their products, platforms or services are more technologically capable than ours, then our revenues could be adversely affected. In addition, some of our competitors may offer their products and services at a lower price or for free, or may offer a competing product with other services or products that together result in offering the competing product for free. If we are unable to achieve our target pricing levels, our operating results would be negatively affected. Pricing pressures and increased competition could result in reduced sales, reduced margins, losses or a failure to maintain or improve our competitive market position, any of which could adversely affect our business.

The market for our services is relatively new and unproven and may not grow, which would adversely affect our future results and the trading price of our Class A common stock.

Because the market for our services is relatively new and rapidly evolving, it is difficult to predict customer adoption, customer demand for our services, the size and growth rate of this market, the entry of competitive products or the success of existing competitive services. Any expansion or contraction in our market depends on a number of factors, including the cost, performance and perceived value associated with our services and the appetite and ability of customers to use and pay for the services we provide. Further, even if the overall market for the type of services we provide continues to grow, we face intense competition from larger and more well-established providers and we may not be able to compete effectively or achieve market acceptance of our products. If we or other software and SaaS providers experience security incidents, loss of customer data, or disruptions in delivery or service, the market for these applications as a whole, including The DevSecOps Platform and products, may be negatively affected. If the market for our services does not achieve widespread adoption, we do not compete effectively in this market, or there is a reduction in demand for our software or our services in our market

caused by a lack of customer acceptance, implementation challenges for deployment, technological challenges, lack of accessible data, competing technologies and services, decreases in corporate spending, including as a result of global business or macroeconomic conditions, including inflation, rising interest rates, volatility of the global debt and equity markets, instability in the global banking sector, or otherwise, it could result in reduced customer orders and decreased revenues, which could require slowing our rate of headcount growth and would adversely affect our business operations and financial results.

We are dependent on sales and marketing strategies to drive our growth in our revenue. These sales and marketing strategies may not be successful in continuing to generate sufficient sales opportunities. Any decline in our customer renewals and expansions could harm our future operating results.

Our business model depends on generating and maintaining a large user base that is satisfied with The DevSecOps Platform. We rely on satisfied customers to expand their footprint by buying new products and services and onboarding additional users. While we have implemented user limits on our free SaaS product (and plan to implement in fiscal year 2024 storage and transfer limitations on our free SaaS product), we have limited historical data with respect to the number of current and previous free users and the rates in which customers convert to paying customers, so we may not accurately predict future customer purchasing trends. In future periods, our growth could slow or our profits could decline for several reasons, including decreased demand for our product offerings and our professional services, increased competition, a decrease in the growth of our overall market, a decrease in corporate spending, including as a result of global business or macroeconomic conditions, including inflation, rising interest rates, volatility of the global debt and equity markets, instability in the global banking sector, or otherwise, or our failure, for any reason, to continue to capitalize on growth opportunities. We may be forced to change or abandon our subscription based revenue model in order to compete with our competitors' offerings.

It could also become increasingly difficult to predict revenue and timing of collections as our mix of annual, multi-year and other types of transactions changes as a result of our expansion into cloud-based offerings. Our failure to execute on our revenue projections could impair our ability to meet our business objectives and adversely affect our results of operations and financial condition.

Our future success also depends in part on our ability to sell more subscriptions and additional services to our current customers. Even if customers choose to renew their current subscriptions with us, they may decline to purchase additional services or they may choose to down-tier or otherwise decrease the number of seats in their subscription. If our customers do not purchase additional subscriptions and services from us, our revenue may decline and our operating results may be harmed. Paying customers may decline or fluctuate as a result of a number of factors, including their satisfaction with our services and our end-customer support, the frequency and severity of product outages, our product uptime or latency, their satisfaction with the speed of delivering new features, the pricing of our, or competing, services, and the impact of macroeconomic conditions on our customers and their corporate spending. We have limited historical data with respect to rates of paying customers buying more seats, up-tiering, down-tiering and churning, so we may not accurately predict future customer trends.

Our customer expansions and renewals may decline or fluctuate, and conversely, contractions and down-tiers may increase, or fluctuate, as a result of a number of factors, including: quality of our sales efforts, customer usage, customer satisfaction with our services and customer support, our prices (including price increases for our Premium tier that were generally implemented in the first quarter of fiscal year 2024), the prices of competing services, mergers and acquisitions affecting our customer base, the effects of global economic conditions, including inflation, rising interest rates, volatility of the global debt and equity markets, and instability in the global banking sector, or reductions in our customers' spending levels generally (including, our customers that have or may have to downsize their operations or headcount). If we cannot use our marketing strategies in a cost-effective manner or if we fail to promote our services efficiently and effectively, our ability to acquire new customers or expand the services of our

existing customers may suffer. In addition, an increase in the use of online and social media for product promotion and marketing may increase the burden on us to monitor compliance of such materials and increase the risk that such materials could contain problematic product or marketing claims in violation of applicable regulations.

Further, we have discontinued our starter and bronze tier product offerings, and users of these products will be required to switch to another paid offering, switch to our free product or discontinue using our products. Additionally, we have implemented user limits on our free SaaS product, and plan to implement in fiscal year 2024 storage and transfer limitations on our free SaaS product offering. We also announced in the first quarter of fiscal year 2023 storage and transfer limitations on our paid product offerings, the extent and implementation of which varies depending on the tier. We cannot assure you that our customers will purchase our products, and if our end customers do not purchase our products, our revenues may grow more slowly than expected or decline.

Our operating results may fluctuate significantly, which could make our future results difficult to predict and could adversely affect the trading price of our Class A common stock.

Our operating results may vary significantly from period to period, which could adversely affect our business and financial condition. Our operating results have varied significantly from period to period in the past, and we expect that our operating results will continue to vary significantly in the future such that period-to-period comparisons of our operating results may not be meaningful. Accordingly, our financial results in any one quarter or fiscal year should not be relied upon as indicative of future performance. Our quarterly or annual financial results may fluctuate as a result of several factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to attract and retain new customers;
- the addition or loss of material customers, including through acquisitions or consolidations;
- the timing of recognition of revenues;
- the amount and timing of operating expenses related to the maintenance and expansion of our business, operations and infrastructure;
- general economic, industry and market conditions, in both domestic and our foreign markets, including inflation, rising interest rates, volatility of the global debt and equity markets, and instability in the global banking sector, the potential effects of health pandemics or epidemics global events, including the ongoing armed conflict in Ukraine;
- customer renewal rates;
- our ability to convert users of our free product offerings into subscribing customers;
- increases or decreases in the number of elements of our services or pricing changes upon any renewals of customer agreements;
- software development allocation decisions by customers;
- seasonal variations in sales of our products;
- the timing and success of new service introductions by us or our competitors or any other change in the competitive dynamics of our industry, including consolidation among competitors, customers or strategic partners;
- decisions by potential customers to use products of our competitors;
- the timing of expenses related to the development or acquisition of technologies or businesses and potential future charges for impairment of goodwill from acquired companies;

- extraordinary expenses such as litigation or other dispute-related settlement payments or outcomes;
- future accounting pronouncements or changes in our accounting policies or practices;
- negative media coverage or publicity;
- political events;
- the amount and timing of operating costs and capital expenditures related to the expansion of our business, in the U.S. and foreign markets;
- the cost to develop and upgrade The DevSecOps Platform to incorporate new technologies; and
- increases or decreases in our expenses caused by fluctuations in foreign currency exchange rates.

In addition, we experience seasonal fluctuations in our financial results as we typically receive a higher percentage of our annual orders from new customers, as well as renewal orders from existing customers, in our last two fiscal quarters as compared to the first two fiscal quarters due to the annual budget approval process of many of our customers, the timing of our customers' decisions to make a purchase, changes our customers experienced, or may experience, in their businesses, and other variables some of which are outside of our and our customers' control, such as macroeconomic and general economic conditions, including inflation and increased interest rates.

Any of the above factors, individually or in the aggregate, may result in significant fluctuations in our financial and other operating results from period to period. As a result of this variability, our historical operating results should not be relied upon as an indication of future performance. Moreover, this variability and unpredictability could result in our failure to meet our operating plan or the expectations of investors or analysts for any period. If we fail to meet such expectations for the reasons described above or any other reasons, our stock price could fall substantially.

We have experienced rapid growth in recent periods. If we fail to manage our growth effectively, we may be unable to execute our business plan, maintain high levels of service, or adequately address competitive challenges.

We have experienced a period of rapid growth in our operations and headcount. We anticipate that we will continue to expand our operations and responsibly grow our headcount in the near term. This growth has placed, and future growth will place, a significant strain on our management and administrative, operational and financial infrastructure. Our success will depend in part on our ability to manage this growth effectively. To manage the responsible growth of our operations, we will need to continue to improve our operational, financial and management controls and our reporting systems and procedures. Failure to effectively manage growth could result in difficulty or delays in deploying customers, declines in quality or customer satisfaction, increases in costs, difficulties in introducing new features or other operational difficulties, and any of these difficulties could adversely impact our business performance and results of operations. Furthermore, there is no assurance that our rate of growth will continue at its current pace, if at all. Our rate of growth may also be impacted as a result of global business or macroeconomic conditions, including inflation, rising interest rates, volatility of the global debt and equity markets, and instability in the global banking sector, and investment decisions by our customers.

We do not have an adequate history with our subscription or pricing models to accurately predict the long-term rate of customer subscription renewals or adoption, or the impact these renewals and adoption will have on our revenues or operating results.

We have limited experience with respect to determining the optimal prices for our services. As the markets for our services mature, or as new competitors introduce new products or services that are

similar to or compete with ours, we may be unable to attract new customers at the same price or based on the same pricing model as we have used historically. Moreover, some customers may demand greater price concessions or additional functionality at the same price levels. As a result, in the future we may be required to reduce our prices or provide more features without corresponding increases in price, which could adversely affect our revenues, gross margin, profitability, financial position and cash flow.

In addition, our customers have no obligation to renew their subscriptions for our services after the expiration of the initial subscription period. A majority of our subscriptions are on a one-year period. Our customers may renew for fewer elements of our services or negotiate for different pricing terms. We have limited historical data with respect to rates of customer subscription renewals, so we cannot accurately predict customer renewal rates. Our customers' renewal rates may decline or fluctuate as a result of a number of factors, including their dissatisfaction with our pricing or our services, their ability to continue their operations and spending levels, and changes in other technology components used within the customer's organization. Changes in product packaging, pricing strategy, or product offerings, or the implementation or execution of the foregoing, may not be seen favorably by our customers and may have an adverse effect on our ability to retain our current customers and acquire new ones. For example, we have discontinued our starter and bronze tier product offerings, and we recently implemented a price increase in our Premium tier product offering, which may cause customers who previously used these tiers to opt for our free version or to cease using our products completely. We may also decide to raise the prices of our product offerings in the future. If our customers do not renew their subscriptions on similar pricing terms, our revenues may decline, and our business could suffer. In addition, over time the average term of our contracts could change based on renewal rates or for other reasons.

The implementation of artificial intelligence (AI) and machine learning technologies in our services may result in reputational harm, liability, or other adverse consequences to our business operations.

We are implementing AI features, including generative AI features, throughout our services. The technologies underpinning these features are in the early stages of commercial use and exist in a nascent regulatory environment which presents regulatory, litigation, ethical, reputational, and financial risks.

Many states, regions, and supranational bodies, including the European Union, have proposed new regulations related to the use of AI and machine learning technologies. The final form of these may impose onerous obligations related to our development, offering, and use of AI technologies and expose us to an increased risk of regulatory enforcement and litigation.

Additionally, issues relating to intellectual property rights in AI-generated content have not been fully addressed by the courts, laws, or regulations. Accordingly, the implementation of generative AI technologies into our services may result in exposure to claims related to copyright infringement or other intellectual property misappropriation.

Furthermore, many of our generative AI features involve the processing of personal data and may be subject to laws, policies, legal obligations, and codes of conduct related to privacy and data protection. While there is current uncertainty about the extent to which privacy and data protection laws apply to AI technologies, any delay in addressing privacy or data protection concerns relating to our AI features may result in liability or regulatory investigations and fines, as well as damage to our sales and reputation. In addition, many of our AI features rely on third-party service providers and sub-processors with limited AI-related privacy and data protection practices. As such, any improper processing of personal data by these service providers and sub-processors could harm our reputation, business, or customers, or expose us to legal liability.

Our generative AI features may also generate output that is misleading, insecure, inaccurate, harmful, or otherwise flawed, which may harm our reputation, business, or customers, or expose us to legal liability.

Transparency is one of our core values. While we will continue to prioritize transparency, we must also promote "responsible" transparency as transparency can have unintended negative consequences.

Transparency is one of our core values. As an all-remote open-source software company, we believe transparency is essential to how we operate our business and interact with our team members, the community, and our customers. We also find it to be critical for team member recruitment, retention, efficiency and our culture. In addition, our transparency is highly valued by both our customers and our contributors. While we will continue to emphasize transparency, we also promote and educate our team members about responsible internal and external transparency, as openly sharing certain types of information can potentially lead to unintended, and sometimes negative, consequences.

As a result of our transparency, our competitors and other outside parties may have access to certain information that is often kept confidential or internal at other companies through our Handbook, our team members' open and public use of The DevSecOps Platform to run our business, and other avenues of communication we commonly use. The public availability of this information may allow our competitors to take advantage of certain of our innovations, and may allow parties to take other actions, including litigation, that may have an adverse impact on our operating results or cause reputational harm, which in turn may have a negative economic impact.

We are also subject to Regulation FD, which imposes restrictions on the selective disclosure of material information to stockholders and other market participants, and other regulations. While we have implemented internal controls to maintain compliance with Regulation FD, if as a result of our transparency, we disclose material information in a non-Regulation FD compliant matter, we may be subject to heightened regulatory and litigation risk.

The Handbook may not be up to date or accurate, which may result in negative third-party scrutiny or be used in ways that adversely affects our business.

Consistent with our commitment to our transparency and efficiency values, we maintain a publicly available company Handbook that contains important information about our operations and business practices. This Handbook is open to the public and may be used by our competitors or bad actors in malicious ways that may adversely affect our business, operating results, and financial condition. Although we aim to keep the Handbook updated, the information in the Handbook may not be up to date at all times. Also, because any of our team members can contribute to the Handbook, the information in the Handbook may not be accurate. We have implemented disclosure controls and procedures, including internal controls over financial reporting, that comply with the U.S. securities laws; however, if we fail to successfully maintain the appropriate controls, we may face unintended disclosures of material information about the company through our Handbook, which may lead to disclosure control failures, potential securities law violations, and reputational harm.

Security and privacy breaches may hurt our business.

The DevSecOps Platform processes, stores, and transmits our customers' proprietary and sensitive data, including personal data, and financial data. We also use third-party service providers and sub-processors to help us deliver services to our customers and their end-users. These vendors may store or process personal data, or other confidential information of our team members, our partners, our customers, or our customers' end-users. We collect such information from individuals located both in the United States and abroad and may store or process such information outside the country in which it was collected. While we, our third-party cloud providers, our third-party processors, and our customers have implemented security measures designed to protect against security breaches, these measures could fail or may be insufficient, resulting in the unauthorized access or disclosure, modification, misuse, destruction, or loss of our or our customers' data or other sensitive information. Any security breach of The DevSecOps Platform, our operational systems, physical facilities, or the systems of our third-party processors, or the perception that a breach has occurred, could result in litigation, indemnity obligations,

regulatory enforcement actions, investigations, compulsory audits, fines, penalties, mitigation and remediation costs, disputes, reputational harm, diversion of management's attention, and other liabilities and damage to our business. Even though we do not control the security measures of our customers and other third parties, we may be considered responsible for any breach of such measures or suffer reputational harm even where we do not have recourse to the third party that caused the breach, if it is found that GitLab failed to conduct comprehensive third party risk due diligence. In addition, any failure by our vendors to comply with applicable law or regulations could result in proceedings against us by governmental entities or others.

Security incidents compromising the confidentiality, integrity, and availability of our confidential or personal data and our third-party service providers' information technology systems could result from AI-related sensitive data exposure such as insufficient data anonymization during the training process, system misconfiguration, or from cyber-attacks, including denial-of-service attacks, reverse-engineering of AI algorithms, web scraping, ransomware attacks, business email compromises, computer malware, viruses, and social engineering (including phishing), which are prevalent in our industry and our customers' industries. Any security breach or disruption could result in the loss or destruction of or unauthorized access to, or use, alteration, disclosure, or acquisition of confidential and personal data, which may result in damage to our reputation, early termination of our contracts, litigation, regulatory investigations or other liabilities. If our, our customers', or our partners' security measures are breached as a result of third-party action, team member error, misconfiguration, malfeasance (including bribery) or otherwise and, as a result, someone obtains unauthorized access to the GitLab application or data, including personal and/or confidential information of our customers, our reputation could be damaged, our business may suffer loss of current customers and future opportunities and we could incur significant financial liability including fines, cost of recovery, and costs related to remediation measures.

Techniques used to obtain unauthorized access or to sabotage systems change frequently. As a result, we may be unable to fully anticipate these techniques or to implement adequate preventative measures. If an actual or perceived security breach occurs, the market perception of our security measures could be harmed, and we could lose sales and customers. If we are, or are perceived to be, not in compliance with data protection, consumer privacy, or other legal or regulatory requirements or operational norms bearing on the collection, processing, storage, or other treatment of data records, including personal data, our reputation and operating performance may suffer. Further, we need to continually monitor and remain compliant with all applicable changes in local, state, national, or international legal or regulatory requirements. Any significant violations of data privacy could result in the loss of business, litigation, and regulatory investigations and penalties that could damage our reputation and adversely impact our results of operations and financial condition.

We have contractual and legal obligations to notify relevant stakeholders of security breaches. Most jurisdictions have enacted laws requiring companies to notify affected individuals, regulatory authorities, and relevant others of security breaches involving certain types of data, including personal data. In addition, our agreements with certain customers and partners may require us to notify them in the event of a security breach. Such mandatory disclosures are costly, could lead to negative publicity, may cause our customers to lose confidence in the effectiveness of our security measures, and require us to expend significant capital and other resources to respond to or alleviate problems caused by the actual or perceived security breach.

A security breach may cause us to breach customer contracts. Our agreements with certain customers may require us to use industry-standard or reasonable measures to safeguard sensitive personal data or confidential information. A security breach could lead to claims by our customers, their end-users, or other relevant stakeholders that we have failed to comply with such legal or contractual obligations. As a result, we could be subject to legal action or our customers could end their relationships with us. There can be no assurance that any limitations of liability in our contracts would be enforceable or adequate or would otherwise protect us from liabilities or damages.

Litigation resulting from security breaches may adversely affect our business. Unauthorized access to The DevSecOps Platform, systems, networks, or physical facilities could result in litigation with our customers, our customers' end-users, or other relevant stakeholders. These proceedings could force us to spend money in defense or settlement, divert management's time and attention, increase our costs of doing business, or adversely affect our reputation. We could be required to fundamentally change our business activities and practices or modify The DevSecOps Platform capabilities in response to such litigation, which could have an adverse effect on our business. If a security breach were to occur, and the confidentiality, integrity or availability of our data or the data of our partners, our customers or our customers' end-users was disrupted, we could incur significant liability, or The DevSecOps Platform, systems, or networks may be perceived as less desirable, which could negatively affect our business and damage our reputation.

If we fail to detect or remediate a security breach in a timely manner, or a breach otherwise affects a large amount of data of one or more customers, or if we suffer a cyber-attack that impacts our ability to operate The DevSecOps Platform, we may suffer material damage to our reputation, business, financial condition, and results of operations. Further, while we maintain cyber insurance that may provide coverage for these types of incidents, such coverage may not be adequate to cover the costs and other liabilities related to these incidents. In addition, we cannot be sure that our existing insurance coverage and coverage for errors and omissions will continue to be available on acceptable terms or that our insurers will not deny coverage as to any future claim. Our risks are likely to increase as we continue to expand The DevSecOps Platform, grow our customer base, and process, store, and transmit increasingly large amounts of proprietary and confidential data.

We face heightened risk of security breaches because we use third-party open source technologies and incorporate a substantial amount of open source code in our products.

The DevSecOps Platform is built using open-source technology. Using or incorporating any third-party technology can become a vector for supply-chain cyber-attacks. Such attacks are prevalent in our industry and our customers' industries, and our use of open-source technology may, or may be perceived to, leave us more vulnerable to security attacks. We have previously been, and may in the future become, the target of cyber-attacks by third parties seeking unauthorized access to our or our customers' data or to disrupt our operations or ability to provide our services. If we are the target of cyber-attacks as a result of our use of open source code, it may substantially damage our reputation and adversely impact our results of operations and financial condition.

Customers may choose to stay on our free self-managed or SaaS product offerings instead of converting into a paying customer.

Our future success depends, in part, on our ability to convert users of our free self-managed or SaaS product offerings into paying customers by selling additional products, and by upselling additional subscription services. The total number of users of our free SaaS product may decline as a result of, or due to, our enforcement of user limits and our plan to implement in fiscal year 2024 storage and transfer limits for our free SaaS product offering. As a result of our investment in new capabilities and improvements to our free product offering, users of our free product may decline to purchase additional products or subscription services if they perceive the free product to be more attractive as compared to our paid offerings. Converting users of our free product offering may require increasingly sophisticated and costly sales efforts and may not result in additional sales. In addition, the rate at which our end-customers purchase additional products and services depends on a number of factors, including the perceived need for additional products and services, the limitations on the number of users and limitations on storage and transfers applicable to the free product offering as well as general economic conditions. If our efforts to sell additional products and services to our end-customers are not successful, our business may suffer.

We may not be able to respond to rapid technological changes with new solutions, which could have a material adverse effect on our operating results.

The DevSecOps market is characterized by rapid technological change, fluctuating price points, and frequent new product and service introductions. Our ability to increase our user base and increase revenue from existing customers will depend heavily on our ability to enhance and improve our existing solutions, introduce new features and products, both independently and in conjunction with third-party developers, reach new platforms and sell into new markets. Customers may require features and capabilities that our current solutions do not have. If we fail to develop solutions that satisfy customer preferences in a timely and cost-effective manner, we may fail to renew our subscriptions with existing customers and create or increase demand for our solutions, and our business may be materially and adversely affected.

The introduction of new services by competitors or the development of entirely new technologies to replace existing offerings could make our solutions obsolete or adversely affect our business. In addition, any new markets or countries into which we attempt to sell our solutions may not be receptive. We may experience difficulties with software development, design, or marketing that could delay or prevent our development, introduction, or implementation of new solutions and enhancements. We have in the past experienced delays in the planned release dates of new features and upgrades, and have discovered defects in new solutions after their introduction. There can be no assurance that new solutions or upgrades will be released according to schedule, or that when released they will not contain defects. Either of these situations could result in adverse publicity, loss of revenue, delay in market acceptance, or claims by customers brought against us, all of which could have a material adverse effect on our reputation, business, operating results, and financial condition. Moreover, upgrades and enhancements to our solutions may require substantial investment and we have no assurance that such investments will be successful. If users do not widely adopt enhancements to our solutions, we may not be able to realize a return on our investment. If we are unable to develop, license, or acquire enhancements to our existing solutions on a timely and cost-effective basis, or if such enhancements do not achieve market acceptance, our business, operating results, and financial condition may be adversely affected.

Failure to effectively expand our marketing and sales capabilities could harm our ability to increase our customer base and achieve broader market acceptance of our services.

Our ability to increase our customer base and achieve broader market acceptance of our services will depend to a significant extent on our ability to continue to expand our marketing and sales operations. We plan to continue expanding our sales force. We also plan to continue to dedicate significant resources to sales and marketing programs. We are expanding our marketing and sales capabilities to target additional potential customers, including some larger organizations, but there is no guarantee that we will be successful attracting and maintaining these businesses as customers, and even if we are successful, these efforts may divert our resources away from and negatively impact our ability to attract and maintain our current customer base. All of these efforts will require us to invest significant financial and other resources. If we are unable to find efficient ways to deploy our marketing spend or to hire, develop, and retain talent in numbers required to maintain and support our growth, if our new sales talent are unable to achieve desired productivity levels in a reasonable period of time, or if our sales and marketing programs are not effective, our ability to increase our customer base and achieve broader market acceptance of our services could be harmed.

Any failure to offer high-quality technical support services may adversely affect our relationships with our customers and our financial results.

Once our products are deployed, our customers depend on our technical support organization to resolve technical issues. We may be unable to respond quickly enough to accommodate short-term increases in customer demand for support services. We also may be unable to modify the format of our support services to compete with changes in support services provided by our competitors. Increased customer demand for these services, without corresponding revenues, could increase costs and adversely affect our operating results. In addition, our sales process is highly dependent on our services and business reputation and on positive recommendations from our existing customers. Any failure to maintain high-quality technical support, or a market perception that we do not maintain high-quality

support, could adversely affect our reputation, our ability to sell our services to existing and prospective customers, and our business, operating results and financial position.

Customers may demand more configuration and integration services, or customized features and functions that we do not offer, which could adversely affect our business and operating results.

Our current and future customers may demand more configuration and integration services, which increase our up-front investment in sales and deployment efforts, with no guarantee that these customers will increase the scope of their subscription. As a result of these factors, we may need to devote a significant amount of sales support and professional services resources to individual customers, increasing the cost and time required to complete sales. If prospective customers require customized features or functions that we do not offer, and that would be difficult for them to deploy themselves, then the market for our applications will be more limited and our business could suffer.

If we fail to adapt and respond effectively to rapidly changing technology, evolving industry standards, and changing customer needs, requirements, or preferences, our services may become less competitive.

Our industry is subject to rapid technological change, evolving industry standards and practices, and changing customer needs, requirements, and preferences. The success of our business will depend, in part, on our ability to adapt and respond effectively to these changes on a timely basis, including our ability to provide enhancements and new features for our existing services or new services that achieve market acceptance or that keep pace with rapid technological developments and the competitive landscape. The success of new services and enhancements depends on several factors, including the timely delivery, introduction, and market acceptance of such services. If we are unable to develop and sell new services that satisfy our customers and provide enhancements and new features for our existing services that keep pace with rapid technological and industry change, our revenue and operating results could be adversely affected. If new technologies emerge that are able to deliver competitive products at lower prices, more efficiently, more conveniently, or more securely, such technologies could adversely impact our ability to compete.

Our services must also integrate with a variety of network, hardware, mobile, cloud, and software platforms and technologies, including third-party AI services, and we need to continuously modify and enhance our services to adapt to changes and innovation in these technologies, including changes in internet-related hardware, operating systems, cloud computing infrastructure, and other software, communication, browser and open source technologies. If developers widely adopt new software platforms, we would have to develop new versions of our products to work with those new platforms. This development effort may require significant engineering, marketing, and sales resources, all of which would affect our business and operating results. Any failure of our services to operate effectively with future infrastructure platforms and technologies could reduce the demand for our products and significantly impair our revenue growth. We may not be successful in either developing these modifications and enhancements or in bringing them to market in a timely fashion. Furthermore, uncertainties about the timing and nature of new network platforms or technologies, or modifications to existing platforms or technologies, could increase our research and development expenses. If we are unable to respond to these changes in a timely or cost-effective manner, our services may become less marketable and less competitive or obsolete, which may result in customer dissatisfaction, and adversely affect our business.

If our services fail to perform properly, whether due to material defects with the software or external issues, our reputation could be adversely affected, our market share could decline, and we could be subject to liability claims.

Our products are inherently complex and may contain material defects, software “bugs” or errors. Any defects in functionality or operational procedures that cause interruptions in the availability of our products could result in:

- loss or delayed market acceptance and sales;
- loss of data;
- breach of warranty claims;
- sales credits or refunds for prepaid amounts related to unused subscription services;
- loss of customers;
- diversion of development and customer service resources;
- loss of operational time;
- destruction or compromised integrity of data and/or intellectual property; and
- injury to our reputation.

The costs incurred in correcting any material defects, software “bugs” or errors might be substantial and could adversely affect our operating results.

We rely on information technology systems to process, transmit and store electronic information. Our ability to effectively manage our business depends significantly on the reliability and capacity of these systems. The operation, success and growth of our business (whether now or in the future) depends on streamlined processes made available through information systems, global communications, internet activity, and other network processes. The future operation, success and growth of our business depends on streamlined processes made available through information systems, global communications, internet activity, and other network processes.

Our information technology systems may be subject to damage or interruption from telecommunications problems, data corruption, software errors, fire, flood, global pandemics and natural disasters, power outages, systems disruptions, system conversions, and/or human error. Our existing safety systems, data backup, access protection, user management and information technology emergency planning may not be sufficient to prevent data loss or long-term network outages. In addition, we may have to upgrade our existing information technology systems or choose to incorporate new technology systems from time to time in order for such systems to support the increasing needs of our expanding business. Costs and potential problems and interruptions associated with the implementation of new or upgraded systems and technology or with maintenance or adequate support of existing systems could disrupt or reduce the efficiency of our operations.

We may also encounter service interruptions due to issues interfacing with our customers’ IT systems, including stack misconfigurations or improper environment scaling, or due to cyber security attacks on ours or our customers’ IT systems. Any such service interruption may have an adverse impact on our reputation and future operating results.

Because of the (nature and importance of the data) that our customers collect and manage by means of our services, it is possible that failures or errors in our systems could result in data loss or corruption, or cause the information that we or our customers collect to be incomplete or contain inaccuracies that our customers regard as material. Furthermore, the availability or performance of our products could be adversely affected by a number of factors, including customers’ inability to access the internet, the failure of our network or software systems, security breaches, or variability in user traffic for our services. We may be required to issue credits or refunds for prepaid amounts related to unused services or otherwise be liable to our customers for damages they may incur resulting from certain of these events. For example, our customers access our products through their internet service providers. If a service provider fails to provide sufficient capacity to support our products, otherwise experiences service outages, or intentionally or unintentionally restricts or limits our ability to send, deliver, or receive electronic communications or provide services, such failure could interrupt our customers’ access to our products,

adversely affect their perception of our products' reliability and reduce our revenues. In addition to potential liability, if we experience interruptions in the availability of our products or services, our reputation could be adversely affected and we could lose customers. Our production systems might not be sufficiently resilient against regional outages and recovery from such an outage might take an extended period of time. Further, while we have in place a data recovery plan, our data backup systems might fail and our data recovery plans may be insufficient to fully recover all of ours or our customers' data hosted on our system.

While we currently maintain errors and omissions insurance, it may be inadequate or may not be available in the future on acceptable terms, or at all. In addition, our policy may not cover all claims made against us and defending a suit, regardless of its merit, could be costly and divert management's attention.

Our channel partners may provide a poor experience to customers putting our brand or company growth at risk. Channel partners may deliver poor services or a poor selling experience delaying customer purchase or hurting the company brand.

In addition to our direct sales force, we use channel partners to sell and support our products. Channel partners may become an increasingly important aspect of our business, particularly with regard to enterprise, governmental, and international sales. Our future growth in revenue and ability to achieve and sustain profitability may depend in part on our ability to identify, establish, and retain successful channel partner relationships in the United States and internationally, which will take significant time and resources and involve significant risk. If we are unable to maintain our relationships with these channel partners, or otherwise develop and expand our indirect distribution channel, our business, operating results, financial condition, or cash flows could be adversely affected.

We cannot be certain that we will be able to identify suitable indirect sales channel partners. To the extent we do identify such partners, we will need to negotiate the terms of a commercial agreement with them under which the partner would distribute The DevSecOps Platform. We cannot be certain that we will be able to negotiate commercially-attractive terms with any channel partner, if at all. In addition, all channel partners must be trained to distribute The DevSecOps Platform and must allocate appropriately skilled resources to the customers. In order to develop and expand our distribution channel, we must develop and improve our processes for channel partner introduction and training. If we do not succeed in identifying suitable indirect sales channel partners, our business, operating results, and financial condition may be adversely affected.

We also cannot be certain that we will be able to maintain successful relationships with any channel partners and, to the extent that our channel partners are unsuccessful in selling our products, our ability to sell our products and our business, operating results, and financial condition could be adversely affected. Our channel partners may offer customers the products and services of several different companies, including products and services that compete with our products. Because our channel partners generally do not have an exclusive relationship with us, we cannot be certain that they will prioritize or provide adequate resources to sell our products. Moreover, divergence in strategy by any of these channel partners may materially adversely affect our ability to develop, market, sell, or support our products. We cannot assure you that our channel partners will continue to cooperate with us. In addition, actions taken or omitted to be taken by such parties may adversely affect us. In addition, we rely on our channel partners to operate in accordance with the terms of their contractual agreements with us. For example, our agreements with our channel partners limit the terms and conditions pursuant to which they are authorized to resell or distribute our products and offer technical support and related services. We also typically require our channel partners to represent to us the dates and details of products sold through to our customers. If our channel partners do not comply with their contractual obligations to us, our business, operating results, and financial condition may be adversely affected.

We track certain performance metrics with internal tools and data models and do not independently verify such metrics. Certain of our performance metrics are subject to inherent challenges in measurement, and real or perceived inaccuracies in such metrics may harm our reputation and negatively affect our business.

Our internal tools and data models have a number of limitations and our methodologies for tracking these metrics may change over time, which could result in unexpected changes to our metrics, including the metrics we report. We calculate and track performance metrics with internal tools, which are not independently verified by any third party. While we believe our metrics are reasonable estimates of our customer base for the applicable period of measurement, the methodologies used to measure these metrics require significant judgment and may be susceptible to algorithmic or other technical errors. For example, the accuracy and consistency of our performance metrics may be impacted by changes to internal assumptions regarding how we account for and track customers, limitations on system implementations, and limitations on the ability of third-party tools to match our database. If the internal tools we use to track these metrics undercount or overcount performance or contain algorithmic or other technical errors, the data we report may not be accurate. In addition, limitations or errors with respect to how we measure data (or the data that we measure) may affect our understanding of certain details of our business, which could affect our longer-term strategies. If our performance metrics are not accurate representations of our business, user base, or traffic levels; if we discover material inaccuracies in our metrics; or if the metrics we rely on to track our performance do not provide an accurate measurement of our business, our reputation may be harmed, we may be subject to legal or regulatory actions, and our operating and financial results could be adversely affected.

We rely to a significant degree on a number of independent open source contributors, to develop and enhance the open source technologies we use to provide our products and services.

In our development process we rely upon numerous open core software programs which are outside of our direct control. Members of corresponding leadership committees and core teams, many of whom are not employed by us, are primarily responsible for the oversight and evolution of the codebases of these open source technologies. If the project committees and contributors fail to adequately further develop and enhance open source technologies, or if the leadership committees fail to oversee and guide the evolution of the open source technologies in the manner that we believe is appropriate to maximize the market potential of our offerings, then we would have to rely on other parties, or we would need to expend additional resources, to develop and enhance our offerings. We also must devote adequate resources to our own internal contributors to support their continued development and enhancement of open source technologies, and if we do not do so, we may have to turn to third parties or experience delays in developing or enhancing open source technologies. We cannot predict whether further developments and enhancements to these technologies will be available from reliable alternative sources. In either event, our development expenses could be increased, and our technology release and upgrade schedules could be delayed. Delays in developing, completing, or delivering new or enhanced offerings could cause our offerings to be less competitive, impair customer acceptance of our offerings and result in delayed or reduced revenue for our offerings.

Our failure or inability to protect our intellectual property rights, or claims by others that we are infringing upon or unlawfully using their intellectual property, could diminish the value of our brand and weaken our competitive position, and adversely affect our business, financial condition, operating results, and prospects.

We currently rely on a combination of copyright, trademark, trade secret, and unfair competition laws, as well as confidentiality agreements and procedures and licensing arrangements, to establish and protect our intellectual property rights. We have devoted substantial resources to the development of our proprietary technologies and related processes. In order to protect our proprietary technologies and processes, we rely in part on trade secret laws and confidentiality agreements with our team members, licensees, independent contractors, commercial partners, and other advisors. These agreements may not effectively prevent disclosure of confidential information and may not provide an adequate remedy in the

event of unauthorized disclosure of confidential information. We cannot be certain that the steps taken by us to protect our intellectual property rights will be adequate to prevent infringement of such rights by others. Additionally, the process of obtaining patent or trademark protection is expensive and time-consuming, and we may not be able to prosecute all necessary or desirable patent applications or apply for all necessary or desirable trademark applications at a reasonable cost or in a timely manner. Moreover, intellectual property protection may be unavailable or limited in some foreign countries where laws or law enforcement practices may not protect our intellectual property rights as fully as in the United States, and it may be more difficult for us to successfully challenge the use of our intellectual property rights by other parties in these countries. Costly and time-consuming litigation could be necessary to enforce and determine the scope of our proprietary rights, and our failure or inability to obtain or maintain trade secret protection or otherwise protect our proprietary rights could adversely affect our business.

We may in the future be subject to intellectual property infringement claims and lawsuits in various jurisdictions, and although we are diligent in our efforts to protect our intellectual property we cannot be certain that our products or activities do not violate the patents, trademarks, or other intellectual property rights of third-party claimants. Companies in the technology industry and other patent, copyright, and trademark holders seeking to profit from royalties in connection with grants of licenses own large numbers of patents, copyrights, trademarks, domain names, and trade secrets and frequently commence litigation based on allegations of infringement, misappropriation, or other violations of intellectual property or other rights. As we face increasing competition and gain an increasingly high profile, the likelihood of intellectual property rights claims against us may grow.

Further, from time to time, we may receive letters from third parties alleging that we are infringing upon their intellectual property rights or inviting us to license their intellectual property rights. Our technologies and other intellectual property may be found to infringe upon such third-party rights, and such successful claims against us could result in significant monetary liability, prevent us from selling some of our products and services, or require us to change our branding. In addition, resolution of claims may require us to redesign our products, license rights from third parties at a significant expense, or cease using those rights altogether. We may in the future bring claims against third parties for infringing our intellectual property rights. Costs of supporting such litigation and disputes may be considerable, and there can be no assurances that a favorable outcome will be obtained. Patent infringement, trademark infringement, trade secret misappropriation, and other intellectual property claims and proceedings brought against us or brought by us, whether successful or not, could require significant attention of our management and resources and have in the past and could further result in substantial costs, harm to our brand, and have an adverse effect on our business.

Our open source and source code-available business model makes our software vulnerable to authorized and unauthorized distribution and sale.

We license many significant components of our software under permissive open source software licenses which grant licensees broad permissions to use, copy, modify, and distribute the covered software. Under these licenses, third parties are entitled to distribute and sell the covered software without payment to us.

Features available on our paid tiers are source code-available subject to a proprietary software license. This proprietary license prohibits, amongst other things, distribution and sale of the covered software. Notwithstanding these prohibitions, by virtue of the source code's being publicly available, the covered software is vulnerable to unauthorized distribution and sale by third parties.

We are or may be the defendant in lawsuits or other claims that could cause us to incur substantial liabilities.

We have from time to time been, and are likely to in the future become, defendants in actual or threatened lawsuits brought by or on behalf of our current and former team members, competitors, vendors, governmental or regulatory bodies, or third parties who use The DevSecOps Platform. In

addition, our agreements sometimes include indemnification provisions which can subject us to costs and damages in the event of a claim against an indemnified third party. In either case, the various claims in such lawsuits may include, among other things, negligence or misconduct in the operation of our business and provision of services, intellectual property infringement, unfair competition, or violation of employment or privacy laws or regulations. Such suits may seek, as applicable, direct, indirect, consequential, punitive or other penalties or monetary damages, injunctive relief, and/or attorneys' fees. Litigation is inherently unpredictable, and it is not possible to predict the outcome of any such lawsuits, individually or in the aggregate. However, these lawsuits may consume substantial amounts of our financial and managerial resources and might result in adverse publicity, regardless of the ultimate outcome of the lawsuits. In addition, we and our subsidiaries may become subject to similar lawsuits in the same or other jurisdictions. An unfavorable outcome with respect to these lawsuits and any future lawsuits could, individually or in the aggregate, cause us to incur substantial liabilities that may have a material adverse effect upon our business, financial condition or results of operations. In addition, an unfavorable outcome in one or more of these cases could cause us to change our compensation plans for our team members, which could have a material adverse effect upon our business. Further, while we maintain insurance that may provide coverage for these types of lawsuits and other claims, such coverage may not be adequate to cover the related costs and other liabilities.

We may engage in merger and acquisition activities and joint ventures, which could require significant management attention, disrupt our business, dilute stockholder value, and adversely affect our operating results.

As part of our business strategy, we may make investments in other companies, products, or technologies and may seek to acquire other companies, products, or technologies in the future. We may not be able to find suitable acquisition candidates and we may not be able to complete acquisitions on favorable terms, if at all. Even if we complete acquisitions or joint ventures, we may not ultimately strengthen our competitive position or achieve our goals, and any acquisitions or joint ventures we complete could be viewed negatively by users or investors. In addition, if we fail to successfully integrate such acquisitions, or the assets, technologies or talent associated with such acquisitions, into our company, we may have depleted the company's capital resources without attractive returns, and the revenue and operating results of the combined company could be adversely affected.

Acquisitions and joint ventures may disrupt our ongoing operations, divert management from their primary responsibilities, dilute our corporate culture, subject us to additional liabilities, increase our expenses, and adversely impact our business, financial condition, operating results, and cash flows. We may not successfully evaluate or utilize the acquired technology and accurately forecast the financial impact of an acquisition transaction, including accounting charges. We may have to pay cash, incur debt, or issue equity securities to pay for any such acquisition or joint venture, each of which could affect our financial condition or the value of our capital stock and could result in dilution to our stockholders. If we incur more debt it would result in increased fixed obligations and could also subject us to covenants or other restrictions that would impede or may be beyond our ability to manage our operations. Additionally, we may receive indications of interest from other parties interested in acquiring some or all of our business. The time required to evaluate such indications of interest could require significant attention from management, disrupt the ordinary functioning of our business, and adversely affect our operating results.

If our estimates or judgments relating to our critical accounting policies prove to be incorrect, our operating results could be adversely affected.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, as described in the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations" included elsewhere in this Quarterly Report on Form 10-Q. The results of these estimates form the basis for making judgments about the carrying values of assets, liabilities, and equity, and the amount of revenue

and expenses that are not readily apparent from other sources. Significant assumptions and estimates used in preparing our condensed consolidated financial statements include those related to revenue recognition, deferred contract acquisition costs, income taxes, business combination, stock-based compensation and common stock valuations. Our operating results may be adversely affected if our assumptions change or if actual circumstances differ from those in our assumptions, which could cause our operating results to fall below the expectations of securities analysts and investors, resulting in a decline in the price of our common stock.

Adverse tax laws or regulations could be enacted or existing laws could be applied to us or our customers, which could increase the costs of our services and adversely impact our business.

The application of federal, state, local, and international tax laws to services provided electronically is evolving. New sales, use, value-added tax, digital service or other tax laws, statutes, rules, regulations or ordinances could be enacted at any time (possibly with retroactive effect), and could be applied solely or disproportionately to services provided over the internet. If we are unsuccessful in collecting such taxes from our customers, we could be held liable for such costs, thereby adversely impacting our operating results and cash flows. Moreover, we are subject to the examination of our sales, use, and value-added tax returns by U.S. state and foreign tax authorities. We regularly assess the likelihood of outcomes resulting from these examinations and have reserved for potential adjustments that may result from these examinations. We cannot provide assurance that the final determination of these examinations will not have an adverse effect on our financial position and results of operations.

The termination of our relationship with our payment solutions providers could have a severe, negative impact on our ability to collect revenue from customers.

All web direct customers purchase our solution using online payment solutions such as credit cards, which represent the majority of the payment transactions we receive, and our business depends upon our ability to offer such payment options. The termination of our ability to process payments on any material payment option would significantly impair our ability to operate our business and significantly increase our administrative costs related to customer payment processing. If we fail to maintain our compliance with the data protection and documentation standards adopted by our payment processors and applicable to us, these processors could terminate their agreements with us, and we could lose our ability to offer our customers a credit card or other payment option. If these processors increase their payment processing fees because we experience excessive chargebacks or refunds or for other reasons, it could adversely affect our business and operating results. Increases in payment processing fees would increase our operating expense and adversely affect our operating results.

We process, store and use personal data and other data, which subjects us to governmental regulation and other legal obligations, including in the United States, the European Union, or the E.U., the United Kingdom, or the U.K., Canada, and Australia, related to privacy, and our actual or perceived failure to comply with such laws, regulations and contractual obligations could result in significant liability and reputational harm.

We receive, store and process personal data and other customer data. There are numerous federal, state, local and foreign laws regarding privacy and the storing, sharing, access, use, processing, disclosure and protection of personal data, personal data and other customer data, the scope of which are changing, subject to differing interpretations, and which may be inconsistent among countries or conflict with other rules.

With respect to E.U. and U.K. team members, contractors and other personnel, as well as for our customers' and prospective customers' personal data, such as contact and business information, we are subject to the E.U. General Data Protection Regulation, or the GDPR, and applicable national implementing legislation of the GDPR, and the U.K. General Data Protection Regulation and U.K. Data Protection Act 2018, or the U.K. GDPR, respectively. We are a controller with respect to this data.

The GDPR and U.K. GDPR impose stringent data protection requirements and, where we are acting as a controller, includes requirements to: provide detailed disclosures about how personal data is collected and processed (in a concise, intelligible and easily accessible form); demonstrate that an appropriate legal basis is in place or otherwise exists to justify data processing activities; grant rights for data subjects in regard to their personal data including the right to be “forgotten,” the right to data portability and data subject access requests; notify data protection regulators or supervisory authorities (and in certain cases, affected individuals) of significant data breaches; define pseudonymized (key-coded) data; limit the retention of personal data; maintain a record of data processing; and comply with the principle of accountability and the obligation to demonstrate compliance through policies, procedures, training and audit. Where we act as a processor and process personal data on behalf of our customers, we are required to execute mandatory data processing clauses with those customers and maintain a record of data processing, among other requirements under the GDPR and U.K. GDPR. The GDPR and U.K. GDPR provide for penalties for noncompliance of up to the greater of €20 million or 4% of worldwide annual revenues (in the case of the GDPR) or £17 million and 4% of worldwide annual revenue (in the case of the U.K. GDPR). As we are required to comply with both the GDPR and the U.K. GDPR, we could be subject to parallel enforcement actions with respect to breaches of the GDPR or U.K. GDPR which affects both E.U. and U.K. data subjects. In addition to the foregoing, a breach of the GDPR or U.K. GDPR could result in regulatory investigations, reputational damage, orders to cease or change our processing of our personal data, enforcement notices, and/or assessment notices (for a compulsory audit). We may also face civil claims including representative actions and other class action type litigation (where individuals have suffered harm), potentially amounting to significant compensation or damages liabilities, as well as associated costs, diversion of internal resources, and reputational harm.

The GDPR and U.K. GDPR requires, among other things, that personal data only be transferred outside of the European Economic Area, or the E.E.A., or the U.K., respectively, to jurisdictions that have not been deemed adequate by the European Commission or by the U.K. data protection regulator, respectively, including the United States, if certain safeguards are taken to legitimize those data transfers. Recent legal developments in the E.U. have created complexity and uncertainty regarding such transfers. For example, on July 16, 2020, the European Court of Justice, or the CJEU, invalidated the E.U.-U.S. Privacy Shield framework, or the Privacy Shield. Further, the CJEU also advised that the Standard Contractual Clauses (a standard form of contract approved by the European Commission as an adequate personal data transfer mechanism and potential alternative to the Privacy Shield) were not alone sufficient to protect data transferred to the United States or other countries not deemed adequate. On July 10, 2023, the European Commission entered into force the E.U.-U.S. Data Privacy Framework, or the DPF, as a successor framework to the Privacy Shield. Under the DPF, certified U.S.-based organizations may receive transfers of personal data from the E.E.A. and the U.K. However, there are uncertainties regarding the long-term viability of the DPF due to proposed legal challenges to the framework before the CJEU. Thus, the Standard Contractual Clauses will remain an important data transfer mechanism for transfers to countries outside of the E.E.A. and the U.K., but the use of Standard Contractual Clauses must still be assessed on a case-by-case basis taking into account the legal regime applicable in the destination country, in particular applicable surveillance laws and rights of individuals, and additional measures and/or contractual provisions may need to be put in place. The European Data Protection Board issued additional guidance regarding the CJEU's decision in November 2020, which imposes higher burdens on the use of data transfer mechanisms, such as the Standard Contractual Clauses, for cross-border data transfers. The CJEU also stated that if a competent supervisory authority believes that the standard contractual clauses cannot be complied with in the destination country and that the required level of protection cannot be secured by other means, such supervisory authority is under an obligation to suspend or prohibit that transfer. Since the decision by the CJEU, Supervisory Authorities, including the CNIL and the Austrian Data Protection Authority, are now looking at cross-border transfers more closely, and have publicly stated in January 2022 that the transfer of data to the United States using certain analytics tools is illegal. While these decisions related specifically to analytics tools and may be inapplicable to organizations certified under the DPF, it has been suggested that it is far-reaching and applies to any transfer of E.U. personal data to the United States. We will continue to monitor this, and evaluate and utilize, where appropriate, all data transfer mechanisms available to us, but this may require

the removal of tools from our services and websites where data is transferred from the E.U. to the U.S., or impact the manner in which we provide our services, which could adversely affect our business. In addition, if participation in the DPF is deemed appropriate, then we would be required to update documentation and processes, which may result in further compliance costs.

In addition, following the U.K.'s withdrawal from the E.U., the E.U. issued an adequacy decision in June 2021 in favor of the U.K. permitting data transfers from the E.U. to the U.K. However, this adequacy decision is subject to a four-year term, and the E.U. could intervene during the term if it determines that the data protection laws in the U.K. are not sufficient. If the adequacy decision is not renewed after its term, or the E.U. intervenes during the term, data may not be able to flow freely from the E.U. to the U.K. unless additional measures are taken. In which case, we may be required to find alternative solutions for the compliant transfer of personal data into the U.K. from the E.U. As supervisory authorities continue to issue further guidance on personal data (including regarding data export and circumstances in which we cannot use the standard contractual clauses), we could suffer additional costs, complaints, or regulatory investigations or fines, and if we are otherwise unable to transfer personal data between and among countries and regions in which we operate, it could affect the manner in which we provide our services, the geographical location or segregation of our relevant systems and operations, and could adversely affect our financial results. Loss, retention or misuse of certain information and alleged violations of laws and regulations relating to privacy and data security, and any relevant claims, may expose us to potential liability and may require us to expend significant resources on data security and in responding to and defending such allegations and claims.

We are also subject to evolving E.U. and U.K. privacy laws on cookies and e-marketing. In the E.U. and the U.K., regulators are increasingly focusing on compliance with requirements in the online behavioral advertising ecosystem, and current national laws that implement the ePrivacy Directive are highly likely to be replaced by an E.U. regulation known as the ePrivacy Regulation which will significantly increase fines for non-compliance. In the E.U. and the U.K., informed consent is required for the placement of a cookie or similar technologies on a user's device and for direct electronic marketing. The U.K. GDPR also imposes conditions on obtaining valid consent, such as a prohibition on pre-checked consents and a requirement to ensure separate consents are sought for each type of cookie or similar technology. While the text of the ePrivacy Regulation is still under development, a recent European court decision and regulators' recent guidance are driving increased attention to cookies and tracking technologies. If regulators start to enforce the strict approach in recent guidance, this could lead to substantial costs, limit the effectiveness of our marketing activities, divert the attention of our technology personnel, adversely affect our margins, increase costs and subject us to additional liabilities. Regulation of cookies and similar technologies, and any decline of cookies or similar online tracking technologies as a means to identify and potentially target users, may lead to broader restrictions and impairments on our marketing and personalization activities and may negatively impact our efforts to understand users.

We depend on a number of third parties in relation to the operation of our business, a number of which process personal data on our behalf or as our sub-processor. To the extent required by applicable law, we attempt to mitigate the associated risks of using third parties by performing security assessments and detailed due diligence, entering into contractual arrangements to ensure that providers only process personal data according to our instructions or equivalent instructions to the instructions of our customer (as applicable), and that they have sufficient technical and organizational security measures in place. Where we transfer personal data outside the E.U. or the U.K. to such third parties, we do so in compliance with the relevant data export requirements, as described above. There is no assurance that these contractual measures and our own privacy and security-related safeguards will protect us from the risks associated with the third-party processing, storage and transmission of such information. Any violation of data or security laws by our third-party processors could have a material adverse effect on our business and result in the fines and penalties under the GDPR and the U.K. GDPR outlined above.

Additionally, we are subject to the California Consumer Privacy Act, or the CCPA, which came into effect in 2020 and increases privacy rights for California consumers and imposes obligations on companies that process their personal data. The CCPA requires covered companies to, among other

things, provide new disclosures to California consumers and affords such consumers new privacy rights such as the ability to opt out of certain sales of personal data and expanded rights to access and require deletion of their personal data, opt out of certain personal data sharing, and receive detailed information about how their personal data is collected, used and shared. The CCPA provides for civil penalties for violations, as well as a private right of action for security breaches that may increase the likelihood of, and the risks associated with, security breach litigation. Additionally, in November 2020, California passed the California Privacy Rights Act, or the CPRA, which expands the CCPA significantly, including by expanding consumers' rights with respect to certain personal data and creating a new state agency to oversee implementation and enforcement efforts, potentially resulting in further uncertainty and requiring us to incur additional costs and expenses in an effort to comply. Many of the CPRA's provisions became effective on January 1, 2023. Further, Virginia enacted the Virginia Consumer Data Protection Act, or the VCDPA, another comprehensive state privacy law, that became effective January 1, 2023. Similarly, three other states have enacted comprehensive state privacy laws: Connecticut enacted the Connecticut Data Privacy Act, or the CTDPA, effective July 1, 2023; Colorado enacted the Colorado Privacy Act, or the CPA, effective July 1, 2023; Utah enacted the Utah Consumer Privacy Act, or the UCPA, effective December 31, 2023. The CCPA, CPRA, VCDPA, CTDPA, CPA and UCPA may increase our compliance costs and potential liability, particularly in the event of a data breach, and could have a material adverse effect on our business, including how we use personal data, our financial condition, the results of our operations or prospects. The CCPA has also prompted a number of proposals for new federal and state privacy legislation that, if passed, could increase our potential liability, increase our compliance costs and adversely affect our business. Changing definitions of personal data and information may also limit or inhibit our ability to operate or expand our business, including limiting strategic partnerships that may involve the sharing of data. Also, some jurisdictions require that certain types of data be retained on servers within these jurisdictions. Our failure to comply with applicable laws, directives, and regulations may result in enforcement action against us, including fines, and damage to our reputation, any of which may have an adverse effect on our business and operating results.

We are also currently subject to China's Personal Information Protection Law, or PIPL, which came into effect in November 2021 and which increases the protections of Chinese residents. In particular, the law is intended to protect the rights and interests of individuals, to regulate personal data processing activities, to safeguard the lawful and "orderly flow" of data, and to facilitate reasonable use of personal data. Our failure to comply with the PIPL may result in enforcement action against us, including fines, and damage to our reputation, any of which may have an adverse effect on our business and operating results. Also, the Cyberspace Administration of China has developed measures to govern cross-border transfers of personal data, such as security assessments, certifications, and standard contractual clauses, all of which may impact our ability to transact with customers with operations in China. To reduce the impact of PIPL, we are in the process of transitioning certain users who are resident in China to our JiHu entity.

Further, we are subject to Payment Card Industry Data Security Standard, or PCI-DSS, a security standard applicable to companies that collect, store or transmit certain data regarding credit and debit cards, holders and transactions. We rely on vendors to handle PCI-DSS matters and to ensure PCI-DSS compliance. Despite our compliance efforts, we may become subject to claims that we have violated the PCI-DSS based on past, present, and future business practices. Our actual or perceived failure to comply with the PCI-DSS can subject us to fines, termination of banking relationships, and increased transaction fees. In addition, there is no guarantee that PCI-DSS compliance will prevent illegal or improper use of our payment systems or the theft, loss or misuse of payment card data or transaction information.

We generally seek to comply with industry standards and are subject to the terms of our privacy policies and privacy-related obligations to third parties. We strive to comply with all applicable laws, policies, legal obligations and industry codes of conduct relating to privacy and data protection to the extent possible. However, it is possible that these obligations may be interpreted and applied in a manner that is inconsistent from one jurisdiction to another and may conflict with other rules or our practices. Any failure or perceived failure by us to comply with applicable privacy and data security laws and regulations,

our privacy policies, or our privacy-related obligations to users or other third parties, or any compromise of security that results in the unauthorized release or transfer of personal data or other customer data, may result in governmental enforcement actions, litigation, or public statements against us by consumer advocacy groups or others and could cause our users to lose trust in us, which would have an adverse effect on our reputation and business. It is possible that a regulatory inquiry might result in changes to our policies or business practices. Violation of existing or future regulatory orders or consent decrees could subject us to substantial monetary fines and other penalties that could negatively affect our financial condition and operating results. In addition, it is possible that future orders issued by, or enforcement actions initiated by, regulatory authorities could cause us to incur substantial costs or require us to change our business practices in a manner materially adverse to our business.

Any significant change to applicable laws, regulations or industry practices regarding the use or disclosure of our users' data, or regarding the manner in which the express or implied consent of users for the use and disclosure of such data is obtained – or in how these applicable laws, regulations or industry practices are interpreted and enforced by state, federal and international privacy regulators – could require us to modify our services and features, possibly in a material manner, may subject us to regulatory enforcement actions and fines, and may limit our ability to develop new services and features that make use of the data that our users voluntarily share with us.

We are subject to various governmental export controls, trade sanctions, and import laws and regulations that could impair our ability to compete in international markets or subject us to liability if we violate these controls.

In some cases, our software is subject to export control laws and regulations, including the Export Administration Regulations administered by the U.S. Department of Commerce, and our activities may be subject to trade and economic sanctions, including those administered by the United States Department of the Treasury's Office of Foreign Assets Control, or OFAC, and collectively, Trade Controls. As such, a license may be required to export or re-export our products, or provide related services, to certain countries and end-users, and for certain end-uses. For example, the recent Trade Controls targeting Russia and Belarus, impose a license requirement for the export of our product to those countries and have sanctioned various entities and individuals located there. Those Trade Controls, which are unprecedented and expansive, continue to evolve and further restrict our ability to do business in that region. Processing payments from those customers, even when legally permissible, has become very difficult, in part because most U.S. and E.U. banks are unwilling to facilitate those transactions. Further, our products incorporating encryption functionality may be subject to special controls applying to encryption items and/or certain reporting requirements.

We have procedures in place designed to ensure our compliance with Trade Controls, with which failure to comply could subject us to both civil and criminal penalties, including substantial fines, possible incarceration of responsible individuals for willful violations, possible loss of our export or import privileges, and reputational harm. We are currently working to enhance these procedures. Trade Controls are complex and dynamic regimes, and monitoring and ensuring compliance can be challenging, particularly given that our products are widely distributed throughout the world and are available for download without registration. Prior to implementing certain control procedures, we inadvertently exported our software to entities located in embargoed countries and listed on denied parties lists administered by the U.S. Department of Commerce's Bureau of Industry and Security, or BIS, and OFAC. In September 2019, we disclosed these apparent violations to BIS and OFAC, which resulted in a BIS Warning Letter and an OFAC Cautionary Letter, in January and February 2020, respectively. While BIS and OFAC did not assess any penalties, we understand that BIS and OFAC may consider our regulatory history, including these prior disclosures and warning/cautionary letters, if the company is involved in a future enforcement case for failure to comply with export control laws and regulations. Any future failure by us or our partners to comply with applicable laws and regulations would have negative consequences for us, including reputational harm, government investigations, and penalties.

In addition, various countries regulate the import of certain encryption technology, including through import permit and license requirements, and have enacted laws that could limit our ability to distribute our products or could limit our end-customers' ability to implement our products in those countries. Changes in our products or changes in export and import regulations in such countries may create delays in the introduction of our products into international markets, prevent our end-customers with international operations from deploying our products globally or, in some cases, prevent or delay the export or import of our products to certain countries, governments, or persons altogether. Any change in export or import laws or regulations, economic sanctions or related legislation, shift in the enforcement or scope of existing export, import or sanctions laws or regulations, or change in the countries, governments, persons, or technologies targeted by such export, import or sanctions laws or regulations, could result in decreased use of our products by, or in our decreased ability to export or sell our products to, existing or potential end-customers with international operations. Any decreased use of our products or limitation on our ability to export to or sell our products in international markets could adversely affect our business, financial condition, and results of operations.

Failure to comply with anti-bribery, anti-corruption, anti-money laundering laws, and similar laws, could subject us to penalties and other adverse consequences.

We are subject to the U.S. Foreign Corrupt Practices Act of 1977, as amended, or the FCPA, the U.S. domestic bribery statute contained in 18 U.S.C. § 201, the U.S. Travel Act, the USA PATRIOT Act, the United Kingdom Bribery Act 2010 and possibly other anti-bribery and anti-money laundering laws in countries outside of the United States in which we conduct our activities. Anti-corruption and anti-bribery laws have been enforced aggressively in recent years and are interpreted broadly to generally prohibit companies, their team members, and their third-party intermediaries from authorizing, offering, or providing, directly or indirectly, improper payments or benefits to recipients in the public or private sector.

We sometimes leverage third parties to sell our products and services and conduct our business abroad. We and our third-party intermediaries may have direct or indirect interactions with officials and employees of government agencies or state-owned or affiliated entities and may be held liable for the corrupt or other illegal activities of these third-party business partners and intermediaries, our team members, representatives, contractors, partners, and agents, even if we do not explicitly authorize such activities. We cannot assure you that all of our team members and agents will not take actions in violation of applicable law, for which we may be ultimately held responsible. As we increase our international sales and business, our risks under these laws may increase.

Any allegations or actual violation of the FCPA or other applicable anti-bribery, anti-corruption laws, and anti-money laundering laws could result in whistleblower complaints, sanctions, settlements, prosecution, enforcement actions, fines, damages, adverse media coverage, investigations, loss of export privileges, severe criminal or civil sanctions, or suspension or debarment from U.S. government contracts, all of which may have an adverse effect on our reputation, business, results of operations, and prospects. Responding to any investigation or action will likely result in a materially significant diversion of management's attention and resources and significant defense costs and other professional fees. In addition, the U.S. government may seek to hold us liable for successor liability for FCPA violations committed by companies in which we invest or that we acquire. As a general matter, investigations, enforcement actions and sanctions could harm our reputation, business, results of operations, and financial condition.

A portion of our revenue is generated by sales to government entities, which are subject to a number of challenges and risks.

Sales to government entities are subject to a number of risks. Selling to government entities can be highly competitive, expensive, and time-consuming, often requiring significant up-front time and expense without any assurance that these efforts will generate a sale. Government certification requirements for products like ours may change, thereby restricting our ability to sell into the U.S. federal government, U.S. state governments, or non-U.S. government sectors until we have attained the revised certification.

Government demand and payment for our products may be affected by public sector budgetary cycles, funding authorizations, government shutdowns, and general political priorities, with funding reductions or delays adversely affecting public sector demand for our products. Additionally, any actual or perceived privacy, data protection, or data security incident, or even any perceived defect with regard to our practices or measures in these areas, may negatively impact public sector demand for our products.

Additionally, we rely on certain partners to provide technical support services to certain of our government entity customers to resolve any issues relating to our products. If our partners do not effectively assist our government entity customers in deploying our products, succeed in helping our government entity customers quickly resolve post-deployment issues, or provide effective ongoing support, our ability to sell additional products to new and existing government entity customers would be adversely affected and our reputation could be damaged.

Government entities may have statutory, contractual, or other legal rights to terminate contracts with us for convenience or due to a default, and any such termination may adversely affect our future results of operations. Governments routinely investigate and audit government contractors' administrative processes, and any unfavorable audit could result in the government refusing to continue buying our subscriptions, a reduction of revenue, or fines or civil or criminal liability if the audit uncovers improper or illegal activities, which could adversely affect our results of operations in a material way.

Our success depends on our ability to provide users of our products and services with access to an abundance of useful, efficient, high-quality code which in turn depends on the quality and volume of code contributed by our open source contributors.

We believe that one of our competitive advantages is the quality, quantity and collaborative nature of the code on GitLab, and that access to open source code is one of the main reasons users visit GitLab. In furtherance of the foregoing competitive advantages and access, we seek to foster a broad and engaged contributor community, and we encourage individuals, companies, governments, and institutions to use our products and services to learn, code and work. If contributors, including influential contributors, do not continue to contribute code, our customer base and contributor engagement may decline. Additionally, if we are not able to address user concerns regarding the safety and security of our products and services or if we are unable to successfully prevent abusive or other hostile behavior on The DevSecOps Platform, the size of our customer base and contributor engagement may decline. If there is a decline in the number of contributors, customer or contributor growth rate or engagement, including as a result of the loss of influential contributors and companies who provide innovative code on GitLab, paying customers of our online services may be deterred from using our products or services or reduce their spending with us or cease doing business with us, which would harm our business and operating results.

Seasonality may cause fluctuations in our sales and results of operations.

Historically, we have experienced seasonality in new customer contracts, as we typically enter into a higher percentage of subscription agreements with new customers and renewals with existing customers in the last two fiscal quarters of each year. We believe that this results from the procurement, budgeting, and deployment cycles of many of our customers, particularly our enterprise customers, along with variables outside of our and our customers' control, such as macroeconomic and general economic conditions, including inflation, rising interest rates, volatility of the global debt and equity markets, and instability in the global banking sector. We expect that this seasonality, which can itself at times be unpredictable, will continue to affect our bookings, deferred revenue, and our results of operations in the future and might become more pronounced as we continue to target larger enterprise customers.

We recognize a significant portion of revenue from subscriptions over the term of the relevant subscription period, and as a result, downturns or upturns in sales are not immediately reflected in our results of operations. Further, we recognize a significant portion of our subscription revenue over the term of the relevant subscription period. As a result, much of the subscription revenue we report each fiscal quarter is the recognition of deferred revenue from subscription contracts entered into during previous

fiscal quarters. Consequently, a decline in new or renewed subscriptions in any one fiscal quarter will not be fully or immediately reflected in revenue in that fiscal quarter and will negatively affect our revenue in future fiscal quarters. Accordingly, the effect of significant downturns in new or renewed sales of our subscriptions is not fully reflected in our results of operations until future periods.

The length of our sales cycle can be unpredictable, particularly with respect to sales to large customers, and our sales efforts may require considerable time and expense.

Our results of operations may fluctuate, in part, because of the length and variability of the sales cycle of our subscriptions and the difficulty in making short-term adjustments to our operating expenses. The length of our sales cycle, from initial contact from a prospective customer to contractually committing to our paid subscriptions can vary substantially from customer to customer based on deal complexity as well as whether a sale is made directly by us. It is difficult to predict exactly when, or even if, we will make a sale to a potential customer or if we can increase sales to our existing customers, the timing of our customers' decisions to make a purchase, greater deal scrutiny by our customers, changes our customers experienced, or may experience, in their businesses, and other variables some of which are outside of our and our customers' control, such as macroeconomic and general economic conditions, including inflation, rising interest rates, volatility of the global debt and equity markets, and instability in the global banking sector. Our results of operations depend in part on sales to new large customers and increasing sales to existing customers. As a result, in particular, large individual sales have, in some cases, occurred in quarters subsequent to those we anticipated, or have not occurred at all. Because a substantial proportion of our expenses are relatively fixed in the short term, our results of operations will suffer if revenue falls below our expectations in a particular quarter, which could cause the price of our Class A common stock to decline.

Risks Related to our People and Culture

We rely on our management team and other key team members and will need additional personnel to grow our business, and the loss of one or more key team members or our inability to hire, integrate, train and retain qualified personnel, could harm our business.

Our future success is dependent, in part, on our ability to hire, integrate, train, retain and motivate the members of our management team and other key team members throughout our organization. The loss of key personnel, including key members of our management team, as well as certain of our key marketing, sales, finance, support, product development, human resources, or technology personnel, could disrupt our operations and have an adverse effect on our ability to grow our business. In particular, we are highly dependent on the services of Sytse Sijbrandij, our co-founder, Chair of the Board of Directors and Chief Executive Officer, who is critical to the development of our technology, services, future vision and strategic direction.

In March 2023, Mr. Sijbrandij announced that he had been diagnosed with cancer and was undergoing treatment, including chemotherapy. Mr. Sijbrandij has continued in his role as Chief Executive Officer and Chair of the Board of Directors during his treatment period and continues to work closely with our Board of Directors and management team to execute on our business priorities. However, his condition may change and prevent him from continuing to perform his role. In the event that Mr. Sijbrandij is no longer able to perform his duties as Chief Executive Officer, we will be required to identify, recruit and hire a new Chief Executive Officer. While our Board of Directors has reviewed and continues to review potential interim and longer-term contingency plans that could be activated as needed to minimize business disruption and to ensure the continued execution of our business priorities, the recruitment of a new Chief Executive Officer can be lengthy and distracting. In addition, we may be required to implement temporary or interim executive management to support the leadership of our company during a transition period. A change in the leadership of the company is a significant event and may result in additional volatility in our stock price.

Competition for highly skilled personnel in our industry is intense, and we may not be successful in hiring or retaining qualified personnel to fulfill our current or future needs. We have, from time to time, experienced, and we expect to continue to experience, difficulty in hiring and retaining highly skilled team members with appropriate qualifications. In particular, recruiting and hiring senior product engineering personnel with AI and machine learning backgrounds has been, and we expect it to continue to be, challenging. In the first quarter of fiscal 2024, we conducted a reduction in workforce of approximately 7% across all areas of our business. While we conducted this spending reprioritization to align with the economic conditions, this cost savings plan may be disruptive to our operations and could yield unanticipated consequences, such as attrition beyond planned staff reductions, or disruptions in our day-to-day operations. Our workforce reduction could also harm our ability to attract and retain qualified management, technology software professionals or other personnel who are critical to our business. For example, in recent years, recruiting, hiring, and retaining team members with expertise in the technology software industry has become increasingly difficult as the demand for technology software professionals has continued to increase. Further, unfavorable media coverage of us could significantly impact our ability to recruit and retain talent. Many of the companies with which we compete for experienced personnel have greater resources than we have. Our competitors also may be successful in recruiting and hiring members of our management team or other key team members, and it may be difficult for us to find suitable replacements on a timely basis, on competitive terms, or at all. We have in the past, and may in the future, be subject to allegations that team members we hire have been improperly solicited, or that they have divulged proprietary or other confidential information or that their former employers own such team member's inventions or other work product, or that they have been hired in violation of non-compete provisions or non-solicitation provisions.

In addition, job candidates and existing team members often consider the value of the benefits and equity awards they receive in connection with their employment. If the perceived value of our benefits, equity, or equity awards declines, it may adversely affect our ability to retain highly skilled team members. If we fail to attract new personnel or fail to retain and motivate our current personnel, our business and future growth prospects would be severely harmed.

We engage our team members in various ways, including direct hires, through PEOs and as independent contractors. As a result of these methods of engagement, we face certain challenges and risks that can affect our business, operating results, and financial condition.

In the locations where we directly hire our team members into one of our entities, we must ensure that we are compliant with the applicable local laws governing team members in those jurisdictions, including local employment and tax laws. In the locations where we utilize PEOs, we contract with the PEO for it to serve as "Employer of Record" for those team members engaged through the PEO in each applicable location. Under this model, team members are employed by the PEO but provide services to GitLab. We also engage team members through a PEO self-employed model in certain jurisdictions where we contract with the PEO, which in turn contracts with individual team members as independent contractors. In all locations where we utilize PEOs, we rely on those PEOs to comply with local employment laws and regulations. We also issue equity to a substantial portion of our team members, including team members engaged through PEOs and to independent contractors, and must ensure we remain compliant with securities laws of the applicable jurisdiction where such team members are located.

Additionally, in some cases, we contract directly with team members who are independent contractors. When we engage team members through a PEO or independent contractor model, we may not be utilizing the appropriate hiring model needed to be compliant with local laws or the PEO may not be complying with local regulations. Additionally, the agreements executed between PEOs and our team members or between us and team members engaged under the independent contractor model, may not be enforceable depending on the local laws because of the indirect relationship created through these engagement models. Accordingly, as a result of our engagement of team members through PEOs, and of our relationship with independent contractors, our business, financial condition and results of operations could be materially and adversely affected. Furthermore, litigation related to our model of engaging team

members, if instituted against us, could result in substantial costs and divert our management's attention and resources from our business.

If we do not effectively hire, integrate, and train additional sales personnel, and expand our sales and marketing capabilities, we may be unable to increase our customer base and increase sales to our existing customers.

Our ability to increase our customer base and achieve broader market adoption of The DevSecOps Platform will depend to a significant extent on our ability to continue to expand our sales and marketing operations. We plan to dedicate significant resources to sales and marketing programs and to expand our sales and marketing capabilities to target additional potential customers, but there is no guarantee that we will be successful in attracting and maintaining additional customers. If we are unable to find efficient ways to deploy our sales and marketing investments or if our sales and marketing programs are not effective, our business and operating results would be adversely affected.

Furthermore, we plan to continue expanding our sales force and there is significant competition for sales personnel with the skills and technical knowledge that we require. Our ability to achieve revenue growth will depend, in part, on our success in hiring, integrating, training, and retaining sufficient numbers of sales personnel to support our growth, particularly in international markets. New hires require significant training and may take significant time before they achieve full productivity. Our recent hires and planned hires may not become productive as quickly as we expect, and we may be unable to hire or retain sufficient numbers of qualified individuals in the markets where we do business or plan to do business. If we are unable to hire and train a sufficient number of effective sales personnel, or the sales personnel we hire are not successful in obtaining new customers or increasing sales to our existing customer base, our business, operating results, and financial condition will be adversely affected.

We are a remote-only company, meaning that our team members work remotely which poses a number of risks and challenges that can affect our business, operating results, and financial condition. We are increasingly dependent on technology in our operations and if our technology fails, our business could be adversely affected.

As a remote-only company, we face a number of unique operational risks. For example, technologies in our team members' homes may not be robust enough and could cause the networks, information systems, applications, and other tools available to team members and service providers to be limited, unreliable, or unsecure. Additionally, we are increasingly dependent on technology as a remote-only company and if we experience problems with the operation of our current IT systems or the technology systems of third parties on which we rely, that could adversely affect, or even temporarily disrupt, all or a portion of our operations until resolved. In addition, in a remote-only company, it may be difficult for us to develop and preserve our corporate culture and our team members may have decreased opportunities to collaborate in meaningful ways. Any impediments to preserving our corporate culture and fostering collaboration could harm our future success, including our ability to retain and recruit personnel, innovate and operate effectively, and execute on our business strategy.

Unfavorable media coverage could negatively impact our business.

We receive a high degree of media coverage, including due to our commitment to transparency. Unfavorable publicity or consumer perception of our service offerings could adversely affect our reputation, resulting in a negative impact on the size of our user base and the loyalty of our users. It could negatively impact our ability to acquire new customers and could lead to customers choosing to leave GitLab. As a result, our business, financial condition and results of operations could be materially and adversely affected.

Our corporate culture has contributed to our success, and if we cannot maintain this culture as we grow, we could lose the innovation, creativity, and teamwork fostered by our culture, and our business may be harmed.

We believe that our corporate culture has been and will continue to be a key contributor to our success. If we do not continue to develop our corporate culture as we grow and evolve, it could harm our ability to foster the innovation, creativity, and teamwork that we believe is important to support our growth. As our organization grows and we are required to implement more complex organizational structures, we may find it increasingly difficult to maintain the beneficial aspects of our corporate culture, which could negatively impact our future success.

Our brand, reputation, and business may be harmed if our customers, partners, team members, contributors or the public at large disagrees with, or finds objectionable, our policies and practices or organizational decisions that we make or with the actions of members of our management team.

Our customers, partners, team members, contributors or the public at large may, from time to time, disagree with, or find objectionable, our policies and practices or organizational decisions that we make or with the actions of members of our management team. As a result of these disagreements and any negative publicity associated therewith, we could lose customers or partners, or we may have difficulty attracting or retaining team members or contributors and such disagreements may divert resources and the time and attention of management from our business. Our culture of transparency may also result in customers, partners, team members, contributors or the public at large having greater insight into our policies and practices or organizational decisions. Additionally, with the importance and impact of social media, any negative publicity regarding our policies and practices or organizational decisions or actions by members of our management team, may be magnified and reach a large portion of our customer, partner, team member base or contributors in a very short period of time, which could harm our brand and reputation and adversely affect our business.

Risk Related to Our International Operations

We plan to continue expanding our international operations which could subject us to additional costs and risks, and our continued expansion internationally may not be successful.

We plan to expand our operations internationally in the future. Outside of the United States, we currently have direct and indirect subsidiaries in the United Kingdom, Netherlands, Germany, France, Ireland, Japan, South Korea, Canada, Singapore, and Australia and have team members in over 60 countries. We also have a joint venture in China. There are significant costs and risks inherent in conducting business in international markets, including:

- establishing and maintaining effective controls at foreign locations and the associated increased costs;
- adapting our technologies, products, and services to non-U.S. consumers' preferences and customs;
- increased competition from local providers;
- compliance with foreign laws and regulations;
- adapting to doing business in other languages and/or cultures;
- compliance with the laws of numerous taxing jurisdictions where we conduct business, potential double taxation of our international earnings, and potentially adverse tax consequences due to U.S. and foreign tax laws as they relate to our international operations;
- compliance with anti-bribery laws, such as the FCPA and the U.K. Bribery Act, by us, our team members, our service providers, and our business partners;
- difficulties in staffing and managing global operations and the increased travel, infrastructure, and compliance costs associated with multiple international locations;

- complexity and other risks associated with current and future foreign legal requirements, including legal requirements related to data privacy frameworks, such as the GDPR and U.K. GDPR;
- currency exchange rate fluctuations or limitations and related effects on our operating results;
- economic and political instability in some countries, including the potential effects of health pandemics or epidemics and the war in Ukraine;
- the uncertainty of protection for intellectual property rights in some countries and practical difficulties of enforcing rights abroad; and
- other costs of doing business internationally.

These factors and other factors could harm our international operations and, consequently, materially impact our business, operating results, and financial condition. Further, we may incur significant operating expenses as a result of our international expansion, and it may not be successful. We have limited experience with regulatory environments and market practices internationally, and we may not be able to penetrate or successfully operate in new markets. If we are unable to continue to expand internationally and manage the complexity of our global operations successfully, our financial condition and operating results could be adversely affected.

We have a limited operating history in China and we face risks with respect to conducting business in connection with our joint venture in China due to certain legal, political, economic and social uncertainties relating to China. Our ability to monetize our joint venture in China may be limited.

In February 2021, we partnered with two Chinese investment partners to form an independent company called GitLab Information Technology (Hubei) Co., Ltd. (吉虎, pinyin: JiHu, pronounced Gee Who) which was formed to specifically serve the Chinese market. This company offers a dedicated distribution of The DevSecOps Platform available as both a self-managed and SaaS that is only available in mainland China, Hong Kong and Macau. The autonomous company has its own governance structure, management team, and business support functions including Engineering, Sales, Marketing, Finance, Legal, Human Relations and Customer Support.

Our participation in this joint venture in China is subject to general, as well as industry-specific, economic, political, tax and legal developments and risks in China. The Chinese government exercises significant control over the Chinese economy, including but not limited to controlling capital investments, allocating resources, setting monetary policy, controlling and monitoring foreign exchange rates, implementing and overseeing tax regulations, providing preferential treatment to certain industry segments or companies and issuing necessary licenses to conduct business. In addition, we could face additional risks resulting from changes in China's data privacy and cybersecurity requirements, including China's adoption of the Personal Information Protection Law, or PIPL, which went into effect on November 1, 2021. The PIPL shares similarities with the GDPR, including extraterritorial application, data minimization, data localization, and purpose limitation requirements, and obligations to provide certain notices and rights to citizens of China. Accordingly, any adverse change in the Chinese economy, the Chinese legal system or Chinese governmental, economic or other policies could have a material adverse effect on our business and operations in China and our prospects generally.

We face additional risks in China due to China's historically limited recognition and enforcement of contractual and intellectual property rights. We may experience difficulty enforcing our intellectual property rights in China. Unauthorized use of our technologies and intellectual property rights by Chinese partners or competitors may dilute or undermine the strength of our brands. If we cannot adequately monitor the use of our technologies and products, or enforce our intellectual property rights in China or contractual restrictions relating to use of our intellectual property by Chinese companies, our revenue from JiHu could be adversely affected.

Our joint venture is subject to laws and regulations applicable to foreign investment in China. There are uncertainties regarding the interpretation and enforcement of laws, rules and policies in China. Because many laws and regulations are relatively new, the interpretations of many laws, regulations and rules are not always uniform. Moreover, the interpretation of statutes and regulations may be subject to government policies reflecting domestic political agendas. Enforcement of existing laws or contracts based on existing law may be uncertain and sporadic. As a result of the foregoing, it may be difficult for us to obtain swift or equitable enforcement of laws ostensibly designed to protect companies like ours, which could have a material adverse effect on our business and results of operations. Our ability to monetize our joint venture in China may also be limited. Although the joint venture entity is an autonomous company, it is the exclusive seller of GitLab in mainland China, Hong Kong and Macau and is therefore the public face of GitLab in those areas. Additionally, under U.S. GAAP, we currently consolidate the joint venture's financials within our own and rely on the joint venture's management for accurate and timely delivery of the joint venture's financials. Therefore, we face reputational and brand risk as a result of any negative publicity faced by the joint venture entity. Any such reputational and brand risk can harm our business and operating results.

We are exposed to fluctuations in currency exchange rates and interest rates, which could negatively affect our results of operations and our ability to invest and hold our cash.

Revenue generated is primarily billed in U.S. dollars while expenses incurred by our international subsidiaries and activities are often denominated in the currencies of the local countries. As a result, our condensed consolidated U.S. dollar financial statements are subject to fluctuations due to changes in exchange rates as the financial results of our international subsidiaries are translated from local currencies into U.S. dollars. Our financial results are also subject to changes in exchange rates that impact the settlement of transactions in non-local currencies. To date, we have not engaged in currency hedging activities to limit the risk of exchange fluctuations and, as a result, our financial condition and operating results could be adversely affected by such fluctuations.

Our fixed-income investment portfolio is subject to fluctuations in fair value due to change in interest rates, which could adversely affect our results of operations due to a rise in interest rates in the future.

Risks Related to Financial and Accounting Matters

We have identified material weaknesses in our internal controls over financial reporting and if our remediation of such material weaknesses is not effective, or if we fail to develop and maintain an effective system of disclosure controls and internal controls over financial reporting, our ability to produce timely and accurate financial statements or comply with applicable laws and regulations could be impaired.

As a public company, we are subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act, and the rules and regulations of the applicable listing standards of the Nasdaq Global Select Market.

The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our internal controls and procedures, we have expended, and anticipate that we will continue to expend, significant resources, including accounting related costs and significant management oversight.

As disclosed in our Annual Report on Form 10-K for the year ended January 31, 2023, we have identified material weaknesses in our internal control over financial reporting. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis. As of January 31, 2023, we determined that the following material weaknesses exist due to a lack of policies and procedures related to the operation of control activities and inadequate communication of information to control owners and operators related to the

objectives and responsibilities for internal control in a manner which supports the internal control environment at the company. As a result, the following material weaknesses exist:

- We did not design and maintain effective controls over certain information technology, or IT, general controls for information systems that are relevant to the preparation of our consolidated financial statements. In particular, we did not design and maintain effective (i) program change management controls to ensure that IT programs, data changes and migrations affecting financial IT applications and underlying records are identified, tested, authorized and implemented appropriately and (ii) user access controls to ensure appropriate segregation of duties, restricted user and privileged access to our financial applications, data and programs to the appropriate personnel. The ineffective design and operation of IT general controls resulted in the ineffective operation of automated controls and manual controls using reports and information from the impacted information systems used in all financial reporting processes,
- We did not retain sufficient contemporaneous documentation to demonstrate the operation of controls over manual journal entries,
- We did not retain sufficient contemporaneous documentation to demonstrate the operation of review controls over stock-based compensation at a sufficient level of precision and such controls relied on reports, and
- As previously reported, we did not design and maintain effective and timely review procedures over the accounting for and disclosure of non-routine transactions. This material weakness has not been remediated, as the new controls designed rely on reports and information adversely impacted by the IT general control deficiencies.

The aforementioned material weaknesses did not result in a material misstatement to our annual or interim financial statements, however, the deficiencies, when aggregated, could result in misstatements potentially impacting all financial statements accounts and disclosures that would not be prevented or detected. Therefore we concluded that the deficiencies represent material weaknesses in the Company's internal control over financial reporting and our internal control over financial reporting was not effective as of January 31, 2023.

Our independent registered public accounting firm, KPMG LLP, who audited the consolidated financial statements included in our Annual Report on Form 10-K for the year ended January 31, 2023, issued an adverse opinion on the effectiveness of the Company's internal control over financial reporting for the year ended January 31, 2023. To address our material weaknesses, we have commenced certain steps to enhance our internal control environment and remediate these material weaknesses. See the section entitled "Controls and Procedures—Remediation Plan for Material Weaknesses" above for additional information.

However, we cannot guarantee that the measures we have taken to date, and actions we may take in the future, will be sufficient to remediate the control deficiencies that led to our material weaknesses in our internal control over financial reporting or that they will prevent or avoid potential future material weaknesses. Our current controls and any new controls we develop may become inadequate because of changes in conditions in our business. Further, additional weaknesses in our internal controls may be discovered in the future. Any failure to develop or maintain effective controls, or any difficulties encountered in their implementation or improvement, could harm our operating results, may result in a restatement of our financial statements for prior periods, cause us to fail to meet our reporting obligations, and could adversely affect the results of periodic management evaluations and annual independent registered public accounting firm attestation reports regarding the effectiveness of our internal control over financial reporting that we are required to include in the periodic reports we will file with the SEC. Because we are a large accelerated filer as of January 31, 2023, our independent registered public accounting firm is required to annually audit the effectiveness of our internal control over financial reporting commencing with the year ended January 31, 2023, which has, and will continue to, require

increased costs, expenses, and management resources. Undetected material weaknesses in our internal control over financial reporting could lead to financial statement restatements and require us to incur the expense of remediation. We are also required to disclose changes made in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting on a quarterly basis. To comply with the requirements of being a public company, we have undertaken, and may need to further undertake in the future, various actions, such as implementing new internal controls and procedures and hiring additional accounting staff.

As a public company, significant resources and management oversight are required. As a result, management's attention may be diverted from other business concerns, which could harm our business, financial condition and operating results.

We incur significant increased costs and devote increased management resources as a result of operating as a public company.

As a public company, we incur and, particularly now that we are no longer an emerging growth company, will further incur significant legal, accounting, compliance and other expenses that we did not incur as a private company. Our management and other personnel devote a substantial amount of time and incur significant expense in connection with compliance initiatives. As a public company, we bear all of the internal and external costs of preparing and distributing periodic public reports in compliance with our obligations under the securities laws.

In addition, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act, and the related rules and regulations implemented by the SEC, have increased legal and financial compliance costs and will make some compliance activities more time consuming. Moreover, since we ceased to be an "emerging growth company" on January 31, 2023, we may no longer take advantage of certain exemptions from various reporting requirements that are applicable to public companies. This increase in reporting requirements will further increase our compliance burden. We intend to continue to invest resources to comply with evolving laws, regulations and standards, and this investment will result in increased general and administrative expenses and may divert management's time and attention from our other business activities. If our efforts to comply with new laws, regulations and standards differ from the activities intended by regulatory or governing bodies due to ambiguities related to practice, regulatory authorities may initiate legal proceedings against us, and our business may be harmed. In connection with our initial public offering, we also increased our directors' and officers' insurance coverage, which increased our insurance cost. In the future, it may be more expensive or more difficult for us to obtain director and officer liability insurance, and we may be required to accept reduced coverage or incur substantially higher costs to obtain coverage. These factors would also make it more difficult for us to attract and retain qualified members of our board of directors, particularly to serve on our audit committee and compensation and leadership development committee, and qualified executive officers.

We may in the future need to raise additional capital to grow our business, and we may not be able to raise capital on terms acceptable to us or at all. In addition, any inability to generate or obtain such capital may adversely affect our operating results and financial condition.

In order to support our growth and respond to business challenges, such as developing new features or enhancements to our services to stay competitive, acquiring new technologies, and improving our infrastructure, we have made significant financial investments in our business and we intend to continue to make such investments. As a result, we may need to engage in additional equity or debt financings to provide the funds required for these investments and other business endeavors. If we need to engage in such additional equity or debt financings, we may not be able to raise needed cash on terms acceptable to us or at all. Financing may be on terms that are dilutive or potentially dilutive to our stockholders, and the prices at which new investors would be willing to purchase our securities may be significantly lower than the current price per share of our Class A common stock. The holders of new debt or equity securities may also have rights, preferences, or privileges that are senior to those of existing holders of

our common stock. If new sources of financing are required, but are insufficient or unavailable, we will be required to modify our growth and operating plans based on available funding, if any, which would harm our ability to grow our business.

If we raise additional funds through equity or convertible debt issuances, our existing stockholders may suffer significant dilution and these securities could have rights, preferences, and privileges that are superior to those of holders of our common stock. If we obtain additional funds through debt financing, we may not be able to obtain such financing on terms favorable to us. Such terms may involve restrictive covenants making it difficult to engage in capital raising activities and pursue business opportunities, including potential acquisitions. The trading prices of technology companies have been highly volatile as a result of recent global events, including increasing interest rates and inflation and the recent armed conflict in Ukraine, which may reduce our ability to access capital on favorable terms or at all. In addition, a recession, depression, or other sustained adverse market event resulting from such global events could adversely affect our business and the value of our Class A common stock. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly impaired and our business may be adversely affected, requiring us to delay, reduce, or eliminate some or all of our operations.

Future acquisitions, strategic investments, partnerships or alliances could be difficult to identify and integrate, divert the attention of key management personnel, disrupt our business, dilute stockholder value and adversely affect our business, operating results and financial condition.

As part of our business strategy, we have in the past and expect to continue to make investments in and/or acquire complementary companies, services or technologies. Our ability as an organization to acquire and integrate other companies, services or technologies in a successful manner in the future is not guaranteed. We may not be able to find suitable acquisition candidates, and we may not be able to complete such acquisitions on favorable terms, if at all. If we do complete acquisitions, we may not ultimately strengthen our competitive position or ability to achieve our business objectives, and any acquisitions we complete could be viewed negatively by our end customers or investors. In addition, if we are unsuccessful at integrating such acquisitions, or the technologies associated with such acquisitions, into our company, the revenue and operating results of the combined company could be adversely affected. Any integration process may require significant time and resources, and we may not be able to manage the process successfully. We may not successfully evaluate or utilize the acquired technology or personnel, or accurately forecast the financial impact of an acquisition transaction, including accounting charges. We may have to pay cash, incur debt or issue equity securities to pay for any such acquisition, each of which could adversely affect our financial condition and the market price of our Class A common stock. The sale of equity or issuance of debt to finance any such acquisitions could result in dilution to our stockholders. The incurrence of indebtedness would result in increased fixed obligations and could also include covenants or other restrictions that would impede our ability to manage our operations.

Additional risks we may face in connection with acquisitions include:

- diversion of management time and focus from operating our business to addressing acquisition integration challenges;
- coordination of research and development and sales and marketing functions;
- integration of product and service offerings;
- retention of key team members from the acquired company;
- changes in relationships with strategic partners as a result of product acquisitions or strategic positioning resulting from the acquisition;
- integration of customers from the acquired company;

- cultural challenges associated with integrating team members from the acquired company into our organization;
- integration of the acquired company's accounting, management information, human resources and other administrative systems;
- the need to implement or improve controls, procedures and policies at a business that prior to the acquisition may have lacked sufficiently effective controls, procedures and policies;
- additional legal, regulatory or compliance requirements;
- financial reporting, revenue recognition or other financial or control deficiencies of the acquired company that we do not adequately address and that cause our reported results to be incorrect;
- liability for activities of the acquired company before the acquisition, including intellectual property infringement claims, violations of laws, commercial disputes, tax liabilities and other known and unknown liabilities;
- unanticipated write-offs or charges; and
- litigation or other claims in connection with the acquired company, including claims from terminated team members, customers, former stockholders or other third parties.

Our failure to address these risks or other problems encountered in connection with acquisitions and investments could cause us to fail to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

Changes in tax laws or other tax guidance could adversely affect our effective tax rates, financial condition and results of operations.

We are a U.S.-based multinational company subject to taxes in multiple U.S. and foreign tax jurisdictions. In the United States and other countries where we conduct business and in jurisdictions in which we are subject to taxes, including those covered by governing bodies that enact tax laws applicable to us, such as the European Commission of the European Union, we are subject to potential changes in relevant tax, accounting and other laws, regulations, guidance, and interpretations, including changes to tax laws applicable to corporate multinationals such as GitLab. These countries, governmental bodies, and intergovernmental economic organizations such as the Organization for Economic Cooperation and Development, have or could make unprecedented assertions about how taxation is determined in their jurisdictions that are contrary to the way in which we have interpreted and historically applied the rules and regulations described above in such jurisdictions. In the current global tax policy environment, any changes in laws, regulations, guidance and/or interpretations related to these assertions could adversely affect our effective tax rates, cause us to respond by making changes to our business structure, or result in other costs to us which could adversely affect our operations and financial results.

In December 2017, the U.S. federal government enacted the tax reform legislation known as the Tax Cuts and Jobs Act, or the 2017 Tax Act. The 2017 Tax Act significantly changed the existing U.S. corporate income tax laws by, among other things, lowering the U.S. corporate tax rate, implementing a partially territorial tax system, and imposing a one-time deemed repatriation tax on certain post-1986 foreign earnings. Recently the U.S. Treasury Department issued regulations aimed principally at disallowing foreign tax credits for taxes which are dissimilar to income taxes. Also, the Inflation Reduction Act of 2022, enacted on August 16, 2022, further amended the U.S. federal tax code, imposing a 15% minimum tax on "adjusted financial statement income" of certain corporations as well as an excise tax on the repurchase or redemption of stock by certain corporations, beginning in the 2023 tax year.

Over the last several years, the Organization for Economic Cooperation and Development has been working on a Base Erosion and Profit Shifting project that, if implemented, would change various aspects of the existing framework under which our tax obligations are determined in many of the countries in

which we do business. In 2021, more than 140 countries tentatively signed on to a framework that imposes a minimum tax rate of 15%, among other provisions. As this framework is subject to further negotiation and implementation by each member country, the timing and ultimate impact of any such changes on our tax obligations are uncertain. Similarly, the European Commission and several countries have issued proposals that would apply to various aspects of the current tax framework under which we are taxed. These proposals include changes to the existing framework to calculate income tax, as well as proposals to change or impose new types of non-income taxes, including taxes based on a percentage of revenue. For example, several jurisdictions have proposed or enacted taxes applicable to digital services, which include business activities on digital advertising and online marketplaces, and which apply to our business.

The European Commission has conducted investigations in multiple countries focusing on whether local country tax rulings or tax legislation provides preferential tax treatment that violates E.U. state aid rules and concluded that certain member states, have provided illegal state aid in certain cases. These investigations may result in changes to the tax treatment of our foreign operations.

Due to the large and expanding scale of our international business activities, many of these types of changes to the taxation of our activities described above could increase our worldwide effective tax rate, increase the amount of non-income taxes imposed on our business, and harm our financial position, results of operations, and cash flows. Such changes may also apply retroactively to our historical operations and result in taxes greater than the amounts estimated and recorded in our financial statements. There can be no assurance that future tax law changes will not increase the rate of the corporate income tax, impose new limitations on deductions, credits or other tax benefits, or make other changes that may adversely affect our business, cash flows or financial performance. Among other considerations, the applicability and impact of these tax provisions, and of other U.S. or international tax law changes could adversely affect our effective income tax rate and cash flows in future years.

We may have exposure to greater than anticipated tax liabilities.

The tax laws applicable to our business, including the laws of the United States and other jurisdictions, are subject to interpretation and certain jurisdictions are aggressively interpreting their laws in new ways. Our existing corporate structure has been implemented in a manner we believe is in compliance with current tax laws. However, the taxing authorities of the jurisdictions in which we operate may challenge our methodologies, including for valuing developed technology or intercompany arrangements, which could impact our worldwide effective tax rate and adversely affect our financial condition and results of operations, possibly with retroactive effect. Moreover, changes to our corporate structure could impact our worldwide effective tax rate and adversely affect our financial condition and results of operations.

Furthermore, U.S. and OECD Transfer Pricing Guidelines require us to analyze the functions performed by our entities, the risks incurred, and the assets owned. This functional analysis is a control to sustain the operating margins of our entities and confirm arm's length pricing for intercompany transactions. Competent authorities could interpret, change, modify or apply adversely, existing tax laws, statutes, rules, regulations or ordinances to us (possibly with retroactive effect); which could require us to make transfer pricing corrections or to pay fines, penalties or interest for past amounts. If we are unable to make corresponding adjustments with our related entities, we would effectively be liable for additional tax, thereby adversely impacting our operating results and cash flows.

Significant judgment is required in evaluating our tax positions and our worldwide provision for taxes. During the ordinary course of business, there are many activities and transactions for which the ultimate tax determination is uncertain. Our tax obligations and effective tax rates could be adversely affected by changes in the relevant tax, accounting and other laws, regulations, principles and interpretations, including those relating to income tax nexus. The relevant taxing authorities may disagree with our determinations as to the income and expenses attributable to specific jurisdictions. If such a disagreement were to occur, and our position was not sustained, we could be required to pay additional taxes, interest

and penalties, which could result in one-time tax charges, higher effective tax rates, reduced cash flows and lower overall profitability of our business, with some changes possibly affecting our tax obligations in future or past years. We regularly assess the likelihood of outcomes resulting from possible examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result from these examinations. We cannot provide assurance that the final determination of any of these examinations will not have an adverse effect on our financial position and results of operations.

Our cash and cash equivalents could be adversely affected if the financial institutions in which we hold our cash and cash equivalents fail.

We regularly maintain cash balances at third-party financial institutions in excess of the FDIC insurance limit and similar regulatory insurance limits outside the United States. If a depository institution where we maintain deposits fails or is subject to adverse conditions in the financial or credit markets, we may not be able to recover all, if any, of our deposits, which could adversely impact our operating liquidity and financial performance.

Risks Related to Ownership of Our Class A Common Stock

The market price of our Class A common stock may be volatile, and you could lose all or part of your investment.

Technology stocks historically have experienced high levels of volatility. The market price of our Class A common stock depends on a number of factors, including those described in this “Risk Factors” section, many of which are beyond our control and may not be related to our operating performance. In addition, the limited public float of our Class A common stock may increase the volatility of the trading price of our Class A common stock. These fluctuations could cause you to lose all or part of your investment in our Class A common stock, since you might not be able to sell your shares at or above the price initially paid for the stock. Factors that could cause fluctuations in the market price of our Class A common stock include the following:

- actual or anticipated changes or fluctuations in our operating results;
- the financial projections we may provide to the public, any changes in these projections or our failure to meet these projections;
- announcements by us or our competitors of new products or new or terminated significant contracts, commercial relationships or capital commitments;
- industry or financial analyst or investor reaction to our press releases, other public announcements and filings with the SEC;
- rumors and market speculation involving us or other companies in our industry;
- price and volume fluctuations in the overall stock market from time to time;
- changes in operating performance and stock market valuations of other technology companies generally, or those in our industry in particular;
- failure of industry or financial analysts to maintain coverage of us, changes in financial estimates by any analysts who follow our company, or our failure to meet these estimates or the expectations of investors;
- actual or anticipated developments in our business or our competitors' businesses or the competitive landscape generally;
- litigation involving us, our industry or both, or investigations by regulators into our operations or those of our competitors;

- developments or disputes concerning our intellectual property rights or our solutions, or third-party proprietary rights;
- announced or completed acquisitions of businesses or technologies by us or our competitors;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
- the impact of interest rate increases on the overall stock market and the market for technology company stocks;
- any major changes in our management or our board of directors;
- effects of public health crises, pandemics, and epidemics;
- general economic conditions, changes in the capital markets generally, inflation, slow or negative growth of our markets and instability in the global banking sector; and
- other events or factors, including those resulting from political instability, war, incidents of terrorism or responses to these events, including those related to the ongoing armed conflict in Ukraine.

In addition, the stock market in general, and the market for technology companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. Broad market and industry factors may seriously affect the market price of our Class A common stock, regardless of our actual operating performance. In addition, in the past, following periods of volatility in the overall market and the market prices of a particular company's securities, companies have been subject to increased stockholder activism or securities class action litigation. Any stockholder activism or securities litigation, if instituted against us, could result in substantial costs and divert our management's attention and resources from our business. This could have an adverse effect on our business, operating results and financial condition.

Sales of substantial amounts of our Class A common stock in the public markets, or the perception that they might occur, could cause the market price of our Class A common stock to decline.

Sales of a substantial number of shares of our Class A common stock into the public market, particularly sales by our directors, executive officers, and greater than 5% stockholders, or the perception that these sales might occur, could cause the market price of our Class A common stock to decline or make it more difficult for you to sell your Class A common stock at a time and price that you deem appropriate.

Moreover, the holders of a significant portion of shares of our capital stock also have rights, subject to some conditions, to require us to file registration statements for the public resale of such capital stock or to include such shares in registration statements that we may file for us or other stockholders.

We may also issue our shares of our capital stock or securities convertible into shares of our capital stock from time to time in connection with a financing, acquisition, investment, or otherwise.

The dual class structure of our common stock will have the effect of concentrating voting control with those stockholders who hold our Class B capital stock, including our directors, executive officers, and beneficial owners of 5% or greater of our outstanding capital stock who hold in the aggregate 65.8% of the voting power of our capital stock, which will limit or preclude your ability to influence corporate matters, including the election of directors and the approval of any change of control transaction.

Our Class B common stock has ten votes per share, and our Class A common stock has one vote per share. As of July 31, 2023, the holders of our outstanding Class B common stock hold a substantial

majority of the voting power of our outstanding capital stock, with our directors, executive officers, and holders of more than 5% of our common stock, and their respective affiliates, holding a majority of the voting power of our capital stock. Because of the ten-to-one voting ratio between our Class B and Class A common stock, the holders of our Class B common stock collectively will continue to control a majority of the combined voting power of our common stock and therefore will be able to control all matters submitted to our stockholders for approval until the earlier of (i) October 14, 2031, (ii) the death or disability, as defined in our restated certificate of incorporation, of Sytse Sijbrandij, (iii) the date specified by a vote of the holders of two-thirds of the then outstanding shares of Class B common stock and (iv) the first date on which the number of shares of outstanding Class B common stock (including shares of Class B common stock subject to outstanding stock options) is less than 5% of the aggregate number of shares of outstanding common stock. This concentrated control will limit or preclude your ability to influence corporate matters for the foreseeable future, including the election of directors, amendments of our organizational documents, and any merger, consolidation, sale of all or substantially all of our assets, or other major corporate transaction requiring stockholder approval. In addition, this may prevent or discourage unsolicited acquisition proposals or offers for our capital stock that you may feel are in your best interest as one of our stockholders.

Future transfers by holders of our Class B common stock will generally result in those shares converting to Class A common stock, subject to limited exceptions, such as certain transfers effected for estate planning purposes. The conversion of Class B common stock to Class A common stock will have the effect, over time, of increasing the relative voting power of those holders of our Class B common stock who retain their shares in the long term.

The dual class structure of our common stock may adversely affect the trading market for our Class A common stock.

Several stockholder advisory firms and large institutional investors oppose the use of multiple class structures. As a result, the dual class structure of our common stock may cause stockholder advisory firms to publish negative commentary about our corporate governance practices or otherwise seek to cause us to change our capital structure, and may result in large institutional investors not purchasing shares of our Class A common stock. Any actions or publications by stockholder advisory firms or institutional investors critical of our corporate governance practices or capital structure could also adversely affect the value of our Class A common stock.

If industry or financial analysts do not continue to publish research or reports about our business, or if they issue inaccurate or unfavorable research regarding our Class A common stock, our stock price and trading volume could decline.

The trading market for our Class A common stock will depend in part on the research and reports that industry or financial analysts publish about us or our business. We do not control these analysts or the content and opinions included in their reports. As a relatively new public company, the analysts who publish information about our Class A common stock will have had relatively little experience with our company, which could affect their ability to accurately forecast our results and make it more likely that we fail to meet their estimates. If any of the analysts who cover us issues an inaccurate or unfavorable opinion regarding our stock price, our stock price may decline. In addition, the stock prices of many companies in the technology industry have declined significantly after those companies have failed to meet, or exceed, the financial guidance publicly announced by the companies or the expectations of analysts. If our financial results fail to meet, or exceed, our announced guidance or the expectations of analysts or public investors, analysts could downgrade our Class A common stock or publish unfavorable research about us. If one or more of these analysts cease coverage of our Class A common stock or fail to publish reports on us regularly, our visibility in the financial markets could decrease, which in turn could cause our stock price or trading volume to decline.

We do not intend to pay dividends in the foreseeable future. As a result, your ability to achieve a return on your investment will depend on appreciation in the price of our Class A common stock.

We have never declared or paid any cash dividends on our capital stock. We currently intend to retain all available funds and any future earnings for use in the operation of our business and do not anticipate paying any dividends in the foreseeable future. Any determination to pay dividends in the future will be at the discretion of our board of directors. Accordingly, investors must for the foreseeable future rely on sales of their Class A common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investments.

Provisions in our organizational documents and under Delaware law could make an acquisition of us, which could be beneficial to our stockholders, more difficult and may limit attempts by our stockholders to replace or remove our current management.

Provisions in our restated certificate of incorporation and amended and restated bylaws may have the effect of delaying or preventing a merger, acquisition or other change of control of our company that our stockholders may consider favorable. In addition, because our board of directors is responsible for appointing the members of our management team, these provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors. Among other things, our restated certificate of incorporation and amended and restated bylaws include provisions that:

- provide that our board of directors is classified into three classes of directors with staggered three-year terms;
- permit our board of directors to establish the number of directors and fill any vacancies and newly created directorships;
- require supermajority voting to amend some provisions in our restated certificate of incorporation and amended and restated bylaws;
- authorize the issuance of “blank check” preferred stock that our board of directors could use to implement a stockholder rights plan;
- provide that only our chief executive officer or a majority of our board of directors will be authorized to call a special meeting of stockholders;
- eliminate the ability of our stockholders to call special meetings of stockholders;
- do not provide for cumulative voting;
- provide that directors may only be removed “for cause” and only with the approval of two-thirds of our stockholders;
- provide for a dual class common stock structure in which holders of our Class B common stock may have the ability to control the outcome of matters requiring stockholder approval, even if they own significantly less than a majority of the outstanding shares of our common stock, including the election of directors and other significant corporate transactions, such as a merger or other sale of our company or its assets;
- prohibit stockholder action by written consent, which requires all stockholder actions to be taken at a meeting of our stockholders;
- provide that our board of directors is expressly authorized to make, alter, or repeal our amended and restated bylaws; and
- establish advance notice requirements for nominations for election to our board of directors or for proposing matters that can be acted upon by stockholders at annual stockholder meetings.

Moreover, Section 203 of the Delaware General Corporation Law, or DGCL, may discourage, delay, or prevent a change in control of our company. Section 203 imposes certain restrictions on mergers, business combinations, and other transactions between us and holders of 15% or more of our common stock.

Our restated certificate of incorporation and amended and restated bylaws contain exclusive forum provisions for certain claims, which may limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, or team members.

Our restated certificate of incorporation provides that the Court of Chancery of the State of Delaware, to the fullest extent permitted by law, will be the exclusive forum for any derivative action or proceeding brought on our behalf, any action asserting a breach of fiduciary duty, any action asserting a claim against us arising pursuant to the DGCL, our restated certificate of incorporation, or our amended and restated bylaws, or any action asserting a claim against us that is governed by the internal affairs doctrine.

Moreover, Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all claims brought to enforce any duty or liability created by the Securities Act or the rules and regulations thereunder. Our restated certificate of incorporation and amended and restated bylaws provide that the federal district courts of the United States will, to the fullest extent permitted by law, be the exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act, such provision, the Federal Forum Provision. Our decision to adopt a Federal Forum Provision followed a decision by the Supreme Court of the State of Delaware holding that such provisions are facially valid under Delaware law. While there can be no assurance that federal or state courts will follow the holding of the Delaware Supreme Court or determine that the Federal Forum Provision should be enforced in a particular case, application of the Federal Forum Provision means that suits brought by our stockholders to enforce any duty or liability created by the Securities Act must be brought in federal court and cannot be brought in state court.

Section 27 of the Exchange Act creates exclusive federal jurisdiction over all claims brought to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder. In addition, the Federal Forum Provision applies to suits brought to enforce any duty or liability created by the Exchange Act. Accordingly, actions by our stockholders to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder must be brought in federal court.

Our stockholders will not be deemed to have waived our compliance with the federal securities laws and the regulations promulgated thereunder.

Any person or entity purchasing or otherwise acquiring or holding any interest in any of our securities shall be deemed to have notice of and consented to our exclusive forum provisions, including the Federal Forum Provision. These provisions may limit a stockholders' ability to bring a claim in a judicial forum of their choosing for disputes with us or our directors, officers, or team members, which may discourage lawsuits against us and our directors, officers, and team members. Alternatively, if a court were to find the choice of forum provisions contained in our restated certificate of incorporation or amended and restated bylaws to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could harm our business, financial condition, and operating results.

General Risk Factors

We may be adversely affected by natural disasters, pandemics and other catastrophic events, and by man-made problems such as acts of war, terrorism, that could disrupt our business operations and our business continuity and disaster recovery plans may not adequately protect us from a serious disaster.

Natural disasters, pandemics, and epidemics, or other catastrophic events such as fire or power shortages, along with man-made problems such as acts of war and terrorism, including the war in Ukraine, and other events beyond our control may cause damage or disruption to our operations, international commerce, and the global economy, and could have an adverse effect on our business, operating results, and financial condition. While we do not have a corporate headquarters, we have team members around the world, and any such catastrophic event could occur in areas where significant portions of our team members are located. Moreover, these conditions can affect the rate of software development operations solutions spending and could adversely affect our customers' ability or willingness to attend our events or to purchase our services, delay prospective customers' purchasing decisions or project implementation timing, reduce the value or duration of their subscription contracts, affect attrition rates, or result in requests from customers for payment or pricing concessions, all of which could adversely affect our future sales and operating results. As a result, we may experience extended sales cycles; our ability to close transactions with new and existing customers and partners may be negatively impacted; our ability to recognize revenue from software transactions we do close may be negatively impacted due to implementation delays or other factors; our demand generation activities, and the efficiency and effect of those activities, may be negatively affected. Recent macroeconomic conditions, including inflation and rising interest rates, have, and may continue to, put pressure on overall spending for our products and services, and may cause our customers to modify spending priorities or delay or abandon purchasing decisions, thereby lengthening sales cycles, and may make it difficult for us to forecast our sales and operating results and to make decisions about future investments. These and other potential effects on our business may be significant and could materially harm our business, operating results and financial condition.

In the event of a natural disaster, including a major earthquake, blizzard, or hurricane, or a catastrophic event such as a fire, power loss, or telecommunications failure, we may be unable to continue our operations and may endure system interruptions, reputational harm, delays in development of our solutions, lengthy interruptions in service, breaches of data security, and loss of critical data, all of which could have an adverse effect on our future operating results. Additionally, all of the aforementioned risks may be further increased if we do not implement a disaster recovery plan or the disaster recovery plans put in place by us or our partners prove to be inadequate.

We could be subject to securities class action litigation.

In the past, securities class action litigation has often been instituted against companies following periods of volatility in the market price of a company's securities. Such suits may seek, as applicable, direct, indirect, consequential, punitive or other penalties or monetary damages, injunctive relief, and/or attorneys' fees. This type of litigation, if instituted, could result in substantial costs, adverse publicity, and a diversion of management's attention and resources, which could adversely affect our business, operating results, or financial condition. Additionally, the dramatic increase in the cost of directors' and officers' liability insurance may cause us to opt for lower overall policy limits or to forgo insurance that we may otherwise rely on to cover significant defense costs, settlements, and damages awarded to plaintiffs.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Recent Sales of Unregistered Equity Securities

There have been no sales of unregistered securities by the company in the quarter ended July 31, 2023.

(b) Use of Proceeds

No payments were made to our directors or officers or their associates, holders of 10% or more of any class of our equity securities, or to our affiliates in connection with the issuance and sale of the securities registered. As of July 31, 2023, we have used all proceeds from our IPO (which closed on October 18, 2021) as disclosed in the final prospectus for our IPO dated as of October 13, 2021 and filed with the SEC pursuant to Rule 424(b)(4) on October 14, 2021.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

None.

ITEM 5. OTHER INFORMATION

(c) Insider Trading Arrangements and Policies

On June 26, 2023, Erin Mannix, the Company's Principal Accounting Officer and Chief Accounting Officer, entered into a pre-arranged written stock sale plan in accordance with Rule 10b5-1 (the "Mannix Rule 10b5-1 Plan") under the Exchange Act for the sale of shares of the Company's Class A common stock. The Mannix Rule 10b5-1 Plan was entered into during an open trading window in accordance with the Company's policies regarding transactions in the Company's securities and is intended to satisfy the affirmative defense of Rule 10b5-1(c) under the Exchange Act. The Mannix Rule 10b5-1 Plan provides for the potential sale of shares of the Company's Class A common stock, including upon the vesting and settlement of restricted stock units, so long as the market price of the Company's common stock is higher than certain minimum threshold prices specified in the Mannix Rule 10b5-1 Plan, between December 20, 2023 and June 28, 2024. The aggregate number of shares of Class A common stock that will be available for sale under the Mannix Rule 10b5-1 Plan is not yet determinable because the shares available will be net of shares sold to satisfy tax withholding obligations that arise in connection with the vesting and settlement of such restricted stock unit awards. As such, for purposes of this disclosure, the aggregate number of shares of Class A common stock available for sale is approximately 9,152, which reflects the aggregate maximum number of shares underlying Ms. Mannix's restricted stock units which may be sold, without excluding the shares that will be sold to satisfy the tax withholding obligations.

The Mannix Rule 10b5-1 Plan includes a representation from Ms. Mannix to the broker administering the plan that she was not in possession of any material nonpublic information regarding the Company or the securities subject to the Mannix Rule 10b5-1 Plan at the time it was entered into. A similar representation was made to the Company in connection with the adoption of the Mannix Rule 10b5-1 Plan under the Company's policies regarding transactions in the Company's securities. Those representations were made as of the date of adoption of the Mannix Rule 10b5-1 Plan, and speak only as of such date. In making those representations, there is no assurance with respect to any material nonpublic information of which Ms. Mannix was unaware, or with respect to any material nonpublic information acquired by Ms. Mannix or the Company after the date of the representation.

GitLab Inc. Service Continuation Agreement

This GitLab Inc. Service Continuation Agreement and Release (this “**Agreement**”) is entered into as of July 15, 2023 by and between Michael McBride (“**you**”) and GitLab Inc. (the “**Company**”), collectively referred to herein as the “**Parties**”.

Recitals

WHEREAS, you are currently employed by the Company as its Chief Revenue Officer pursuant to the Amended and Restated Offer Letter you and the Company entered into, dated September 30, 2021 (the “**Amended Offer Letter**”);

WHEREAS, you and the Company have agreed that (i) from July 17, 2023 until August 1, 2023 (the “**Transition Period**”), you will transition from your current position and will be employed by the Company as “Special Advisor to the Chief Revenue Officer”, (ii) during the Transition Period, and except for the change in your position referred to in (i) above, all the terms and conditions of your employment with the Company will remain unchanged and (iii) at the expiration of the Transition Period, your employment relationship with the Company will terminate.

WHEREAS, you and the Company agree that, immediately following the Separation Date (as defined below), you will provide consulting and advisory services to the Company as an independent contractor;

WHEREAS, except as set forth herein, you and the Company wish to terminate the Amended Offer Letter and set forth in this Agreement the terms and conditions of the consulting and advisory services you will provide;

WHEREAS, in exchange for the compensation and other benefits being provided to you pursuant to this Agreement, you agree to enter into a general release of all claims against the Company as set forth herein; and

WHEREAS, the Parties, and each of them, wish to resolve any and all disputes, claims, complaints, grievances, charges, actions, petitions and demands that you may have against the Company as defined herein, including, but not limited to, any and all claims arising or in any way related to your employment with, or separation from, the Company, and you and the Company desire to embody in this Agreement the terms, conditions and benefits to be provided in connection with your termination of employment with the Company;

NOW THEREFORE, in consideration of the promises made herein, the Parties hereby agree as follows:

Agreement

A. Transition.

1. Position, Terms and conditions. During the Transition Period, you will transition from your current position and will be employed as “Special Advisor to the Chief Revenue Officer” which reports to the Chief Revenue Officer (the “**New Position**”). For the avoidance of doubt, the Special Advisor to the Chief Revenue Officer is not an Egroup position or an executive position and is not a Section 16 Officer role. You agree that, during the Transition Period, all the terms and conditions of your employment with the Company, other than the New Position, will remain unchanged.

2. **Absence of Good Reason.** You agree and acknowledge that the change from your current position to the New Position will not constitute Good Reason as this term is defined in Exhibit A to the Amended Offer Letter.

B. Separation

1. **Separation Date.** Your last day of employment with the Company will be August 1, 2023 (the “**Separation Date**”). The Company shall pay to you all amounts and benefits that have accrued or were earned but remain unpaid through your Separation Date in respect of salary, bonus and unreimbursed expenses, including accrued and unused vacation, on the Separation Date, regardless of whether you sign this Agreement. The Amended Offer Letter, including the Severance Policy, will terminate on the commencement of the Transition Period without any payment due to you and without any remaining liability for, or obligations on the Company.

2. **Consideration for Release.** Subject to your compliance with the terms and conditions of this Agreement, and provided you deliver to the Company this signed Agreement and satisfy all conditions to make this Agreement effective, the Company shall provide you with good and valuable consideration, including, but not limited to, the payments set forth under this Agreement, as compensation for the Release set forth herein.

C. Terms of Consulting Services

Subject to your execution and non-revocation of this Agreement, your service with the Company during the Service Period (as defined below) shall be subject to the terms set forth below.

1. **Service Period.** You will serve as an independent contractor of the Company for the period commencing August 2, 2023 and ending on July 31, 2024, or such shorter period if you or the Company decide to terminate this Agreement in writing prior to July 31, 2024 (the “**Service Period**”). For the avoidance of doubt, in the event you terminate this Agreement for any reason other than the Company’s material breach of this Agreement, any then unpaid amounts set forth in Section

C.4 below shall terminate, and you shall not be entitled to any further payments set forth in Section C.4 below.

2. **Services.** During the Service Period you shall provide consulting and advisory services to the Company’s Chief Executive Officer or other Company personnel as may be requested from time to time, at a rate no less than 8 hours and no greater than twenty (20) hours per month (the “**Services**”). You shall provide the Services as an independent contractor of the Company and nothing in this Agreement will be construed as creating a joint venture relationship or an employer/employee/agency relationship between you and the Company.

3. **Work Product Ownership; Proprietary Information.**

(a) **Work Product; Moral Rights.** You will disclose in writing to Company all inventions, products, designs, drawings, notes, documents, information, documentation, improvements, works of authorship, processes, techniques, know-how, algorithms, specifications, hardware, circuits, computer programs, databases, user interfaces, encoding techniques, and other materials of any kind that you may make, conceive, develop or reduce to practice, alone or jointly with others, while performing the Services, or that result from such Services, whether or not they are eligible for patent, copyright, mask work, trade secret, trademark or other legal protection (collectively, the “**Work Product**”). You agree that all Work Product will be the sole and exclusive property of the Company. You hereby irrevocably transfer and assign to Company, and agree to irrevocably transfer and assign to Company, all right, title and interest in and to the Work Product, including all worldwide patent rights (including patent applications and disclosures), copyright

rights, mask work rights, trade secret rights, know-how, and any and all other intellectual property or proprietary rights (collectively, “**Intellectual Property Rights**”) therein. At Company’s request and expense, during and after the term of this Agreement, you will assist and cooperate with Company in all respects, and will execute documents, and will take such further acts reasonably requested by Company to enable Company to acquire, transfer, maintain, perfect and enforce its Intellectual Property Rights and other legal protections for the Work Product. You hereby appoint the officers of Company as your attorney-in-fact to execute documents on your behalf for this limited purpose. To the fullest extent permitted by applicable law, you also hereby irrevocably transfer and assign to Company, and agree to irrevocably transfer and assign to Company, and waive and agree never to assert, any and all Moral Rights (as defined below) that you may have in or with respect to any Work Product, during and after the term of this Agreement. “**Moral Rights**” mean any rights to claim authorship of a work, to object to or prevent the modification or destruction of a work, to withdraw from circulation or control the publication or distribution of a work, and any similar right, existing under judicial or statutory law of any country in the world, or under any treaty, regardless of whether or not such right is called or generally referred to as a “moral right.”

(b) **Related Rights.** To the extent that you own or control (presently or in the future) any patent rights, copyright rights, mask work rights, trade secret rights, or any other intellectual property or proprietary rights that may block or interfere with, or may otherwise be required for, the exercise by Company of the rights assigned to Company under this Agreement (collectively, “**Related Rights**”), you hereby grant or will cause to be granted to Company a non-exclusive, royalty-free, irrevocable, perpetual, transferable, worldwide license (with the right to sublicense) to make, have made, use, offer to sell, sell, import, copy, modify, create derivative works based upon, distribute, sublicense, display, perform and transmit any products, software, hardware, methods or materials of any kind that are covered by such Related Rights, to the extent necessary to enable Company to exercise all of the rights assigned to Company under this Agreement.

(c) **Proprietary Information.** You agree that all Work Product and other business, technical and financial information (including, without limitation, the identity of and information relating to Company’s customers or employees) you obtain or assign to Company, or learn while performing the Services, constitute “**Proprietary Information.**” You will hold in confidence and not disclose or, except in performing the Services, use any Proprietary Information. However, you will not be so obligated with respect to information that (i) you can document is or becomes readily publicly available without restriction through no fault of yours, or (ii) that you knew without restriction prior to its disclosure by Company. Notwithstanding the foregoing nondisclosure obligations, pursuant to 18 U.S.C. Section 1833(b), you will not be held criminally or civilly liable under any federal or state trade secret law for the disclosure of a trade secret that is made: (1) in confidence to a federal, state, or local government official, either directly or indirectly, or to an attorney, and solely for the purpose of reporting or investigating a suspected violation of law; or (2) in a complaint or other document filed in a lawsuit or other proceeding, if such filing is made under seal. The Company agrees that it shall not disclose material nonpublic information to you during the Service Period, however in the event that such material nonpublic information is disclosed to you by the Company it shall not be deemed a material breach of this agreement.

4. Service Period Compensation.

(a) **Fee.** During the period of August 2, 2023 to February 2, 2024 (the “**Fee Period**”) you shall receive a monthly payment equal to \$33,750.00 USD per month (the “**Fee**”). The Fee will be paid at the end of the month to which your service relates. For the avoidance of doubt, the total payments for the entire Fee Period to be made according to and subject to your compliance with the terms set forth herein is \$202,500.00 USD or 6 payments of the Fee. Additionally, in the event the Company distributes funds for the first payout period of fiscal year 2024 (covering the first half of fiscal year 2024) and/or the second payout period of fiscal year 2024 (covering the second half of

fiscal year 2024) pursuant to its fiscal year 2024 Bonus Plan, you will receive a payout amount equal to the amount you would have received if your employment had continued with the Company during each of the payout period (the "Bonus Payment"). For the avoidance of doubt, except as set forth in the preceding sentence above, you will not participate in the fiscal year 2024 Bonus Plan.

(b) COBRA Benefit. Subject to your timely and proper election of coverage under the Consolidated Omnibus Budget Reconciliation Act of 1985, as amended ("**COBRA**"), your then-effective group health benefits for you and your COBRA-eligible dependents shall be continued at the Company's cost for all premiums under COBRA (the monthly cost of such premiums, the "**COBRA Premium**") for six (6) months (the "**Non-Cash COBRA**") following the Separation Date, provided that, if the Company determines that it cannot provide the Non-Cash COBRA without potentially violating applicable law or incurring additional expense under applicable law (including, without limitation, Section 2716 of the Public Health Service Act), the Company will provide you, in lieu thereof, taxable, continued installment payments equal to the COBRA Premium for 6 months (measured from the Separation Date), which payments will be made regardless of whether you elect COBRA continuation coverage (the "**Cash COBRA**"). Notwithstanding the foregoing, the number of months of Cash COBRA to be paid, in any case, shall be reduced by the number of months of Non-Cash COBRA previously paid by the Company.

(c) Treatment on Termination of Services During the Service Period. If either the Company or you terminate this Agreement or terminate your services during the Service Period, any then-unvested and unpaid portion of the amounts described in this Section C.4 will be fully and immediately canceled without consideration. Notwithstanding the foregoing in this subsection (c), if your services during the Service Period are terminated (x) by the Company other than due to your gross negligence or intentional misconduct or material breach of this Agreement which is not cured during the Cure Period (as defined below), (y) by you due to the Company's material breach of this Agreement, which breach is uncured after 30 days of your written notice to the Company alleging the breach in detail, or (z) due to your death or disability (items (x), (y), and (z) of this paragraph, collectively, shall be referred to as an "Involuntary Termination"), you will remain eligible to receive any remaining portion of the Fee as well as the equity award treatment set forth in Section C.5 below (but for clarity, not the Bonus Payment).

You acknowledge and agree that your strict compliance with the terms of this Agreement, including Section C.6 below, provided that in each case, you will not be considered non-compliant unless you have received written notice (electronic communication is acceptable) of such and at least ten (10) days to cure ("**Cure Period**") is a condition to your receipt of any consideration pursuant to the terms of this Agreement. Notwithstanding the foregoing, it shall not be deemed a material breach of this Agreement or any other event under clause (x) in the paragraph above merely because you fail to provide the minimum hours of service required in Section C.2, but only if you (x) have made yourself readily available for that minimum number of hours and the Company has declined to engage your service for that number of hours, and (y) otherwise remain available and able to continue providing services under this Agreement. You further acknowledge and agree that in the event of any breach of your obligations under this Agreement, the Company shall, in its sole and absolute discretion, be entitled to refrain from making any payment of amounts provided under this Section C.4 that may be due but have not yet been paid, as well as withholding the equity award treatment set forth in Section C.5 below, until such time as you have fully cured any such breach(es) to the satisfaction of the Company following written notification to you (electronic communication is acceptable) of such breach and an opportunity during the Cure Period.

5. Company Equity Awards. The parties hereto agree that you will stop vesting on your outstanding equity awards on July 31, 2024, or the earlier end of the Service Period (provided that upon an earlier Involuntary Termination, your equity awards will continue to vest through July 31, 2024). On July 31, 2024, you and the Company agree that the Company will cancel without

consideration all your other unvested outstanding equity awards with respect to which vesting is no longer possible. At the end of the Service Period, you may exercise any of your vested outstanding options, at any time until the earliest to occur of (i) the consummation of a Corporate Transaction (as defined in the Company's 2021 Equity Incentive Plan (the "**Plan**")), (ii) the effective date of a dissolution or liquidation of the Company, (iii) any earlier date as required under the Plan, (iv) the date that is the expiration date of your option and (v) July 31, 2025, subject to your execution of a general release of claims in the form prescribed by the Company to be signed on the end of the Service Period and made effective pursuant to the deadline provided on such general release. On August 1, 2023, you and the Company agree that your performance stock unit award granted on June 17, 2022 ("**PSU**") will be canceled without consideration.

6. Service Period Covenants.

(a) Non-Competition. During the Service Period, without the written consent of the Company, you will not become employed by (as an officer, director, employee, consultant or otherwise), involved or engaged in, or otherwise commercially interested in or affiliated with (other than as a less than 5% equity owner of any corporation traded on any national, international or regional stock exchange or over-the-counter market) any person or entity that competes with the Company, or involves preparation to compete with, or an affiliate thereof (together, the "**Company Group**") in the business of the Company (the "**Business**"), which includes DevSecOps. Notwithstanding the foregoing, you may (i) work for a division, entity or subgroup of a company or entity that engages in the Business so long as such division, entity or subgroup does not engage in the Business, and (ii) own an equity interest in and provide services to a debt or equity investment fund and its portfolio companies.

(b) Non-Solicitation of Employees. During the Service Period and for a period of one (1) year thereafter, without the written consent of the Company, you will not induce or attempt to induce any service provider of any member of the Company Group to leave the service of the Company Group. Notwithstanding the foregoing, for purposes of this Agreement, the placement of general advertisements that may be targeted to a particular geographic or technical area but that are not specifically targeted toward employees of the Company or its successor assigns shall not be deemed to be a breach of this Section C.6.

D. Release.

In consideration of the payments and benefits provided and to be provided to you by the Company under this Agreement, and in connection with your separation from employment, by your signature below you agree to the following general release (the "**Release**").

1. On behalf of yourself, your heirs, executors, administrators, successors, and assigns, you hereby fully and forever generally release and discharge the Company, its current, former and future parents, subsidiaries, affiliated companies, related entities, employee benefit plans, and their fiduciaries, predecessors, successors, officers, directors, shareholders, agents, employees and assigns (collectively, for purposes of this Section D, the "**Company**") from any and all claims, causes of action, and liabilities up through the date of your execution of this Agreement. The claims subject to this Release include, but are not limited to, those relating to your employment with the Company and/or any predecessor to the Company and the termination of such employment. All such claims (including related attorneys' fees and costs) are barred without regard to whether those claims are based on any alleged breach of a duty arising in statute, contract, or tort. This expressly includes waiver and release of any rights and claims arising under any and all laws, rules, regulations, and ordinances, including, but not limited to: Title VII of the Civil Rights Act of 1964; the Older Workers Benefit Protection Act; the Americans With Disabilities Act; the Age Discrimination in Employment Act; the Fair Labor Standards Act; the National Labor Relations Act; the Family and Medical Leave

Act; the Employee Retirement Income Security Act of 1974, as amended (“**ERISA**”); the Workers Adjustment and Retraining Notification Act; the California Fair Employment and Housing Act (if applicable); the provisions of the California Labor Code (if applicable); the Equal Pay Act of 1963; and any similar law of any other state or governmental entity. You further waive any rights under Section 1542 of the Civil Code of the State of California or any similar state statute. Section 1542 states:

“A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH, IF KNOWN TO HIM OR HER, MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR.”

This Release does not extend to, and has no effect upon: (a) any benefits that have accrued, and to which you have become vested or otherwise entitled to, under any employee benefit plan, program or policy sponsored or maintained by the Company and its affiliates, (b) your right to indemnification by the Company, and continued coverage by the Company’s director’s and officer’s liability insurance policy, or any indemnification rights to which you may be entitled under the Company’s Articles of Incorporation or Bylaws, by contract, as a matter of law, or otherwise, or under any power that the Company may have to indemnify you or hold you harmless, (c) any claim that arises after the date of this Agreement (including but not limited to your right to enforce the terms of this Agreement), (d) your rights following the date hereof with respect to any vested equity interests you hold in the Company or any of its past or present affiliates, or (e) any right you may have to obtain contribution as permitted by law in the event of entry of judgment against you as a result of any act or failure to act for which the Company, or any of its subsidiaries or affiliates, and you are held jointly liable.

2. You understand that nothing in the Agreement shall prohibit you from exercising legal rights that are, as a matter of law, not subject to waiver such as: (a) your rights under applicable workers’ compensation laws; (b) your right, if any, to seek unemployment benefits; (c) your right to indemnity under California Labor Code Section 2802 or other applicable state-law right to indemnity; and (d) your right to file a charge or complaint with the Equal Employment Opportunity Commission, the National Labor Relations Board, the Occupational Safety and Health Administration, the Securities and Exchange Commission or any other federal, state or local government agency or commission (“**Government Agencies**”). You further understand that this Agreement does not limit your ability to communicate with any Government Agencies or otherwise participate in any investigation or proceeding that may be conducted by any Government Agency, including providing documents or other information, without notice to the Company. This Agreement does not limit your right to receive an award for information provided to any Government Agencies. Moreover, you will continue to be indemnified for your actions taken while employed by the Company to the same extent as other then-current or former directors and officers of the Company under the Company’s Certificate of Incorporation and Bylaws and any director or officer indemnification agreement between you and the Company, if any, and you will continue to be covered by the Company’s director’s and officer’s liability insurance policy as in effect from time to time to the same extent as other then-current or former directors and officers of the Company, each subject to the requirements of the laws of the State of California.

3. As part of your existing and continuing obligations to the Company, you have returned to the Company all Company documents (and all copies thereof) and other Company property that you have had in your possession at any time, including but not limited to the Company’s files, notes, drawings, records, business plans and forecasts, financial information, specification, computer- recorded information, tangible property (including, but not limited to, computers, laptops, pagers, etc.), credit cards, entry cards, identification badges and keys; and any materials of any kind which contain or embody any proprietary or confidential information of the Company (and all

reproductions thereof). You understand that, even if you did not sign the Agreement, you are still bound by any and all confidential/proprietary/trade secret information, non-disclosure and inventions assignment agreement(s) signed by you in connection with your employment with the Company, or with a predecessor or successor of the Company pursuant to the terms of such agreement(s). Notwithstanding the foregoing, you may retain during the Service Period any company-provided cell phone or laptop in order to provide services to the Company, but you agree to return such cell phone and laptop computer upon the termination or completion of the Service Period. In addition, the Company reserves the right to review and erase any company confidential information that may be contained on the Company-provided cell phone and laptop computer. Upon the end of the Service Period, the Company agrees to transfer ownership of your Company laptop, office lighting, monitor, camera equipment, and other office supplies to you on the condition that you agree to wipe your company-issued laptop and any other devices in compliance with the GitLab Laptop Buy-Back Policy and the terms in your Amended Offer Letter on or before 5pm pacific of the last day of the Transition Period, or August 1, 2023 whichever occurs first.

4. You represent and warrant that you are the sole owner of all claims relating to your employment with the Company and/or with any predecessor of the Company, and that you have not assigned or transferred any claims relating to your employment to any other person or entity.

5. You agree to keep the payments and benefits provided hereunder and the provisions of this Agreement confidential and not to reveal its contents to anyone except your lawyer, your creditors, your spouse or other immediate family member, and/or your financial consultant, or as required by legal process or applicable law.

6. You understand and agree that this Agreement shall not be construed at any time as an admission of liability or wrongdoing by either the Company or yourself.

7. You agree that you will not make any negative or disparaging statements or comments, either as fact or as opinion, about the Company, its employees, officers, directors, shareholders, vendors, products or services, business, technologies, market position or performance. The Company (including its subsidiaries and affiliates) agrees that its current executive officers and members of its Board of Directors, for so long as they are providing services to the Company, will not make any negative or disparaging statements or comments, either as fact or as opinion, about you (or authorizing any statements or comments to be reported as being attributed to the Company). Nothing in this paragraph shall prohibit you or the Company from providing truthful information in response to a subpoena or other legal process.

8. In executing this Agreement, you acknowledge that you have not relied upon any statement made by the Company, or any of its representatives or employees, with regard to the Agreement unless the representation is specifically included herein. Furthermore, this Agreement contains our entire understanding regarding eligibility for payments and benefits and supersedes any or all prior representation and agreement regarding the subject matter of this Agreement. However, this Agreement does not modify, amend or supersede written Company agreements that are consistent with enforceable provisions of this Agreement such as the Confidential Information and Inventions Assignment Agreement that you previously entered into with the Company (the "***Inventions Agreement***"), and any stock, stock option restricted stock unit and/or stock purchase agreements between the Company and you. Once effective and enforceable, this agreement can only be changed by another written agreement signed by you and an authorized representative of the Company.

E. **General Terms**

1. **Section 409A.** To the extent (a) any payments to which you become entitled under this Agreement, or any agreement or plan referenced herein constitute deferred compensation subject to

Section 409A of the Code and (b) you are deemed at the time of such termination of employment to be a “specified” employee under Section 409A of the Code, then such payment or payments will not be made or commence until the earlier of (i) the expiration of the six (6)-month period measured from the Separation Date and (ii) the date of your death following such separation from service; provided, however, that such deferral will be effected only to the extent required to avoid adverse tax treatment to you, including (without limitation) the additional twenty percent (20%) tax for which you would otherwise be liable under Section 409A(a)(1)(B) of the Code in the absence of such deferral. Upon the expiration of the applicable deferral period, any payments which would have otherwise been made during that period (whether in a single sum or in installments) in the absence of this paragraph will be paid to you or your beneficiary in one lump sum (without interest).

To the extent that any provision of this Agreement is ambiguous as to its exemption or compliance with Section 409A, the provision will be read in such a manner so that all payments hereunder are exempt from Section 409A to the maximum permissible extent, and for any payments where such construction is not tenable, that those payments comply with Section 409A to the maximum permissible extent. To the extent any payment under this Agreement may be classified as a “short-term deferral” within the meaning of Section 409A, such payment will be deemed a short-term deferral, even if it may also qualify for an exemption from Section 409A under another provision of Section 409A.

Payments pursuant to this Agreement (or referenced in this Agreement) are intended to constitute separate payments for purposes of Section 1.409A-2(b)(2) of the regulations under Section 409A. Notwithstanding the foregoing, in the event the Company determines that any compensation or benefits payable under this Agreement may be subject to Section 409A, the Company will work in good faith with you to adopt such amendments to this Agreement, or to adopt such policies and procedures or take such other actions that the Company determines are necessary or appropriate, to avoid the imposition of taxes under Section 409A.

2. **Confidential Information and Other Company Policies.** In connection with providing the Services, you will be bound by and comply fully with the Company’s standard confidentiality agreement (a form of which will be provided to you), insider trading policy, code of conduct, and any other policies and programs adopted by the Company regulating the behavior of its service providers, as such policies and programs may be amended from time to time.

3. **Business Expense Reimbursement.** You will be reimbursed, in accordance with the Company’s expense reimbursement policy, for all business expenses reasonably and necessarily incurred by you in connection with your provision of the Services to the Company.

4. **Confidential Information and Inventions Assignment Agreement.** You acknowledge and agree that you will continue to be bound by the Inventions Agreement.

5. **Withholding.** Sums payable to you hereunder shall be paid without deduction and withholding, and you shall be solely responsible for remittance of any and all taxes due as a self-employed person.

6. **Severability.** If any term, covenant, condition or provision of this Agreement or the application thereof to any person or circumstance shall, at any time, or to any extent, be determined invalid or unenforceable, the remaining provisions of this Agreement shall not be affected thereby and shall be deemed valid and fully enforceable to the extent permitted by law.

7. **Successors; Assignment.** The rights and obligations of the Company under this Agreement shall inure to the benefit of and be binding upon the successors and assigns of the Company. Your rights and obligations hereunder are non-assignable. The Company may assign its rights and

obligations to any entity in which the Company or an entity affiliated with the Company, has a majority ownership interest.

8. Notices. Notices and all other communications contemplated by this Agreement shall be in writing and shall be deemed to have been duly given when personally delivered or when mailed by U.S. registered or certified mail, return receipt requested and postage prepaid. Notices or other communication directed to you shall be addressed to your home address most recently communicated to the Company in writing. Notices or other communication directed to the Company shall be addressed to the Company's corporate headquarters and directed to the attention of the Board.

9. Corporate Transaction; Entire Agreement; Agreement Provisions Modified. Notwithstanding the terms of this Agreement to the contrary, in the event that a Corporate Transaction (as defined in the Offer Letter) occurs prior to November 2, 2023, your outstanding time-based Company equity awards shall become immediately vested as of the date of such Corporate Transaction. For the sake of clarity, your canceled PSU equity grant will not accelerate in the event of a Corporate Transaction occurring prior to November 2, 2023. Except as set forth herein, this Agreement, including the Inventions Agreement, sets forth the terms of your service with the Company and supersedes any prior representations or agreements, whether written or oral, including the Amended Offer Letter. This Agreement may not be modified or amended except by a written agreement signed by you and an authorized officer of the Company.

10. Arbitration and Class Action Waiver. Except for any claim for injunctive relief arising out of a breach of a party's obligations to protect the other's proprietary information, the parties agree to arbitrate, in San Francisco, California through JAMS, any and all disputes or claims arising out of or related to the validity, enforceability, interpretation, performance or breach of this Agreement, whether sounding in tort, contract, statutory violation or otherwise, or involving the construction or application or any of the terms, provisions, or conditions of this Agreement. Any arbitration may be initiated by a written demand to the other party. The arbitrator's decision shall be final, binding, and conclusive. The parties further agree that this Agreement is intended to be strictly construed to provide for arbitration as the sole and exclusive means for resolution of all disputes hereunder to the fullest extent permitted by law. Further, to the fullest extent permitted by law, you and the Company agree that no class or collective actions can be asserted in arbitration or otherwise. All claims, whether in arbitration or otherwise, must be brought solely in your or the Company's individual capacity, and not as a plaintiff or class member in any purported class or collective proceeding. Nothing in this Arbitration and Class Action Waiver section, however, restricts your right, if any, to file in court a representative action under California Labor Code Sections 2698, et seq.

SUBJECT TO THE ABOVE PROVISIO, THE PARTIES HEREBY WAIVE ANY RIGHTS THEY MAY HAVE TO TRIAL BY JURY IN REGARD TO ARBITRABLE CLAIMS. THE PARTIES FURTHER WAIVE ANY RIGHTS THEY MAY HAVE TO PURSUE OR PARTICIPATE IN A CLASS OR COLLECTIVE ACTION PERTAINING TO ANY ARBITRABLE CLAIMS BETWEEN YOU AND THE COMPANY.

11. Consideration Period; Effective Date. You agree that you have had at least twenty-one (21) calendar days in which to consider whether to execute this Agreement, no one hurried you into executing this Agreement during that period, and no one coerced you into executing this Agreement. The offer set forth in this Agreement will expire on the twenty-second (22nd) calendar day after your receipt of this Agreement. You also understand you may revoke this Agreement within seven (7) days of signing this Agreement. This Agreement is effective on the eighth (8th) day after you sign it and without revocation by you (the "**Effective Date**"). You understand that the payments and

benefits under this Agreement will become available to you at such time after the Effective Date.

12. Choice of Law. This Agreement is made and entered into in the State of California, and shall in all respects be interpreted, enforced and governed by and under the laws of the State of California (but not including any choice of law rule thereof that would cause the laws of another jurisdiction to apply).

13. Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together will constitute one and the same instrument.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement on the respective dates set forth below.

**CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER PURSUANT TO
RULE 13a-14(a) OR 15d-14(a) OF THE SECURITIES EXCHANGE ACT OF 1934,
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Sytse Sijbrandij, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of GitLab Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting, which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

I, Brian Robins, Chief Financial Officer of GitLab Inc. (the “Company”), do hereby certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that to the best of my knowledge:

1. the Quarterly Report on Form 10-Q of the Company for the fiscal quarter ended July 31, 2023 (the “Report”) fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
2. the information contained in the Report fairly presents, in all material respects, the financial condition, and results of operations of the Company.

Date: September 5, 2023
